Product Specification

Design: 'Pebble'

Designer: Allermuir Design

Allermuir's in-house design and development team is one from a mixture of design, engineering and production backgrounds.

As well as working successfully in developing the ideas of freelance furniture designers and products for architects and interior designers specific projects, the department's acquired market knowledge has also led to a number of highly successful in-house designs.

Features:

Pebble is a superb seating option for a multitude of informal meeting spaces or corporate breakout areas where people may come together for only a brief period to chat; to have a drink, or just rest a while. This comfortable design allows for user interactivity as it can be nested with other 'Pebbles', arranged in a scattered format, or even be used individually as a stand-alone piece.

Finishes:

Legs are finished in a Silver Polyester powder coating as standard with clear plastic feet. Pebble can be upholstered in a wide range of contract quality fabrics or leather, but these require a high degree of stretch. As with leather, by applying a seam around the middle of Pebble, vinyls can also be used on this design.

Marketplace:

This is a very contemporary product type with many examples now coming onto the market in all shapes and sizes. Areas in question include all manner of public meeting and greeting spaces, atria, breakout spaces within the working environment, and reception areas generally. Whether in bright, fun coloured, upholstery or in calming, natural and mellow leather, Pebble is an exciting, flexible concept for both contemporary and traditional interior spaces.

Products available in range
