Welcome

The choice of a ceiling will have a major impact on the appearance and feel of a room. As experts in acoustic ceiling solutions, we aim to inspire you and make your choice of solutions easier.

This catalogue is focussed on the essentials. Intentionally, we have limited the amount of technical information and focused on inspiration. The sections highlight important points to consider when choosing ceilings.

You can:

- Choose and compare suspended ceiling tiles by
 - ...design
 - ...acoustics
 - ...technical performance
- Look up product information by
 - ...dimensions
 - ...acoustics
 - ...technical performance
- Check on installation by
 - ...ease of installation
 - ...specific installation guidelines

Rockfon ceiling tiles have many advantageous characteristics, which stem from our stone wool technology. Throughout this document we highlight these characteristics and explain the advantages for our customers.

The aim of this catalogue is to make complex technical concepts more easily understood. We also welcome ceiling experts who share our passion for technical excellence. For those looking for more detailed datasheets and installation guides, please contact our technical support team or visit our web site, www.rockfon.co.uk

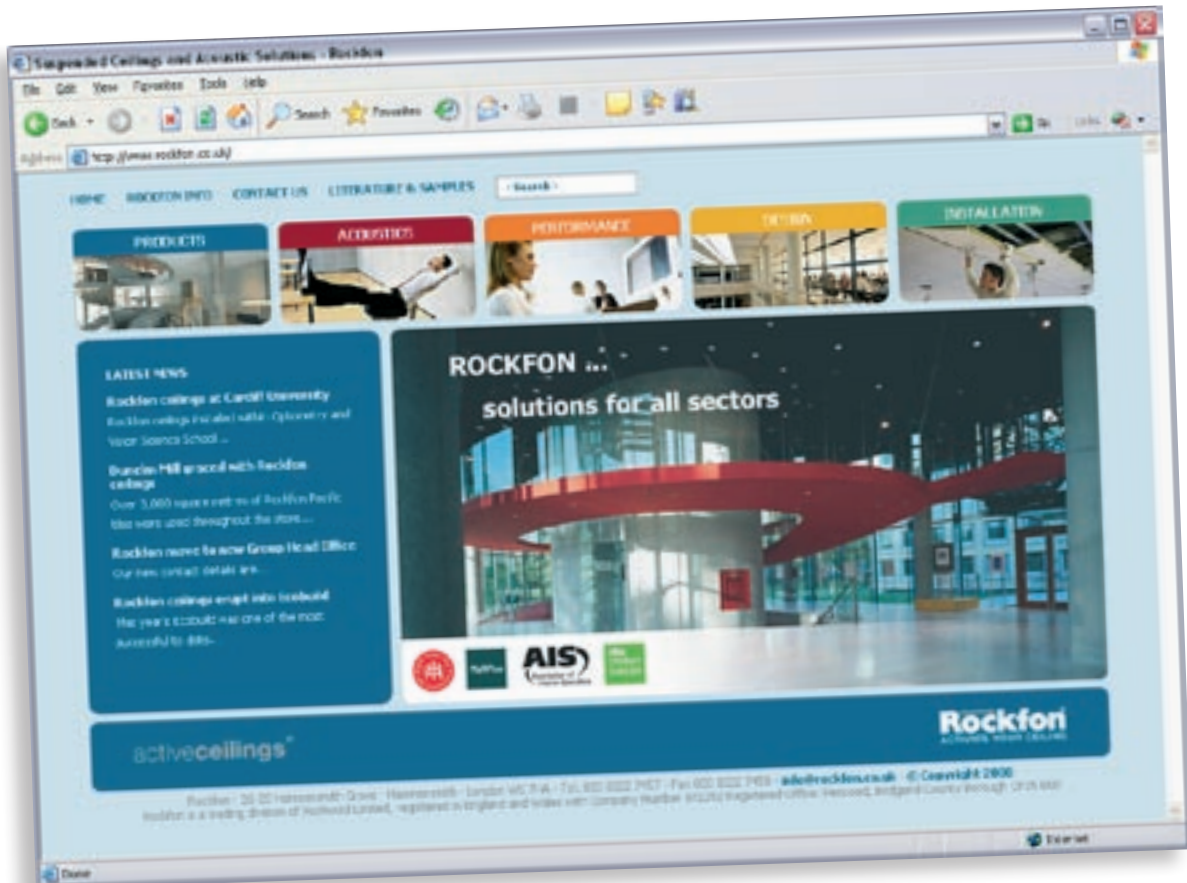

15 YEAR GUARANTEE

Our products can withstand even extreme climatic conditions and still remain dimensionally stable. For this reason the life expectancy of Rockfon tiles and RockLink grid systems is high. This is why we offer a 15 year product guarantee. For more information and conditions please contact your Rockfon sales representative.

Rockfon online

www.rockfon.co.uk is an invaluable source of information, right at your fingertips. Whether you want to compare edge details, colours and sizes or search for ceiling tiles to suit your particular building design or market sector, the answers are all there.

Our website is also a good place for brushing up on various technical terms, the latest CE marking regulations, finding out which distributors stock our products or who to call if you would prefer to talk your query through with someone.

Other features are listed below which aim to inspire and aid your product selection quickly and easily:

- complete overview of entire product range, grouped in a logical and intuitive way that makes choosing products very easy
- quick access to all technical data on products
- fast and easy way to create a project specification online
- acoustic calculator that allows you to calculate the impact an acoustic ceiling will have on the reverberation time in a room
- quantity calculator that allows you to calculate the number of tiles and grid components needed to install any given ceiling solution
- online CAD drawings in dwg format to save you time when drawing up a room or installation detail
- library of reference projects from around the world where Rockfon ceiling solutions have been used with great success
- installation guides
- samples ordering
- list of distributor stockists
