

Goliath & Easy-Up

Hoists/Stand Assist

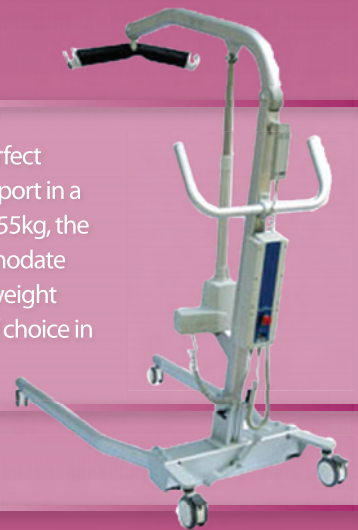

The NEW **Goliath** range of mobile hoists by **Reval** offers the perfect solution for patient transfer. Manufactured from lightweight aluminium, all three hoists are extremely light and easy to manoeuvre over most floor surfaces, making it a safe and reliable procedure.

All **Goliath** hoists are equipped with easy-roll castors and wide push/pull manoeuvring handles, which enables the operator to maintain a good posture and leverage at all times.

Goliath S Model (155kg SWL) Ref. 5494.00

The **Goliath S** model is the compact lightweight model from our range of mobile patient hoists, designed for general purpose patient transfers. Its compact design enables use in the most challenging and confined room spaces. The **Goliath S** can be

dismantled into two parts, making it the perfect store-away appliance, which is easy to transport in a family vehicle. With a safe working load of 155kg, the **Goliath S** hoist is robust enough to accommodate the larger patient with ease. Its stylish lightweight design makes this hoist the clear product of choice in the compact lightweight category.

Goliath M Model (180kg SWL) Ref. 5492.00

The **Goliath M** model is a mid-range mobile hoist featuring a powered base, making it easier to manage and handle under pressure. Its stature and design provides additional patient space, and will comfortably accommodate loads of up to 180kg.

As a general purpose mid-range hoist, the **Reval Goliath M** model is the perfect choice for all your general purpose patient transfer tasks. The combination of its lightweight design and its capacity to manage loads up to 180kg make the hoist the perfect all-rounder.

Goliath XL Model (320kg SWL) Ref. 5490.00

The **Goliath XL** model is a lightweight hoist able to manage loads with ease up to 320kg. This all-purpose hoist has been designed to manage the most challenging patient transfers, featuring a powered leg adjustment to make positioning and setting up the hoist under load effortless, whilst incorporating a fail-safe locking mechanism to ensure optimum safety. The **Goliath XL** is equipped with a four point spreader bar as standard (two point spreader bar optional), which is easily

interchangeable without the need for any tools. This model has been designed for general purpose use, however its stature and design lends itself to the heavy duty category and acute care tasks. The **Goliath XL** is equipped with walking bars, which enable patients and therapists to undertake safely supported walking transfers; ideal for use in physical therapy regimes. It is the perfect partner in the high dependency category and is the ideal product for use in rehabilitation practices and therapy routines in an acute environment.

Easy-Up Stand Assist - Ref. 5496.00

The NEW **Reval Easy-Up Stand Assist** completes our mobile patient transfer range. This lightweight and compact stand assist is the perfect appliance when working in small room spaces, yet equally capable of managing the most challenging of loads. The **Easy-Up** is suitable for use at home, in residential and acute care environments covering the entire care spectrum. Manufactured from lightweight aluminium the **Easy-Up** glides effortlessly on most floor surfaces and is easy to manoeuvre. The foot plate is solid and incorporates padded heel

stops to secure the patient's feet safely and comfortably. The jib is depth adjustable allowing correct adjustment and good posture control and positioning. The **Easy-Up Stand Assist** has large padded shin supports, which are angle adjustable, adding comfort and control of posture throughout the transfer. The control handset is lightweight and user friendly with clear visual graphics. The legs are adjusted via a two-way pedal located conveniently at the front of the appliance for easy access. The powered action makes standing transfers effortless for the care worker and significantly reduces the risk of back injury.

Goliath S - Ref 5494.00

Goliath M - Ref 5492.00

Goliath XL - Ref 5490.00

Technical Features

- ▶ Max. lifting weight capacity: 320kg (XL)
180kg (M), 155kg (S)
- ▶ Maximum length: 1500mm (XL)
1135mm (M), 1330mm (S)
- ▶ Minimum width: 765mm (XL)
620mm (M), 660mm (S)
- ▶ Maximum width: 1190mm (XL)
1095mm (M), 1030mm (S)
- ▶ Minimum height: 1560mm (XL)
1400mm (M), 1350mm (S)
- ▶ Maximum height: 2155mm (XL)
2020mm (M), 1790mm (S)
- ▶ Turning circle: 1670mm (XL)
1410mm (M), 1410mm (S)
- ▶ Appliance weight: 61kg (XL)
36kg (M), 33kg (S)
- ▶ Front & rear castor sizes: Ø 100/125mm (XL)
Ø 80/80mm (M), Ø 80/100mm (S)
- ▶ Leg opening aperture: Powered (XL)
Powered (M), Manual (S)

- ▶ Spreader bar: 4 pts (XL)
2 pts (M), 2 pts (S)
- ▶ Power: Rechargeable batteries 24Vcc - 3.2Ah
230Vac/24Vcc, Charger - Class II
