Sleek, slim sightlines offer superb contemporary aesthetics

A revolution

in design, engineering
and performance

Introducing the UK's first fully integrated window and door system from Eurocell

IT'S A GAME CHANGER

Welcome to modus® – a brand new system from Eurocell that leads the market in terms of looks, performance and value for money. Now you can create a whole range of different fenestration types and aesthetic styles from a single system.

modus® features the clean and contemporary looks that today's customers demand, together with slimmer sight lines and leading thermal performance. Now, for the first time, there's a genuine alternative to aluminium and timber products, and one offering considerably better value.

UNRIVALLED AESTHETICS

Whether it's a sleek ultra contemporary look or elegant traditional architectural styling, modus® delivers. What's more, you can create standard, slim rebate and flush sash casement windows, reversible windows, tilt & turn windows, entrance doors and French doors – all from this single system. modus® is also easier and faster to fabricate than other leading systems on the market.

modus® has been designed to help you win new customers, save time and reduce costs

STANDARD SASH CASEMENT WINDOWS

Featuring slimmer sight lines than other systems. 28mm (double) and 44mm (triple) glazing options are available.

TILT & TURN WINDOWS

A new stepped sash design provides improved weather and thermal performance, as well as enhanced aesthetics. There's a dummy mullion/transom plant-on, and no need for steel reinforcement*.

SLIM REBATE SASH CASEMENT WINDOWS

Offering clean sight lines with an internal flush sash and external slim rebate. It also brings better thermal performance than equivalent price aluminium systems.

ENTRANCE DOORS

Providing slimmer sight lines and equal 8mm of cover inside and out.

FLUSH SASH CASEMENT WINDOWS

An internally and externally flush sash offers enhanced aesthetics. This is the first dual material extrusion technology (DMET) flush sash and delivers better thermal performance than equivalent price timber windows.

FRENCH DOORS

A dedicated French door mullion improves aesthetics and thermal performance.

COMPOSITE DOORS

Outer frame, transom and mullion, compatible with 56mm or rebated 70mm panels for improved thermal performance over existing 44mm doorsets.

*Dependant on size and location

REVERSIBLE WINDOWS

Featuring a completely flush sash. As the first DMET reversible system in the UK, this innovative product delivers enhanced aesthetics – and it's the most thermally efficient in the UK.

Maximum performance delivered cost-effectively

OUTSTANDING ENERGY EFFICIENCY

Following a £3million investment in research and development, Eurocell created modus® to deliver industry-leading energy efficiency. With a triple-seal option providing superb thermal performance and air tightness, U-values as low as 0.7 can be achieved - exceeding Passivhaus standards.

By specifying modus®, double-glazing costs can be reduced by up to 27%*. This unique system delivers more cost-effective triple glazed specifications too. modus® - supporting the drive for an affordable zero-carbon future.

SUSTAINABILITY BUILT-IN

When we designed modus®, sustainability was at the forefront of our thinking. So we made sure that the system utilises 50% post-consumer recycled PVC-U** as standard, and has a 100% recycled PVC-U option available on demand. Innovative dual material extrusion technology (DMET) ensures fast, efficient use of post-consumer PVC-U in the production process.

Manufactured and recycled at our state-of-the-art plants in Derbyshire, modus® creates a lower carbon footprint than many profiles made or recycled outside of the UK.

u-values as low as

0.7

* Based on average cost/m² between three leading glazing unit suppliers against a double-glazed specification achieving a 1.2 U-value
** Average. Post-consumer and virgin PVC-U % content varies between profiles

modus® standard sash casement windows offer clean lines

Improving efficiency cutting costs

The innovative design of modus® means lower glass specifications can be used, reducing glazing costs – the most costly element of a window. 90% of modus® windows need no reinforcements, saving on fabrication labour time. And stockholding will be cut too, as multiple systems are no longer required to offer an equivalent range of products.

up to **27%**
saving on glazing costs*

up to **8%**
saving on labour costs**

up to **42%**
reduction on stockholding***

* Based on average cost/m² between three leading glazing unit suppliers against a double-glazed specification achieving a 1.2 U-value
** Based on a 1200mm x 1200mm side hung next to fixed window compared to fabricating a Eurocell Eurologik equivalent window
*** Fabricators only require 27 stillages instead of 43, based on comparisons against existing Eurocell systems for white profile only

modus® flush sash casement window in Irish Oak offers a quality, natural woodgrain appearance

GUARANTEE
12-YEAR*
GUARANTEE

SECURITY & QUALITY GUARANTEED

modus® features a range of enhanced security features. The six-chambered design creates inherently stronger profiles, while new door reinforcements and improved hardware fixings combine to maximise the security of frames. To ensure that you and your customers enjoy total peace of mind, there's a full 12-year guarantee*. That's more than any other leading system currently available.

* Applies to White profile only

1st

modus® slim rebate sash casement window features completely flush sash internally

First across the board

With its stunning contemporary design, exceptional technical performance, leading energy efficiency and unique multi-functional design, modus® has taken first place in the UK window and door industry. But the firsts don't stop there...

- First fully integrated PVC-U system in the UK
- First 75mm DMET window system in the UK
- First DMET PVC-U reversible system in the UK
- First DMET bead in the UK
- First leading system to offer a 12-year guarantee in the UK
