

Make Flooring Less Boring with Syncros!

Entrance matting systems can be an important part of interior design as well as providing a functional means of foot borne dirt and moisture collection.

With the huge number of visitors experienced by shopping centres, entrance matting has to stand the test of all kinds of foot borne dirt and moisture. But just because the flooring needs to be functional, doesn't mean it has to be boring. Get creative with your matting and make an entrance!

With Syncros Entrance Matting Systems, an eye-catching floor design needn't come with a designer price tag. As one of the UK's leading specialist suppliers and installers of entrance matting, Syncros uses products from award-winning supplier, Milliken to provide practical and hardwearing floor coverings that will look good for years, no matter what comes their way.

Milliken Obex Forma™ tiles are available in a range of colours, carefully chosen by Syncros to make maximum impact while also concealing dirt. Moisture-retaining textile inserts made of multi-filament polyamide fibres work in tandem with tough scraping mono-filaments to remove foot borne debris. The choice of colours means

that there is something to co-ordinate with all interior designs.

The modular tiles can be placed in most configurations over any size or shape of floor area. See how your colour scheme could look by designing your own entrance matting at www.syncros.co.uk/dyo. Milliken

Obex Forma™ tiles are readily stocked at Syncros for swift delivery. Fitting is simple since tiles can be trimmed to size with a safety knife before connecting to adjacent tiles. Use your own contractors or Syncros' experienced team of technicians for installation.

Once the matting is fitted, there is absolutely no need to worry about the colours staying bright and vibrant. Milliken Obex Forma™ has excellent wash and light fastness properties, backed by a 5-year guarantee and maintenance is straightforward with the usual carpet cleaning systems.

Should there ever be need to replace a

damaged area, this can be carried out easily and cheaply by colour matching and replacing the necessary tile(s) without lifting the entire matting.

"Even small changes can help to make the shopping experience more enticing," says John Morgan, General Manager at Syncros Entrance Matting Systems.

"Injecting a bit of colour into your flooring scheme won't make any difference to the cost or performance but might make all the difference to customers who decide to shop somewhere more welcoming."

To get a closer look at all of Syncros' flooring products, visit the Shopping Centre Management Conference later this year.
