

Compliance Made Easy

# Germgard®

Germgard is a smart sanitising station, designed to promote good hygiene practices to building users. Using digital signage, it alerts users to sanitise their hands before gaining entry.

### Overview

Germgard uses a Passive Infrared (PIR) Sensor which detects when a person is approaching. The connected screen will display a message to remind the building user to sanitise their hands.

When the user sanitises their hands, a customised message will appear and allow entry.

### Features

- Visual evidence of a return to work strategy
- Reactive digital display
- Customisable home screen
- Bespoke sanitiser with bladder refill
- Suitable for high-risk hygiene areas
- Energy harvesting technology
- Wire-free Bluetooth sanitising unit

	Germgard
Germgard consists of:	
	Germgard Sanitiser Unit
	Germgard PIR Sensor
	Germgard Screen
	Germgard Stand

## Germgard Sanitiser Unit
