

MORTICE ESPAGNOLETTE SYSTEMS ~ FOR DOORS

Our mortice espagnolette bolts are now available in kit form as illustrated below, simply tell us the application the door height, door thickness, style width and we will do the rest leaving you to choose from the lever handles on the opposite page.

Please bear in mind that these fittings do not conform to BS3621 so check with your insurance company first that they are acceptable. Equally we do not recommend that mortice espagnolette bolts be fitted to softwood doors.

An information sheet detailing your options, size of lockcase, height and width of bolt is now available.

Code **ESP001 and 004**

4 Point hook bolt

Code **ESP009 and 012**

Euro Escutcheon

Please Note: Our lever handles are 92mm centers and may not suit an existing mortice espagnolette bolt as the "Center's" can vary per manufacturer. We can also supply some handles with 72mm Centre's.

MORTICE ESPAGNOLETTE SYSTEMS ~ FOR WINDOWS

Illustrated to the right is our mortice window espagnolette, which will cater for the situations as detailed below. If combined with a locking window handle (see bottom and opposite) they offer a very secure and aesthetic way of closing your window.

Our mortice window espagnolette bolts use the side-bolt principle and can be supplied with night ventilation keeps to prevent the need for surface trickle vents. We can also supply a concealed friction stay that utilises the same groove as the espagnolette.

An information sheet detailing your options, size of lockcase, height and width of bolt is available
