Protek Spectator Rail

Combined Mesh Panel and Handrail

Ideal for sports areas where public viewing is as important as their safety, Protek Spectator Rail is a combination of mesh panel and tubular top handrail. As well as forming a secure perimeter around a running track or playing area it can also be used to make team enclosures. Available with optional kickboards and with either the 656 or 868 mesh panel.

Posts, Clamps and Fixings

The posts and full length clamp bars that Alexandra Security Limited offers provide a fixing system which secures the panels but allows for variations. The system is easy to install and allows the panels to be stepped, helping the fence line to follow the contours of the ground. With the vandal resistant security fixings this post and clamp system provides a higher level of security than the traditional clip system.
