HOME STEAM SOLUTIONS

SAUNA360

HELP PEOPLE LIVE BETTER

Home Steam Solutions

Sauna360 Ltd is part of the global Sauna 360 Group, owned by Masco Corporation. We proudly supply world renowned Amerrec steam generators, manufactured in our Cokato, Minnesota facility, where we've been producing steam solutions since 1963.

THE STEAM TECHNOLOGY EXPERTS

A longstanding leader in steam technology, Amerrec was the first in the industry to introduce computer controlled element switching, wireless controls, and touchscreen interfaces.

Known for quality, reliability, and luxury in both residential and commercial environments, Amerrec has become the preferred choice across the UK market — supported by an industry leading 5 year domestic warranty.

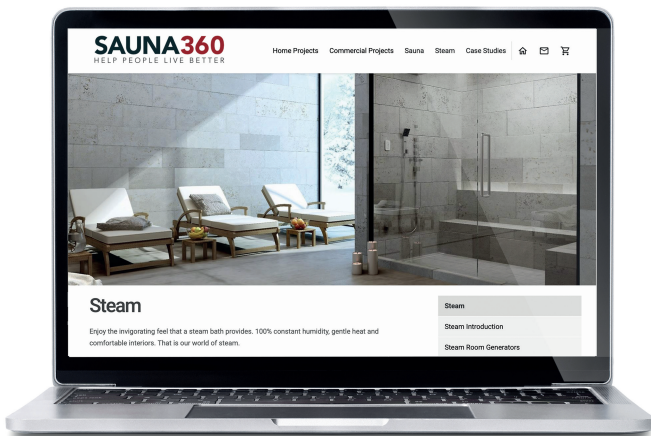

Our industry leading warranty

Our Steam room equipment is designed to last. We provide an industry leading 5 year warranty on all domestic steam products.

Escape the noise soothe your soul

Let us help you create a sanctuary of warmth and tranquillity in the comfort of your own home. Whether starting your morning with a 10-minute revitalizing session or winding down in the evening, you can transform your daily routine with the ultimate luxury of a home steam shower.

Discover the healing power of steam...

Skin Care and Detox

Opens pores and removes toxins for smoother, healthier skin,

Respiration

Steam can temporarily provide congestion relief and help clear, soothe and hydrate the airways.

Mindfulness and Wellbeing

Relieves stress, promotes relaxation and supports mental rejuvenation.

Restful Sleep

Helps naturally regulate body temperature for restful a sleep.

Circulation

Encourages natural blood flow, leaving you feeling refreshed and energised.

BESPOKE TOUCHES

Personalise your experience with custom lighting, sound, and fragrance to suit your mood. Our network of trusted retailers can support you from purchase through to aftercare with our dedicated in-house team of steam professionals on hand for any questions you may have. You can also visit our website for expert advice, essential components, and tips to create your personal wellness retreat.

Latest projects

Residential & Commercial

We have been providing bespoke sauna, steam and infrared solutions to residential and commercial properties across the UK since 1990. Renowned for working with some of the country's top architects and interior designers, Sauna360 has unrivalled experience in developing spectacular wellness suites in homes, gyms, spas, hotels and leisure clubs. Read on for examples of our latest projects:

RESIDENTIAL

New basement Wellness Suite with Bespoke Steam Room

Following the current trend for basement installations, this client had an interesting twist; a large underground area was to be created under the rear garden. Designed to house the client's beautiful motor cars, there was still plenty of room to include an opulent, huge swimming pool and generously sized sauna and steam room with shower between.

Both rooms were designed with a U shaped seating, emphasising the great social occasion of heat bathing with

clear glass fascias providing a wide view of the pool and client's stunning décor including a feature faux-living wall.

The bespoke steam room was lined in beautiful pearl green mosaics to echo the pool finish. Yet another angle on how to introduce a wellness feature at home, all beautifully presented and a project in which Sauna360 were proud to play our part!

COMMERCIAL

Old Street Spa, Ironmonger Row Baths, Islington

The original Ironmonger Row Baths site was built in the 1930s with a swimming pool and traditional style bathing house of hot rooms and cold plunge in the basement. These facilities were completely upgraded in 2012 with saunas and steam rooms added. In January 2022, the basement spa was destroyed by a fire. A complete restoration of the area was required and Sauna360 UK was honoured to be commissioned to design and install all wellness areas.

Set in one of London's oldest Turkish Baths, the award-winning, Old Street Spa is now one of the best thermal wellness locations in the UK featuring saunas, aroma steam rooms, Turkish Baths (Tepidarium, Caldarium and Laconium), Ice Fountains, Monsoon showers, bucket shower, plunge pool, Hammam and relaxation lounge.

Steam generator

The heart of a steam shower

The AK steam generator model is the latest in the Amerrec line, following a long tradition of reliable, easy to operate and long lasting steam products.

Steam Generator

Although unseen the steam generator is the heart of a Turkish Steam Bath so it's important to use the best. Amerrec has been producing generators for homes and health clubs for more than 30 years – a natural development of our famous sauna heaters originating from the early 1950s. We build without compromise!

Should attention ever be required – within the 5-year warranty and beyond – Amerrec engineers and genuine parts are always available to keep your steam room in service.

Steam generator dimensions: 419 x 159 x 380mm (WxDxH)

Minimum space needed to house the generator safely to allow for servicing: 650 x 250 x 600mm (WxDxH)

Features & Benefits

- **Eco Steam** – The Amerrec Steam Generator uses full power to quickly heat your steam shower to the desired temperature and then reduces power by up to 2/3 of its heating elements resulting in a more consistent flow of steam, stable room temperature and reduced energy costs for you.
- **Any size room** – Available in 6 popular sizes - 4.5kW, 6kW, 7.5kW, 9kW, 11kW and 14kW. Large or small your room can be transformed into a steam room. Larger spaces can use more than one steam generator “ganged” together.
- **Single or three phase** – Generators up to 11kW can be connected for single or 3 phase. 14kW is 3 phase only.
- **High quality components** - Stainless Steel tank and water probes means years of trouble free service.
- **Unique Steam Outlet Head** – Our unique and sought after Comfort Flo steam outlet head, in chrome finish, is included in all packages. An upgrade is available in 5 extra finishes to match your bathroom décor.

Control options

There are 3 control options available to use with the new Amerrec AK Steam generator to suit all preferences. Made in our US factories and built to the highest specification, these new state-of-the-art controls offer the latest in steam room technology.

K2 Touch Screen Control

Operate your steam bath from anywhere via the dedicated mobile app! K2 has a modern design and is simple to use with its clear display indicating temperature and run time. K2 can be mounted inside or outside of the steam room for ease of use.

- **Touchscreen Control** – easy operation at the swipe of your hand.
- **Surface mounted** – inside or outside the steam room.
- **Pick your finish** – choice of six finishes – polished chrome comes as standard or upgrade to brushed nickel, polished nickel, oil rubbed bronze, matte black or brushed bronze.
- **Intuitive display** – time/temp/lighting/system status.
- **24 hour time delay** – with a 60 minute timer.
- **Light Control** – on/off dimmer and colour selection if purchasing the dedicated AK lighting kit.
- **WiFi Control** – mobile app functionality from anywhere there is WiFi and/or mobile service.
- **Android and iPhone compatible** – via the dedicated SaunaLogic app.
- **Google Home, Alexa and Siri compatible**
- **Over the air (OAT) technology** – allows automatic software updates to mobile devices.

SAUNALOGIC MOBILE APP

K2 ALLOWS YOU TO CONTROL ALL STEAM FUNCTIONALITY FROM THE SAUNALOGIC MOBILE APP!

Personalize your experience with custom lighting, sound, and fragrance to suit your mood. Our network of trusted retailers can support you from purchase through to aftercare with our dedicated in-house team of steam professionals on hand for any questions you may have. You can also visit our website for expert advice, essential components, and tips to create your personal wellness retreat.

Instant Control

at your fingertips

Amerrec controls give you complete control over your steam experience allowing you to easily control your power and steam shower settings.

KT3 Control

A neat and compact black, glass faced control with 3 buttons, allowing simple intuitive setting of important functions - on/off, run time setting and temperature. The generator can be set on installation to provide either maximum 60 minutes (recommended) or 24 hour run time.

This control has a built-in temperature sensor so there is no need to fit a separate unit. Should you want to activate the steam remotely, from outside the room, you can add K4 Control (purchased separately).

PLEASE NOTE: KT3 will only work when installed inside the steam room - for other locations, choose the K2 Control.

K4 ON/OFF Non-Thermostatic Control

Matching the KT3 control, K4 is optionally available to allow turning the steam on and off from outside the steam room.

This basic on/off 30 minute control is perfect for those who like simplicity.

Autodrain option

An AK generator should give years of service with minimal maintenance. It is however important that the steam tank in drained periodically (at least monthly) to flush the tank and clear any scale.

A manual drain valve (lever tap) is included in the standard package. If the location for the generator would make access difficult for draining, an optional autodrain system should be specified.

Always add the autodrain option if the generator will be connected via a water softener.

Colour Options

and upgrades

The ComfortFlo™ steam head is sleek yet powerful. The steam heads and controls are available in a variety of finishes to match your bathroom hardware and design.

COMFORT FLO OUTLET

All AK steam generator models are supplied as standard with a chrome Comfort Flo steam outlet head. Sited at low level in your steam shower, this is designed to give an even spread of steam throughout the room and has a small recess on top to use fragrance for aromatherapy.

Optional upgrade available to change the finish of your outlet head. See below.

PLATING OPTIONS FOR COMFORT FLO OUTLET HEAD AND BACK TRIM

All controls are designed for surface mounting. K2 control includes a Chrome Back Trim to match the standard Chrome Comfort Flo Outlet. There are five alternative finishes available as optional extra; Polished Nickel, Brushed Nickel, Oil Rubbed Bronze, Brushed Bronze and Matte Black.

Note: Back trim is not available for KT3 or K4 control.

AK Lighting System for K2 control

set your mood

Chromotherapy lights use LED technology to emit specific colours designed to balance physical, emotional, and mental energy.

CHROMOTHERAPY

Chromotherapy – colour lighting – is becoming popular to create different atmospheres during steam bathing, particularly in conjunction with aromatherapy. The dedicated AK light system is controlled exclusively by K2 control. Two LED downlights with brushed steel bezels can be set as standard white room lights or bathe the room in any of six colours with a setting for sequential colour change, every minute.

There is a four-stage dimmer and extra button to control other functions – extra lights, external fan etc.

There is also an option to add up to 6 more lights for larger steam rooms. The lighting can also be controlled remotely on your Smart Phone via the Amerec Saunalogic app.

| LIGHTING | | |
|---------------|--|-------|
| Order Code | Description | Price |

Music and Speakers

for your steam room

MP3 Radio

Enjoy your favourite sounds in the steam room! This MP3 Radio driver with fan cooling can be hidden in a vanity unit or cupboard and provide music from several sources: MP3, FM radio (subject to signal), wired auxiliary, or apps on your smartphone via the built in Bluetooth. Control is provided by a discrete touch panel protected to IP66, safe for use in steam or shower environment. With outputs for up to four 35watt speakers, the driver is easily paired with our steam proof units below.

Steamproof speakers

Experience good quality stereo sound with these 35 watt RMS paired speakers. With a compact 165mm diameter, these units can be neatly sited in the tiled wall, fully protected against the humid environment to IP 35 rating. Simply wire back to a suitable hifi system or our MP3 Radio driver above.

Available in White or Black finish.

Aroma Systems

and essences

Aromatherapy is a complementary, plant-based therapy using concentrated essential oils via inhalation to enhance physical and emotional well-being. Popular for reducing stress, anxiety, and improving sleep.

Aroma Systems & Essences

The use of fragrance is another way to vary the effect of steam on the senses from calm reflection to stimulation. Try Amerec's gift box set of 5 popular essences – a few drops on the outlet transform the steam bath!

For the ultimate in luxury and sophistication, the auto essence doser keeps the steam room charged with your favourite scent to the intensity chosen. Nothing to set or control, just sit back and enjoy!

Steam seating

In smaller steam showers, where space is too restricted for purpose built seating, Amerec's fold up seats are a great alternative – simply fold to the wall to allow room for showering after steam. Available in elegant, warm teak wood.

| Order Code | Description | Price |
|--------------|--|--------|
| AROMA 5 | A selection box of 30ml essences in different fragrances to drop on the steam outlet head. Scents: winter dream, citrus, oriental, eucalyptus, spruce. | £59.50 |
