

BUILDINGS FOR EDUCATION: Advanced solutions for schools, colleges and universities.

Many years of expertise in delivering projects for schools and colleges have enabled Danzer to develop and define a market leading product which is perfectly suited to the special needs of pupils and teachers.

Bright engaging and practical are some of the words used by others to describe our classroom solutions.

Our extensive experience in education, and providing classrooms, means that whatever your requirement may be, we can provide a straight-forward single classroom, or a fully specified 3 storey multi-functional solution.

The list of great features that can be included in your classroom is extensive, including interactive white boards, IT systems, air conditioning, double glazing, PIR controlled lighting - helping to ensure a 'Good' BREEAM (energy) rating.

Couple this with our ability to deliver on time, and to budget - every time, means we are a clear choice for your project.

DANZER

Flexible Adaptable
Dependable

BUILDINGS FOR EDUCATION

Robust buildings incorporating lockers, changing rooms, showers, WC facilities and referees rooms are amongst the cost effective leisure facilities available in our modular building range. Home and away, ladies and gents facilities can all be catered for in a Danzer modular changing facility. Buildings can be located anywhere so, even if the building is required on a playing field, no problem. Let us quote for your leisure needs, contact us now.

We also supply Nursery and Childcare accommodation in all shapes and sizes. Our role is to find solutions for the unique requirements of our customers as quickly and cost effectively as possible.

Interesting and bright finishes can be used to engage children, with their new accommodation aiding transition to new facilities, as well as raising the bar in the care you provide.

Danzer have also supplied a number of music and drama suites. To meet the demands of this application, high level acoustic insulation is incorporated and in order to offer flexible space - acoustic retractable partitioning can also be used. These elements - coupled with (in the case of drama studios), sprung floor and wall mirrors - give a purpose built facility.

Whether for staff or students, it's vital that the welfare facilities of any academic establishment are suitable for their use, so Danzer can also design, build, and install refectories to meet all your needs.

Our service is not limited to the building itself, we can deal with the services, foundations, and landscaping, as well as playground areas. Design and build services are available, simply let us know what you need.
