INFECTION CONTROL IN PERFORMANCE DOORSETS

# deep down protection

A new, innovative, anti-microbial facing option exclusively from Leaderflush Shapland

Combating Healthcare Associated Infections (HAI) is now regarded as the most important performance requirement for healthcare environments. Leaderflush Shapland is committed to developing innovative products specifically for this sector and has introduced Hygieniform, a revolutionary, high impact, chemical resistant PVC facing option which helps control infections.

Hygieniform incorporates Hygienilac®, a biocidally proactive additive which kills bacteria and other microbes by preventing their access to nutrients. It does not employ silver technology,

rendering it completely UV stable and remains effective for years because of its inherently low water solubility. It has passed British Standard 6250 tests for severe usage and its active ingredient has approvals from the Food and Drug Administration (FDA), Health and Safety Executive (HSE) and the Environmental Protection Agency (EPA).

Hygieniform forms part of Leaderflush Shapland's Plasform range and can also be specified for use on protection plates, edge protectors and as a facing option for flat faced lipped doors.

# deep down protection

- Chemical Resistant
- Impact Resistant
- UV Stable
- Non-carcinogenic
- Non-mutagenic
- Non skin sensitising

Hygieniform incorporates the Hygienilac® anti-microbial additive through the complete 2mm thickness of the PVC so that even if the surface is scratched, it will still provide protection against harmful bacteria such as C.diff, E.coli, Salmonella, Listeria and MRSA, as well as being suitable for 'Severe Duty' applications.

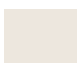

## Other Hygienilac® Products

All Leaderflush Shapland veneered doorsets incorporate Hygienilac® as standard. As an additional option, Leaderflush Shapland can also supply a range of architectural hardware which incorporates the Hygienilac® additive into either a clear or coloured powder coat, giving specifiers the opportunity to specify a complete anti-microbial doorset solution.

For further information on our anti-microbial products please contact our Technical Services Department on 01773 530500.

## Hygieniform High Impact PVC colour guide

### Description

Oceana		Sky		Neptune		Emerald		Bottle Green	
Shadow		Manta Grey		Mist		Stone		Sandy	
Ivory		Musk		Shiraz		Daisy			

Please note: Due to limitations in the print process, certain products may differ slightly in colour from those illustrated above.
