

Revolving Doors

Bauporte Revolving Doors offer an unlimited range of variations and defy convention.

We specialise and excel in very tall revolving doors and can provide models with rotating doorsets over 7000mm high.

Offering all the traditional benefits of energy efficiency and draught prevention, our custom made doors are all available with 2, 3 or 4 door wings.

Enlarging the diameter and providing fully automatic operation increases the capacity and provides access for larger items such as suitcases and wheelchairs. Doors with diameters over 3400mm are equipped with folding door wings as standard, allowing them to be used as emergency escape doors.

Exceptional transparency

Circular Full Vision revolving doors are all designed and manufactured to order, ensuring an unrivalled level of attention to detail, quality and design flexibility. Using the very best materials and featuring a distinctive glass ceiling, these doors are designed both to impress and provide an energy efficient entrance to grace any building.

The principle characteristic of all Full Vision revolving doors is the impressive glass ceiling which provides exceptional transparency and allows the door to blend in with any architectural surroundings.

The Circular Full Vision is available with 2, 3 or 4 door leaves and with diameters up to 3100 mm. All sizes are available in manual, semi- or fully-automatic versions and can be supplied in heights in excess of 7 metres.

The internal construction is formed from stainless steel for maximum durability and this can be overlaid with a variety of materials to produce an outstanding finish.

Bespoke design

The bespoke manufacturing process allows the Circular Full Vision to be customised to exactly suit customer requirements; typical examples of this are;

- Exceptionally tall doors
- Custom dimensions to suit the building
- Single-piece glass ceilings and curved walls
- Custom framework and profile sizes
- All-glass doorset
- Sliding curved night doors to close off the open section when not in use (manual or automatic operation with drive concealed in the floor)
- Custom glazing options such as fritting, coloured interlayer and colour-changing LEDs
- Heaters integrated in the matwell
- Remote diagnostics
- Specially developed matting solutions
- Security function for out-of-hours activation by card reader etc (automatic version only)
- Bespoke façade connections

Attention to Detail and Quality

Circular Prestige revolving doors offer an unbeatable combination of custom design and attention to detail and quality. Using the very best materials and durable construction methods, these doors provide impressive, energy-efficient entrances to suit any building.

All Prestige revolving doors feature an internal stainless steel framework for maximum strength and durability, allowing a much greater range of sizes than with inferior aluminium framework. This framework can be overlaid with a wide variety of materials to produce an outstanding finish.

The Circular Prestige is available with 2, 3 or 4 door leaves and with diameters up to 3100mm. All sizes are available in manual, semi- or fully-automatic versions and can be supplied with heights in excess of 7 metres.

Bespoke design

The bespoke manufacturing process allows the Circular Prestige to be customised to exactly suit customer requirements; typical examples of this are;

- Exceptionally tall doors
- Custom dimensions to suit the building
- Single-piece glass or solid curved walls
- Coloured glass ceiling with LED back-lighting
- Custom framework and profile sizes
- All-glass doorset
- Sliding curved night doors to close off the open section when not in use (manual or automatic operation)
- Custom glazing options such as fritting, coloured interlayer and colour-changing LEDs
- Heaters integrated in the matwell or canopy
- Remote diagnostics
- Specially developed matting solutions
- Security function for out-of-hours activation by card reader etc (automatic version only)
- Bespoke façade connections

Nostalgia

Classical Antique Style

Circular and Prestige Nostalgia revolving doors offer the possibility to recreate the appearance of vintage entrances while using the very best modern materials and durable construction methods.

All Nostalgia metal revolving doors feature an internal stainless steel framework for maximum strength and durability. This framework can be overlaid with a wide variety of materials such as brass, bronze or coloured stainless steel or aluminium to produce an outstanding finish. Timber doors feature a combination of stainless steel framing and bespoke joinery.

The Circular Nostalgia is available in manual or automatic versions whereas the larger Royal Nostalgia is always automated, with drives concealed in the canopy or under the floor. Both are available in 2, 3 or 4 door leaf configurations. The Circular Nostalgia is available with diameters up to 3100 mm and the Royal Nostalgia with diameter over 3100mm.

Bespoke design

The bespoke manufacturing process allows the Nostalgia to be customised to exactly suit customer requirements; typical examples of this are;

- Wide range of specialist finishes
- Completely bespoke construction allows doors to match vintage entrances or contemporary individual designs
- Custom framework and profile sizes
- Custom glazing options such as fritting and coloured interlayers
- Heaters integrated in the matwell or canopy
- Remote diagnostics (on automatic versions)
- Specially developed matting solutions
- Bespoke façade connections
