

## FRANK ALLART ~ BRONZE & ANTIQUE BRASS

FRANK  
ALLART

Frank Allart has been producing high quality brass and bronze hardware since 1914. A move in 1995 to a purpose built factory in the heart of Birmingham consolidated their position as one of the UK's top manufacturers. Their reliability, quality, eye for innovation and wide choice of finishes has made it easy for TBKS to stock their products and recommend them to architects, designers and contractors for quality refurbishment projects.

Polished Bronze  
**PGM**

Polished Bronze (tarnished)  
**PGM**

Antique Bronze (RBMA)  
**RB**

Rustic Bronze (sand cast)  
**RUX**

Imitation Bronze (Oil rubbed bronze)  
**IB**

Antique Brass  
**AB**

The knobs above illustrate the brass and bronze options available. Polished bronze (PGM) possesses a bright coppery look reminiscent of "old time brass". To the right is an example of this once tarnished. This will take months, possibly years depending upon use. The Antique Bronze is very dark but again possesses a polished lustre whereas the Rustic Bronze has bypassed the polishing process for a slightly cruder look. Both the Imitation Bronze and Antique brass knobs have been coloured with a paste, which after many years of use will wear to reveal a soft brass patina beneath.

### Frank Allart Finishes Key:

**All Allart Finishes** = PGM - RB - RUX - IB - AB - PB - UNL - CP - SCP - NP - SNP

**All Allart Finishes not Bronze** = IB - AB - PB - UNL - CP - SCP - NP - SNP

See front page for full details on all finishes and how to order.

## FRANK ALLART ~ POLISHED BRONZE (POLISHED GUN METAL - PGM)

Polished bronze (PGM) with its bright coppery lustre is quite different to the bright golden look of brass. Supplied unlacquered polished bronze can either be left to tarnish naturally or be kept sparkling bright with regular polishing. The slight flaws from the sand cast process only enhance the quality feel of these fittings.

This item shows a polished bronze that has tarnished.

Code	AV070	AV068	AV069	AV074

Octagon Knobset

Hinges can be supplied with an Imitation Bronze finish as shown. Ideal to colour match bronze door furniture. All sizes available. See hinges on page's 95-97

See front pages for full details on all finishes and how to order.

By using the traditional method of pouring molten bronze into sand casted moulds Frank Allart have succeeded in recreating a centuries old appearance that will become more beautiful with time and use.

Many hands on processes such as finishing and polishing bring about the iridescent patina of Real Bronze. However some casting flaws may remain again lending to the quality and charm of these well-crafted pieces. Given they are made to order a four-week lead-time is required.

# FRANK ALLART ~ RUSTIC BRONZE (RUX)

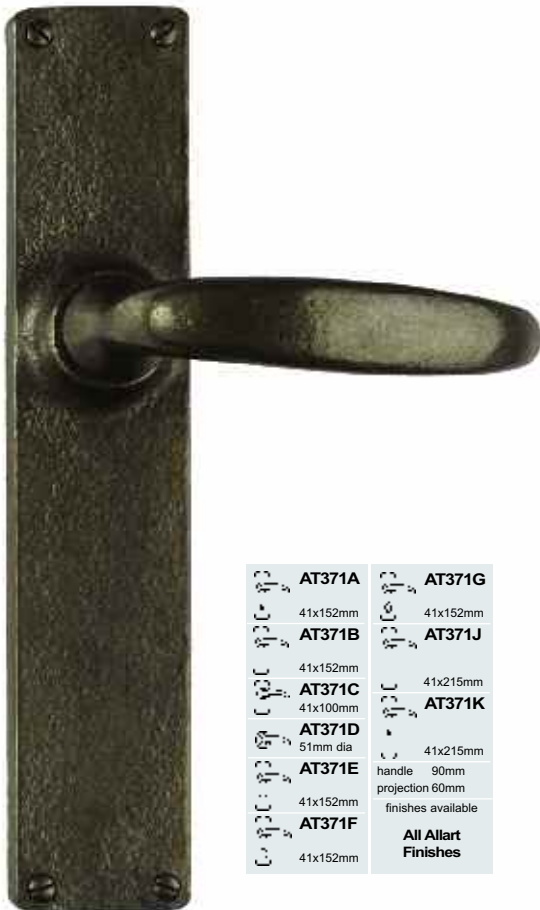

Code **AX015**  
 Size o/a 205x55mm  
**All Allart Finishes**  
 Old Doctors Knocker

The Rustic Bronze range from Frank Allart is completely non-ferrous, even the springs and washers are stainless steel, making it perfect finish for external doors. By removing the finishing process during manufacture Frank Allart generate a rough texture on the products surface. Consequently these contrived imperfections provide an alternative to the picture perfect appearance of their real bronze range. Again a four-week lead-time is necessary. A complete suite of Rustic Bronze is available including bolts, window fittings and light switches. Please ask for details.

Each piece is hand finished and designed to reflect a matured brass patina that one would usually wait years for. The base material here is brass that might be either hot stamped or sand cast. Quite often Frank Allart will combine components from both techniques to ensure the robustness and aesthetic qualities of each piece are satisfied. Always supplied unlacquered please allow a four-week lead-time for delivery. A complete suite of Allart Deco is available including bolts, accessories and light switches. Please ask for details.

FRANK ALLART ~ IMITATION BRONZE (IB)

Imitation bronze is produced in a very similar manner to the Antique Brass for similar reasons. Frank Allart take a brass base, apply a brown paste then bake it to recreate a real bronze appearance for two-thirds the cost of real bronze (RB). This stable finish will, after the passage of time, tone down and reveal a softer lighter lustre. We supply IB unlacquered to minimise the maintenance. Please allow a four-week lead-time for delivery.
