Dear Sir or Madam

nora floorcoverings are known worldwide for their adaption into large projects within the healthcare sector, and our new reference, Werneth Health Centre was no exception to this. Approximately 2,000m<sup>2</sup> of nora rubber was installed into the health centre as an economical choice for the environmentally friendly building. Please view our new reference report to learn how nora rubber floorcoverings worked with the design of the building and the patients using the facilities to provide a new health centre for the Oldham area.

May will see the launch of our new product noraplan<sup>®</sup> sentica. Comprised of 38 vibrant new colours the concept behind the floorcovering is to combine all the positive functional characteristics of a rubber floorcovering; such as long life and comfort with the sophisticated design aspirations of international architects. Please click the link below to explore our new feel-good floor noraplan<sup>®</sup> sentica.

This month we introduce nora system blue, a key factor which contributes to making us feel good in buildings through good indoor air quality. The theme of healthy living is increasingly gaining in emphasis. The quality of indoor air can be primarily determined by the choice of building materials. Capitalising on nora's Blue Angel certification for low voc's we are now able to offer a comprehensive system incorporating adhesives, screeds and dpms all carrying the Blue Angel environmental award. With nora rubber floor coverings installed with nora system blue you can be assured of positively contributing to indoor environment and thus protecting the health of all concerned. nora system blue, has everything you need to successfully and sustainably complete your floorcovering installation, click the link below to discover in more depth about the nora system blue.

Following this nora have also introduced our own specially engineered cleaning pads. Completely solution free it offers an exceptionally clean and hygienic finish to the floor. The nora pad cleaning system is unsurpassed with regards to its economically and environmental impact to cleaning.

nora run a comprehensive approved installation course. To compliment this – Installation and cleaning videos for both our noraplan<sup>®</sup> and norament<sup>®</sup> floorings are now available on youtube. Click on the link below to view our technical experts' specialist tricks and step-by-step guide through installing and cleaning nora rubber floorcoverings.
