

C/S Allway® Expansion Joint Covers

C/S Allway® Expansion Joint Covers

World Class Solution from a World Class Company.

The design of this magnificent building involved two International Architects, KPF the base build and client fit out by Gensler. The building comprises a 31-storey tower, rising alongside a 5-storey podium.

With different settlement rates for each building, and the tower having a smaller footprint, accommodation of three dimensional movements, where both buildings meet, was required.

Gensler also required the selected EJC to be capable of accepting sections of the same 40mm thick polished stone used for the floor finishes, into which the EJC would be incorporated. C/S were invited by Gensler to provide a suitable EJC solution.

After exhaustive discussions, one model was possibly identified whose performance appeared to meet the design and aesthetic requirements. Therefore, to prove the performance capabilities, it was decided to commission the C/S computerised test rig and subject the EJC to the full criteria required, which showed the joint to perform with 100% efficiency.

This is just another example of the worldwide responsible commitment, and technical capability, the C/S Group offers, to ensure that our EJCs accommodate building movement both aesthetically and technically.

C/S Allway – expansion joint covers you can trust.

Construction Specialties manufacture the most comprehensive range of expansion joint cover assemblies in the world, to accommodate every conceivable type of building movement. These systems range from modest cover plates to the most sophisticated fire rated joint cover assemblies available.

Selection Criteria

Key parameters for consideration in selection of movement joint covers:

- width of available structural gap/joint width
- range of movement/direction
- amount of movement
- finishes to be accommodated in joints (floor finish/wall finish)
- environmental considerations
- building's usage at EJC location re. loadings
- necessity for vapour barrier
- necessity for fire barrier

Technical Support

For assistance with technical and installation details, please contact our technical department.

For testing of complicated movement parameters our R&D facility is accessible.

C/S Allway® Expansion Joint Covers

Thinline Flush Seal™ Floor Joint Covers (Interior Joints to 50mm)

Series of surface mounted floor joint covers incorporating a dual durometer thermoplastic rubber gasket.

- Replaceable gasket
- Smooth, easy clean surface
- No blockout required

GFS

The easy to install surface mounted floor joint covers

GFSW

The floor to wall versions of GFS

GFPS

An alternative to GFS joint covers where the exposed aluminium frames are recessed to take a 5mm thick carpet or vinyl floor finish

GFPSW

The floor to wall version of GFPS

GFST

An alternative to GFPS joint covers where the carpet or vinyl floor finish butts up to the edge of the aluminium frames

GFSTW

The floor to wall version of GFST

Colours

Aluminium Sections - standard finish is clear anodise except for GFPS(W) models, where side frame is supplied mill finished. Other colours can be supplied subject to minimum quantity.

C/S TPR Gaskets – supplied in rolls up to 30 metres in length, in Black, White, Grey and Greige as standard (see general information page 34). Other colours can be made available, subject to quantity.

GFS-80. Thinline Flush Seal™ floor-to-floor joint cover.

Key for diagrams

- A. C/S TPR gasket
- B. Continuous extruded aluminium side frame with clear anodised finish (mill finished for GFPS(W) models)
- C. Fixing to suit substrate (by others), please refer to Product Data Sheet
- D. Continuous extruded aluminium wall frame with clear anodised finish
- E. Continuous extruded aluminium centre plate (mill finished)
- F. Floor finish

Specification Style

Supply and install 120 metres C/S Allway Thinline Flush Seal™ series floor to floor expansion joint cover, model ref: GFS-200, complete with Grey C/S TPR gasket.

Optional Clauses:

- i) Reflex Fire Barrier, to suit 50mm joint width and providing minimum 2 hours integrity and insulation when installed in accordance with manufacturer's instructions.
- ii) Vapour Barrier/Water Stop to suit 50mm joint width.

All manufactured and supplied by Construction Specialties (UK) Ltd, Conspic House, St Andrews Way, Bicester Road, Aylesbury, Bucks HP19 8AF
Tel: 01296 611000

C/S Allway® Expansion Joint Covers

Thinline Flush Seal™ Floor Joint Covers (Interior Joints to 50mm)

Series of 25mm and 50mm wide recess mounted floor joint covers incorporating a dual durometer thermoplastic rubber gasket, available in various frame depths

- Flush floor finish
- Replaceable gasket
- Smooth, easy clean surface
- Multi-directional movement

GFT

The standard embedded joint covers for floor joints up to 50mm wide, available in four frame depths. Can be fitted flush to the floor screed or left proud to butt up to a carpet or vinyl finish

GFTW

The floor to wall versions of GFT

GFTB

As the GFT but with a brass frame cap edging the gasket, available with 51mm deep frame only

GFTBW

The floor to wall version of GFTB

Colours

Aluminium Sections - mill finished as standard, except for exposed wall frames, which are supplied with clear anodised finish. Other colours can be supplied subject to minimum quantity.

C/S TPR Gaskets – supplied in rolls up to 30 metres in length, in Black, White, Grey and Greige as standard (see general information page 34). Other colours can be made available, subject to quantity.

GFT-200/20. Thinline Flush Seal™ floor-to-floor joint cover.

C/S Allway® Expansion Joint Covers

Twinline Flush Seal™ Floor Joint Covers (Interior Joints to 100mm)

Recess mounted floor joint covers incorporating dual durometer thermoplastic rubber gasket and an aluminium self-centring assembly retained in place by stainless steel spring clip.

- Flush floor finish
- Replaceable gasket
- Smooth, easy clean surface
- Multi directional movement

GFP

Floor covers with flush centre plate and dual C/S TPR gasket.

GFPW

The floor to wall version of GFP.

GFR

Floor covers with 3.2mm deep recessed centre plate to take a vinyl floor, bonded carpet or other insert.

GFRW

The floor to wall version of GFR.

GFRD

As GFR but with an extra deep (9.5mm) recess to take carpet or tiles.

GFRDW

The floor to wall version of GFRD.

Colours

Aluminium Sections - mill finished as standard, except for exposed wall frames and flush centre plates, which are supplied with clear anodised finish as standard. Other colours can be supplied subject to minimum quantity.

C/S TPR Gaskets – supplied in rolls up to 30 metres in length, in Black, White, Grey and Greige as standard (see general information page 34). Other colours can be made available, subject to quantity.

GFP-200. Twinline Flush Seal™ floor-to-floor joint cover.

C/S Allway® Expansion Joint Covers

Heavy Duty Floor Joint Covers (Interior/Exterior Joints to 100mm)

Specialised expansion joint covers for situations where the required loadings are far in excess of those normally encountered.

Twinline Flush Seal™ Heavy Duty Floor Joint Covers

GFP-HD

Heavy duty floor to floor covers for up to 100mm wide joints, which also allow some vertical shear movement.

GFPW-HD

Floor to wall version of GFP-HD

Heavy Duty Seal Floor Joint Covers

Recess mounted models

HO 50/40

Heavy duty floor to floor cover for 50mm wide joints

HO 50/40P

Floor to wall version of HO 50/40

HO 50/40PD

Similar to HO 50/40P but with an alternative, extended wall frame suitable for 65mm wide joints

Surface mounted models

RLO 50/31

Heavy duty floor to floor joint cover for 55mm wide joints

RLO 50/31P

Heavy duty floor to wall version of RLO-50/31

RLO 50/31PD

Similar to RLO 50/31P, but with an alternative extended wall frame, suitable for 70mm wide joints

Colours

Aluminium Sections – mill finished as standard, except for exposed wall frames and flush centre plates, which are supplied with clear anodised finish as standard. Other colours can be supplied subject to minimum quantity.

GFP-200HD. Twinline Flush Seal™ heavy duty floor-to-floor joint cover.

C/S TPR Gaskets (models GFP(W)-HD) – supplied in rolls up to 30 metres in length, in Black, White, Grey and Greige as standard (see general information page 34). Other colours can be made available, subject to quantity.

Flexible PVC Gaskets (models HO and RLO) – Black and Grey as standard.

HO-50/40. Heavy Duty Seal floor-to-floor joint cover.

RLO-50/31. Heavy Duty Seal floor-to-floor joint cover.

GFPW-200HD. Twinline Flush Seal™ heavy duty floor-to-wall joint cover.

RLO-50/31PD. Heavy Duty Seal floor-to-wall joint cover.

Key for diagrams

- A. C/S TPR gasket
- B. Continuous extruded aluminium side frame (mill finished)
- C. Fixing to suit substrate (by others), please refer to Product Data Sheet
- D. Continuous extruded aluminium centre plate with clear anodised finish
- E. Continuous extruded aluminium wall frame with clear anodised finish
- F. Non-shrink self levelling bedding compound (by others)
- G. 50mm wide stainless steel spring clips @ 450mm centres
- H. Floor finish
- I. Flexible PVC gasket (EPDM gasket optional)
- J. Continuous extruded aluminium wall frame (mill finished)

Specification Style

Supply and install 54 metres C/S Allway Twinline Flush Seal™ heavy duty floor to floor expansion joint cover, model ref: GFPW-200HD, complete with Grey C/S TPR Gasket.

Optional Clauses:

- i) Reflex Fire Barrier, to suit 50mm joint width and providing minimum 2 hours integrity and insulation when installed in accordance with manufacturer's instructions.
- ii) Vapour Barrier/Water Stop to suit 50mm joint width.

All manufactured and supplied by Construction Specialties (UK) Ltd, Conspec House, St Andrews Way, Bicester Road, Aylesbury, Bucks HP19 8AF
Tel: 01296 611000

C/S Allway® Expansion Joint Covers

All Metal™ Floor Joint Covers (Interior/Exterior Joints to 100mm)

All Metal™ recess mounted floor joint covers are designed to accommodate up to 100% horizontal movement of the joint width. Vertical movement is engineered to allow for non-aligning opposing slabs.

Standard Models

ALS

Floor joint covers utilising a free-floating centre plate held in position by serrated aluminium cover plates snap-locked into aluminium frames.

ALSW

The floor to wall version of ALS

ALSM

The new to existing version of ALS

ALX

Floor covers incorporating stainless steel centre plate and cover plates

ALXW

The floor to wall version of ALX

Heavy Duty Models

AL-HD

Heavy duty floor joint covers for up to 100mm wide joints

AL-HDC

AL-HD with secondary centre plate for areas where trolley traffic is prevalent.

ALW-HD

The floor to wall version of AL-HD

ALM-HD

The new to existing version of the AL-HD

Colours

Aluminium sections are mill finished as standard, except for centre plate and cover plates on ALS/W models which are supplied with clear anodised finish. Centre plate and cover plates for ALX/W models are in dull polished stainless steel as standard. Other colours can be supplied subject to minimum quantity.

ALS-200. All Metal™ floor-to-floor joint cover.

C/S Allway® Expansion Joint Covers

Twinline Large Span Floor Joint Covers (Interior/Exterior Joints to 250mm)

Twinline Large Span floor joint covers are designed to span structural joints ranging from 100mm to 250mm.

- Totally flush finish
- Self-centering centre plate

SSR

Large span floor joint covers suitable for interior and exterior applications. Recessed centre plate capable of accepting up to 38mm deep marble, granite or limestone slabs, making the joint minimally visible.

SSRW

The floor to wall version of SSR

SGR

Large span joint with twin C/S TPR gaskets and a recessed cover plate to allow a flush floor finish

SGRW

The floor to wall version of SGR

SGP

As the SGR but with a plain cover plate. Optional bronze anodised or stainless steel cover plate.

SGPW

The floor to wall version of SGP

Colours

Aluminium sections – mill finished as standard, except for SGP models centre plate, which is supplied with clear anodised finish as standard. Other colours can be supplied subject to minimum quantity.

C/S TPR Gaskets – supplied in rolls up to 30 metres in length, in Black, White, Grey and Greige as standard (see general information page 34). Other colours can be made available, subject to quantity.

SSR-400. Twinline Large Span floor-to-floor joint cover.

SGR-400. Twinline Large Span floor-to-floor joint cover.

Specification Style

Supply and install 42 meters C/S Allway Twinline Large Span floor to wall expansion joint cover, model ref: SGRW-800.

Optional Clauses:

- i) Multiflex Fire Barrier, to suit 200mm joint width and providing minimum 2 hours integrity and insulation when installed in accordance with manufacturer's instructions.
- ii) Vapour Barrier/Water Stop to suit 200mm joint width.

All manufactured and supplied by Construction Specialties (UK) Ltd, Conspec House, St Andrews Way, Bicester Road, Aylesbury, Bucks HP19 8AF. Tel: 01296 611000

SSRW-400. Twinline Large Span floor-to-wall joint cover.

C/S Allway® Expansion Joint Covers

All Metal™ Large Span Floor Joint Covers (Interior/Exterior Joints to 250mm)

All Metal™ floor joint covers designed to span structural joints ranging from 100mm to 250mm. All floor-to-floor joints are working on a rotating centre-pivot design allowing up to ±50% horizontal movement of the working joint width.

- Self-centering centre plate with stainless steel turnbar assembly
- Bronze and stainless steel covers available

Standard Models

SJP

Aluminium floor joint covers with a cover plate sitting over a standard floor finish

SJPW

Floor to wall version of SJP

SJPF

Aluminium floor joint covers with a flush fitting cover plate

SJPFW

Floor to wall version of SJPF

Heavy Duty Models

SJ-HD

Heavy duty version of SJPF series

SJW-HD

Floor to wall version of SJ-HD

Colours

Aluminium sections – mill finished as standard, except for exposed surfaces on standard models, which are supplied with clear anodised finish. Other colours can be supplied subject to minimum quantity.

SJ-400HD. All Metal™ Large Span heavy duty floor-to-floor cover.

C/S Allway® Expansion Joint Covers

Parking Joints and Elastomeric Seals

C/S Group offers a complete line of expansion joint covers that meet the demanding movement conditions found in parking structures.

CSS

Series of compressions seals complete with extruded aluminium support frames

ZB

One-piece EPDM compression seal with integral nosing that zips instantaneously into concrete blockouts once the epoxy bed is applied. The system is fast, neat and installs over green concrete.

KB

Series of joint covers featuring the patented turnbar housing which reduces lateral load damage. Special design of the centre plate offers maximum strength yet minimal interference with pedestrians.

KBW

Floor to wall version of KB

PTC

The design of this joint cover allows for significant deflection of the adjacent floor slabs and a variable rotation damper system prevents the cover plate from "flapping" noisily under traffic loads. The centre plate is fully interchangeable.

PTCW

The floor to wall version of PTC

Colours

Compression seals typically black. Other colours available subject to minimum quantity. Aluminium sections are mill finished as standard. PTC model – centre plate mill finished aluminium as standard, steel option available.

PTC-600. Large Span Parking floor-to-floor joint cover.

C/S Allway® Expansion Joint Covers

Thinline Flush Seal™ Wall and Ceiling Joint Covers (Interior Joints to 100mm)

Thinline Flush Seal™ wall/ceiling joint covers feature an easily replaceable, co-extruded C/S TPR Gasket, which has been designed to remain flush and in place during the entire movement cycle. Both surface and recess mounted models are available.

- Flush wall and ceiling finish
- Replaceable gasket
- Smooth, easy clean surface
- Multi directional movement

FGFS

Surface mounted expansion joint covers suitable for most types of wall construction

FGFSC

The corner, or wall to ceiling versions of FGFS

FWF

Standard flush finish recess mounted expansion joint covers for dry lined walls

FWFC

The corner, or wall to ceiling versions of FWF

FWFP

Similar to FWF, but designed for use with plaster finished walls

FWFPC

The corner, or wall to ceiling versions of FWFP

Colours

Aluminium sections are clear anodised as standard for surface mounted models and mill finished for recess mounted models.

Other colours can be supplied subject to minimum quantity.

C/S TPR Gaskets – supplied in rolls up to 30 metres in length, in Black, White, Grey and Greige as standard (see general information page 34). Other colours can be made available, subject to quantity.

FWF-100. Thinline Flush Seal™ wall-to-wall joint cover.

C/S Allway® Expansion Joint Covers

Large Span Wall Joint Covers (Interior and Exterior Joints to 250mm)

SGW

Series of interior wall joint covers featuring C/S TPR Gaskets, designed for large wall joints where a flush finish is required. The aluminium faced centre plate can be painted or covered for maximum concealment.

SGWC

The corner version of SGW

SC

These 'concertina' type profiles incorporate primary and secondary seals and have no exposed fasteners. Heat welded weather tight transitions and primary seals containing UV inhibitors, to prevent embrittlement and fading, making them especially suitable for exterior applications.

Colours

Visible aluminium sections - standard finish is clear anodise. Other colours can be supplied subject to minimum quantity.
C/S TPR Gaskets – supplied in rolls up to 30 metres in length, in Black, White, Grey and Greige as standard (see general information page 34). Other colours can be made available, subject to quantity.

SC series – primary seals are black as standard, special colours available subject to quantity.

C/S Allway® Expansion Joint Covers

Rigid Joint Strips for Walls and Floors (Interior Joints to 100mm)

W series of rigid strips is an attractive and easy-to-fix system for covering wall and floor joints.

Rigid strips are available in:

- Aluminium Alloy 6060 T5; clear anodised as standard (powder-coated upon request)
- PVC: compound suitable for outside use.
Available colours: White, Grey, Sand and Brown.
- Brass: CuZn40Pb 1 Al alloy, polished.

Joint strips are supplied in 3 metre unit lengths as standard with all the necessary fastening accessories.

Fastening using stainless steel clips, with an exception of models W120, W140 and W160, which should be fixed with screws and plugs.

Rigid Joint Strip

Clip 15-35 for joints 15 to 35mm wide with minimum depth of 40mm

Clip 35-80 for joints 35 to 80mm wide with minimum depth of 60mm

Application	Joint Width Range (mm) min-max	Model	Aluminium	PVC
Flat Wall	up to 15.0	W30		
Flat Wall	15.0-35.0	W5		
Flat Wall or Floor	35.0-50.0	W70

Corner Wall or Corner Floor	35.0-45.0	W70A		
Corner Wall or Corner Floor	40.0-60.0	W90A		

* Brass versions available

** Suitable for corner wall applications only

C/S Allway® Expansion Joint Covers

Fire Barriers

Fire is an ever-present danger. The 'chimney effect' created by an unprotected expansion joint may actually advance its spread.

Construction Specialties' two fire barrier systems are available to cover all building regulation requirements, whilst ensuring that performance is maintained during any building movement.

C/S Reflex Fire Barrier Systems

- Suitable for floors and walls
- Floor joint widths 25-100mm
- Wall joint widths 25-50mm
- BS 476: Part 20: 1987 tested
- ANSI/UL 2079 and ASTM E1966 tested for a 2-hour rating

C/S Reflex Fire Barriers utilize pre-engineered, fibreglass composite insulation assemblies and stainless steel foil heat shields. The wall systems are applicable to both drywall/stud and masonry wall conditions.

Each Reflex system has met ANSI/UL 2079 and ASTM E1966 testing requirements for a 2-hour rating including cycling capabilities of $\pm 50\%$ horizontal movement. Lateral shear movement of $\pm 25\%$ can also be accommodated.

C/S Multiflex Fire Barrier Systems

- Suitable for floors and walls
- Floor and wall joint widths 25-500mm
- BS 476: Part 20: 1987 tested
- ANSI/UL 2079 and ASTM E1966 tested for a 1-hour and 2-hour rating

These systems utilize pre-engineered, ceramic blankets, ceramic papers, stainless foil and screen. Each Multiflex System has met ANSI/UL 2079 and ASTM E1966 testing requirements for a 1-hour and 2-hour rating including cycling capabilities of $\pm 50\%$ horizontal movement. Lateral shear

GFT-200/20. Thinline Flush Seal™ floor joint cover with reflex fire barrier to suit 50mm joint width.

movement of $\pm 50\%$ can also be accommodated, along with a vertical deflection of $\pm 50\text{mm}$.

C/S Fire Barrier systems can be installed more easily and in much less time than most conventional fire barrier systems. This is due to the simple components that make up the systems, and because no fire caulks or complicated and expensive transition miters are required for installation.

Construction Specialties Fire Barrier Systems have been manufactured and tested to provide optimum fire protection when properly installed in the intended environment.

However, no amount of testing can guarantee a 2-hour rating in every application. For that reason we urge you to contact us direct or to contact your local C/S representative for selection assistance during the initial stages of project development.

BS 476: Part 20: 1987 tested

C/S Allway® Technical Information

Loading

With the exception of heavy duty models and some parking deck covers (for point loads up to 907kgs) all joints are typically designed to withstand normal pedestrian traffic (for loads up to 227kgs). For any other loading requirement we strongly recommend consultation with our Technical Department. Installation must be in accordance with the instructions supplied with materials.

C/S TPR (Thermoplastic Rubber)

Gasket - Physical Properties

Brittle Temperature: -39.5°C

Flame Test: Self Extinguishing

For information on C/S TPR Gasket's chemical resistance please contact us on 01296 611000.

Installation recommendations

Bedding

It is normally necessary to apply non-shrink, self-levelling bedding compound on top of concrete floor slabs in order to provide a level, even and structurally sound base over the entire width and length of the expansion joint cover base frame.

Fixings

Fixings for any expansion joint cover system will inevitably tend to be close to the edge of the concrete floor slab. It is therefore essential that any fixings used should not exert an excessive sideways force, which might fracture the concrete along the side of the floor slab.

Production Design

The company reserve the right to make design changes for the purpose of product improvement, or to withdraw any design without notice.

Stock

Stock is held in lengths of 3metres. Custom lengths are available to special order. To check stock please call 01296 611000.

Colours

Aluminium sections are supplied mill finished as standard, with the exception of exposed aluminium covers and frames which are generally supplied clear anodised.

Coloured anodising or powder coating is available as special option, subject to minimum quantity.

Stainless steel sections are supplied dull polished as standard.

Standard C/S TPR Gaskets are available in: Black White Grey Greige.

Samples

Available from your local C/S representative or C/S direct.

C/S Advisory Service

Construction Specialties representatives are fully trained and experienced in all aspects of

specification and installation and can offer expert advice if required.

Warranty Policy

Construction Specialties (UK) Ltd (the Company) warrants to its customers that all expansion joint covers sold by it will be free from any defects in materials and workmanship and will meet the design criteria noted in our detail manual when properly applied and installed. If, in the sole opinion of the company, a product covered by this warranty is defective the company will replace or repair it free of charge. This warranty shall extend for a period of one year following the date of shipment by the company. This is in lieu of all other warranties expressed or implied and is the sole warranty extended by the company. The liability of the company under this warranty is limited to repair or replacement and does not include any responsibility for consequential or other damage of any nature.
