

Specification

Straight fold down grab bar with 'soft fall' damping mechanism. Model number 12.4120 in satin finish stainless steel c/w grab bar retaining catch. Manufactured by FC Frost Ltd.

Material

- Grab Bar: Ø34mm x 3mm wall tube, satin finish stainless steel grade 1.4301 (304)
- Back Plate: 10mm satin finish stainless steel grade 1.4301 (304)
- Tested to 190kg BS EN 12182:1999. Achievable weight load dependent on wall construction/fixings.
- Approximate weight: 3.9kg

Operation

To lower grab bar when in vertical position; Pull down on grab bar until it is in the horizontal position. To relocate bar push bar upwards until it self locates in retaining catch. **N.B.** To prevent trapping of fingers when operating **DO NOT** place fingers underneath the arm between the bar end and back plate. 'Soft Fall' damping mechanism is factory set. It is recommended that the friction of the bar is not decreased from the factory setting.

Grab Bar
12.4120

Installation

- Recommended mounting height from top surface of bar (When in drop down position) to FFL 680mm
- Mark location of fixing holes on wall.
- Drill holes and fix wall plate to wall using suitable screws. It is imperative that suitable fixings for the wall installation are used

Care and Maintenance

Clean with soap and warm water, dry with a clean soft cloth.

To maintain finish use any industrial steel cleaner, polishing along the material grain with a clean soft cloth.

FC Frost Ltd recommends "Steel Clean" cleaning agent, obtainable from: Vitopan (Tel: 01204 863000)

Abrasive cleaners, chloride cleaning agents and carbon steel brushes/steel wool will scratch the stainless steel and should not be used.

Warranty

This product is covered by a 12-month warranty from the date of purchase to be free from defects if installed and maintained in accordance with these instructions. FC Frost will replace or repair (as appropriate) free of charge any product with a proven manufacturing defect if reported within the warranty period.
