

KWC ADRENA

KWC ADRENA

Formidable design

The new KWC ADRENA kitchen range has plenty of flair. Rather than relying on spectacle, however, it demonstrates an appealing practicality and the reliable quality of KWC's Swiss-made products. The straightforwardness that characterizes its modern yet timeless geometric style is carried over seamlessly into its functional aspects: an easy-to-grip, robust lever, a pull-out spray designed for everyday use with needle spray and Neoperl® spray settings, an innovative membrane diverter and various other practical details make the faucet easy to clean and simply a pleasure to use. KWC ADRENA is a faucet that does everything it promises to do – and does it well! In terms of design, KWC ADRENA cuts an utterly formidable figure.

Lever design

The cleverly designed operating lever sits comfortably in your hand with unbelievable ease: during operation, the hand naturally grasps and conforms to the semicircular shape of the underside of the lever tip, allowing you to move the lever ergonomically without even thinking about it.

Convenient pull-out spray

The pleasantly tactile pull-out spray can be extended by up to 60 cm, creating plenty of space for your day-to-day activities in the kitchen.

Practically seamless

Minimal joints and smooth, rounded transitions prevent the build-up of limescale and dirt and make the faucet easy to clean – simply good practical design!

A spray of your choice

Whether you prefer a full Neoperl® jet of water or a gentle needle spray, a simple touch of a button is all that is required to change the spray profile. The automatic diverter reset function then returns the faucet to its default Neoperl® spray setting when the water flow is switched off.

Ergonomic and hygienic

The innovative membrane diverter offers a smart solution: as well as enabling the spray setting to be changed in an exceptionally user-friendly way, the integrated, seamless diverter also guarantees maximum hygiene – genuine added value that is sure to win you over!

Easy to clean

The faceplate with Neoperl® on the pull-out spray can easily be unscrewed, cleaned and reinserted without tools, thanks to the quick fastening TAC mechanism (Turn and Clean).

KWC JETCLEAN effectively reduces lime deposits on the spray, because the holes in the flexible faceplate expand during use, blasting lime deposits away.

touchControl

Protection against burns: thanks to the insulated hot water supply ("double skin" principle), the pull-out spray may become warm, but never hot.

Simple elegance

The KWC ADRENA lever mixer features a swivel spout with a 160° range of movement and combines traditional Swiss structural principles with contemporary design. The familiar, clearly defined contours of the faucet blend seamlessly into the overall kitchen setting, making this the perfect kitchen accessory.
