APPLICATION AREAS

- Urban spaces
- Pedestrian areas
- Parking areas
- Entrances of underground car parks
- Industrial areas
- etc

PRODUCT ADVANTAGES

The channel cover complies with ADA requirements (American Disabilities Act).

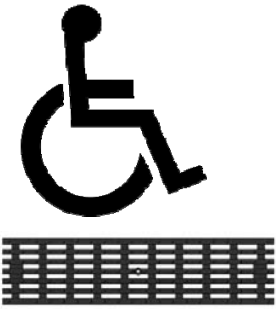

These gratings are wheelchair and disability friendly and are, particularly in urban spaces, also ideal for women's high heel (HEELGARD-safe.)

Channel covers for cross drainage the slots are not greater than 13 mm (1/2 inch) => 7,7mm wide and length less than 40 mm. Our ADA gratings are made of ductile iron that exceeds the recommendations for slip-resistant surface. The slip-resistant heights is below 3 mm.

DESIGN GRATINGS

In our product range you will also find MEA® IronAge Design Gratings , which are also ADA compliant. Stylish, aesthetically appealing and highly robust; these are just a few of this artistic product's distinctive characteristics. Manufactured of recycled cast iron the gratings will naturally rust and develop a dark patina, which gives the design grating its typical look. These gratings will add that vital finishing touch for your private property or urban design and are available in ten different patterns.
