Static Bollard Solutions Are Moving Forward With ATG Access

The ATG Access range of static bollards leads the way forward. Unobtrusive, aesthetically pleasing and incredibly strong, they provide a genuine deterrent and are ideal for applications where a permanent pattern of control is required.

With a variety of individual designs, materials and eye-catching finishes to choose from, you can rely on ATG Access static bollards and street furniture to integrate seamlessly with all modern streetscapes and architectural styles.

ATG Access The Nation's Favourite Bollard Systems

As the UK market leader in bollard systems, ATG Access are helping to revolutionise the area's of traffic management, access control and security. Our dedication to creating innovative products is matched only by our commitment to providing the highest quality customer care and support service.

Part of The UK Landscape

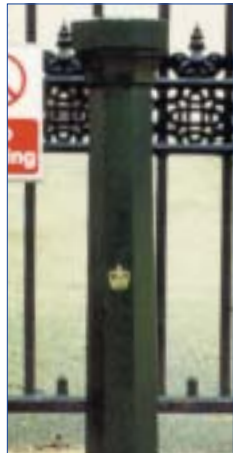

We offer a variety of bespoke static bollard designs in a range of materials and aesthetically appealing finishes as partnered with English Heritage at Somerset House and Crown Estates for Kensington Palace. We ensure that our systems will integrate seamlessly with all modern streetscapes and architectural styles, whilst providing a visual deterrent and an impassable obstacle for unauthorised drivers.

For A Range Of Applications

Static bollards are ideally suited for pedestrianisation schemes and other local authority projects, retail, commercial and industrial areas as a defence against ram raiders, providing protection in particular for garage forecourts, shop fronts or domestic parking areas.

Easy to Use. Easy to Install.

The systems are also surprisingly easy to install. Just leave it to our fully qualified and experienced installation engineers, and they'll ensure that the installation is done as quickly and with as little disruption as possible.

Approved By The Best

For your added peace of mind you be be sure that ATG Access boasts the highest level of accreditation in its field.

L.A.R.B.U.G

Permanent, Discreet and Powerful Protection For A Range Of Applications

- Corporate Business Settings
- Pedestrianisation Schemes
- Parks
- Retail Parks
- Coastal Areas

Street Furniture for Pedestrianisation Schemes

ATG Access can supply a complete range of street furniture for Pedestrianisation schemes. Designed to meet the requirements of the most demanding operating conditions whilst providing pleasing aesthetics, ATG Access have installed equipment in schemes throughout the UK.

VP200 System

Automatic bollard systems allow flexible solutions for Pedestrianisation systems in towns and cities throughout the UK.

Traffic indicator columns ensure safe passage for authorized vehicles

VP 200 Cabinet

A street cabinet houses the hydraulic power unit and system control equipment.

Clear and durable signage ensures the system operates efficiently and safely

Static bollards provide additional permanent security

The AT Genie is a compact automatic bollard which can be used to control access for disabled parking bays.

Permacast Range

ATG Access Systems Virtually Maintenance-Free Static Bollards

Permacast, a specially formulated engineering grade polymer, is testimony to the commitment of ATG Access to design innovation and product development.

The polymer is applied to every static bollard and item of street furniture in our extensive Permacast range.

Available in a variety of traditional and contemporary designs, Permacast products are pigmented to the RAL or BS colour of your choice, then finished with an incredibly durable two part polyurethane gloss coating. This is projected to last in excess of 10 years and gives you the reassurance that in the event of any damage, the colour integrity will always be maintained.

Tried and tested in severe environmental conditions, Permacast systems will not rust, chip or corrode and as such require virtually no maintenance. Moreover, with an internal steel core the bollards will not shatter on impact and in turn will provide a powerful and truly effective barrier.

For that finishing touch, Permacast bollards can also be tailored to incorporate your crests, logos, signage and any reflective elements, to give your design that truly individual appearance.

How to specify Permacast
