

## Technical Data

Surface-water drainage systems

### **Composition and manufacture**

ACO Water Management utilises many different materials in the production of its products including Vienite<sup>®</sup>, ACO's high-strength recycled polymer material, plastic and steel. Gratings are available in galvanised or stainless steel, cast or ductile iron and composite or plastic materials. ACO Building Drainage components are manufactured from a variety of corrosion-resistant materials including stainless steel grades 304 and 316. ACO product ranges are backed up by a comprehensive design service, which offers technical and product support in scheme and hydraulic design.
