

ACROVYN® WALL & DOOR PROTECTION

For experiences
that endure.

Construction Specialties®

Helping you build *big dreams.*

We start with a simple promise: offer the highest quality service, products, and expertise to help the building industry create amazing places. And since 1948, we've done that by taking a listen-first approach to discover what you really need. That's led us to create innovative products, like the Acrovyn® line that revolutionised wall protection. It's also enabled us to not only solve problems but also to create opportunities to help you build better.

Leading *with excellence.*

We're always challenging ourselves to live up to your highest standards. So, when you find that what's out there doesn't work for you, we strive to create what does. That means we're not just ready but willing to change our products to fit your project. It's an approach that's helped set the bar for the industry and can help you realise a world of possibilities.

1948

Edward and Mary Ellen Hallock established Construction Specialties in Newark, New Jersey, as a manufacturer's representative firm.

70+

Years of excellence in the
architectural products
industry

LEADERS IN THE INDUSTRY

We manufacture the highest quality interior products for architects, designers, engineers, and contractors to create resilient spaces and elevate the building industry.

Solutions from *the inside out.*

A beautiful building is just the beginning. Our goal is to partner with you to transform your project into a vibrant space that positively impacts its occupants – whether that means protection from the elements, making a visual statement, or anything in between. Let's make it memorable together.

INTERIOR PRODUCTS

Acrovyn®
Wall & Door Protection

Construction Specialties®

The gift of *choice.*

Every project is unique, requiring different levels of protection, performance characteristics and design options. Whatever your needs and budget – we've got it covered.

SOLUTIONS FOR ALL BUILDINGS

From light duty rub rails for waiting rooms, durable wall and door finishes for all the busy areas in your building, or robust profiles capable of withstanding impact from wheeled equipment, the Acrovyn range makes it easy to create a complete interior protection scheme for any environment.

SAFE MATERIALS

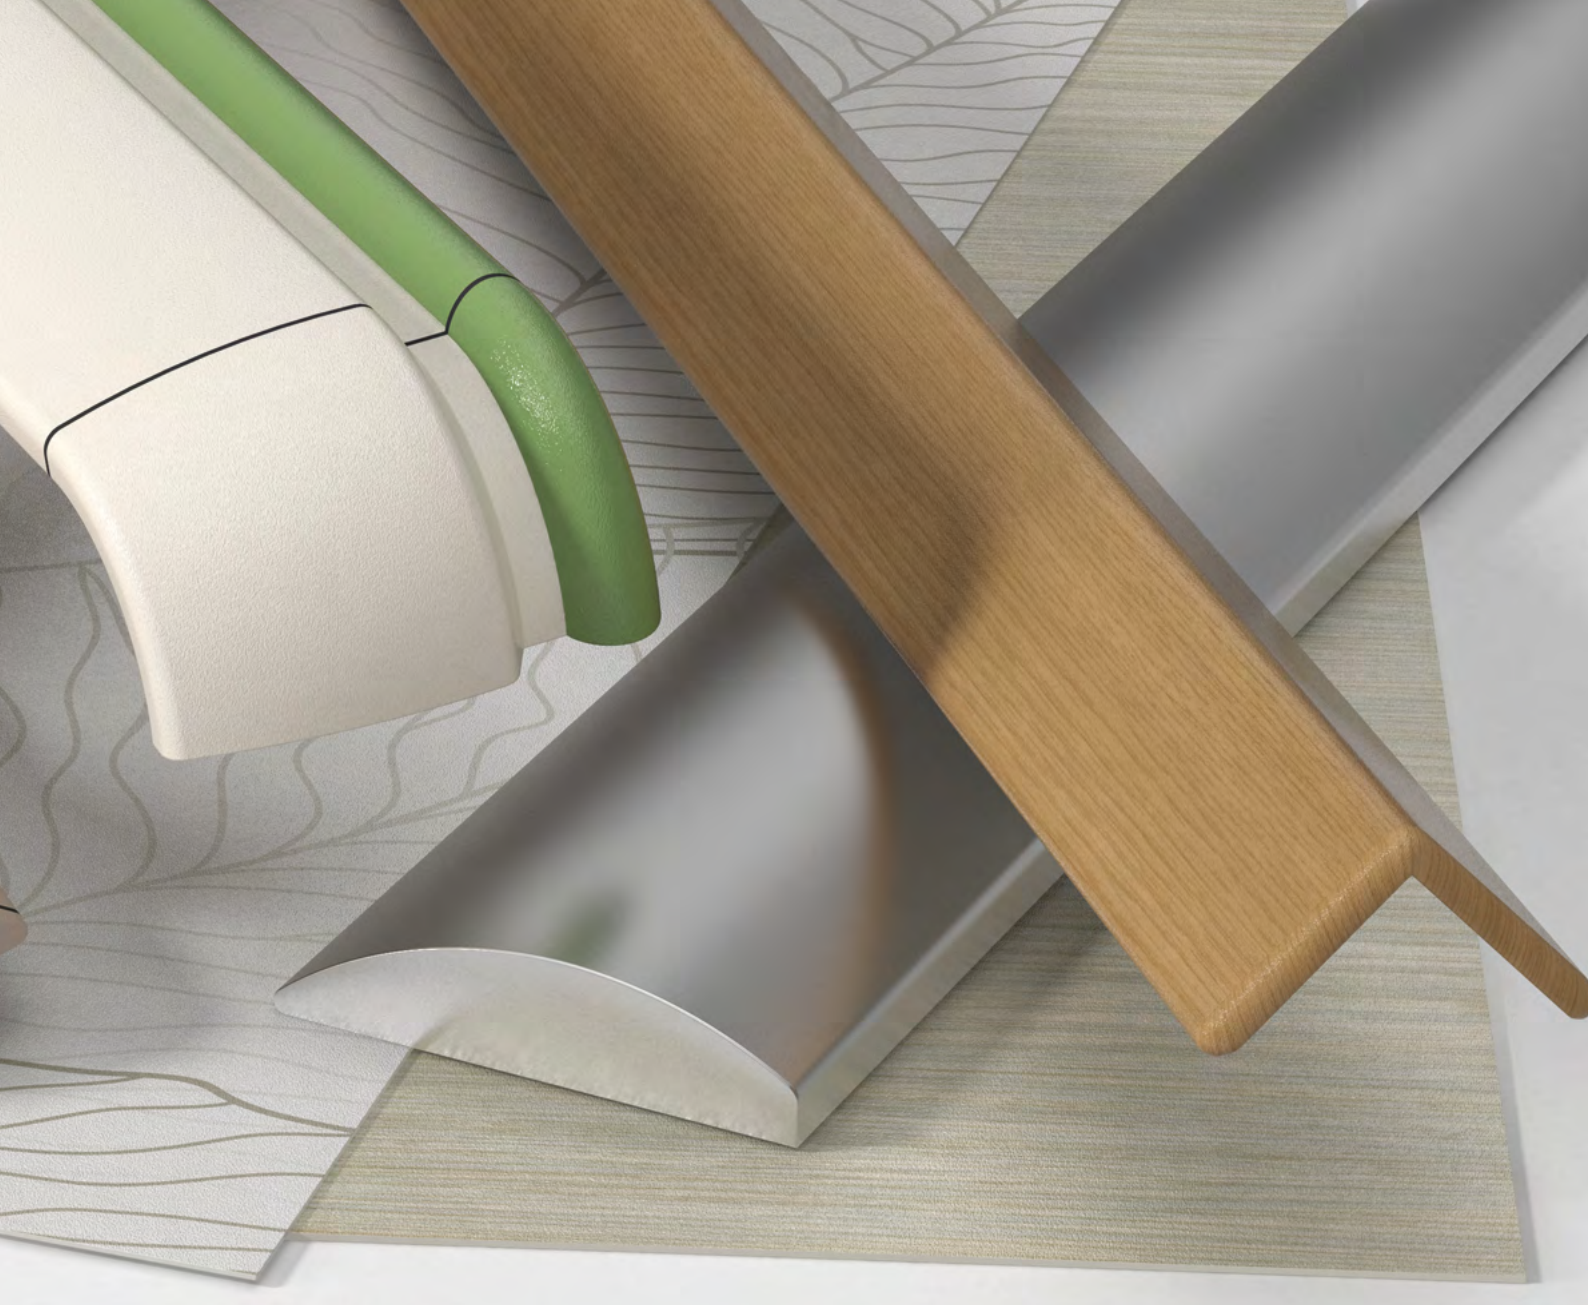

All Acrovyn materials are free from persistent bio-accumulative toxins (PBTs), Bisphenol-A (BPA) and halogenated or brominated fire retardants. They don't contain any heavy metals and have achieved A+ Class rating when tested for the release of Volatile Organic Compounds (VOCs), allowing you to specify with confidence.

SUSTAINABLE CHOICES

Acrovyn PVC-Free is our most environmentally friendly material, proven to be as strong and durable as original Acrovyn.

Our current offering includes a wide selection of wall protection profiles, as well as Bronze Level *Cradle to Cradle Certified*® textured sheet.

FIRE RATED SOLUTIONS

Compliance with fire regulations is one of the most important considerations for any building.

Where applicable, we have highlighted the fire ratings of our products to make it easy for you to choose the right solution for your space.

BACTERICIDAL SOLUTIONS

If infection control is your key concern, Acrovyn Bactericide will ensure long-term hygienic conditions.

Tested and proven effective against the most commonly occurring hospital and food bacteria species, Acrovyn Bactericide is available as sheets, handrails and bed head protectors.

Customise *your protection.*

The days of functional wall protection are over. Acrovyn® gives you the freedom to realise your design vision with a range of flexible options. Now, you can create beautiful interiors that last.

MURALS AND CUSTOM SHAPES

Acrovyn Sheet is a versatile material that is easy to cut, shape and form, allowing you to create resilient and aesthetically pleasing environments. Imaginative, bright wall murals, durable signage and logos, or decorative door protection can be readily achieved.

BESPOKE IMAGERY AND GRAPHICS

When it comes to Acrovyn by Design, the possibilities are truly endless. Your graphics, photos, patterns or custom messaging will be safely embedded behind a durable layer of clear PVC-Free sheet, transforming your interiors into welcoming, healing, inspiring, energising or relaxing spaces that stand the test of time.

BESPOKE COLOURS

We understand the importance of colour in your design. If your desired shade isn't part of our extensive standard palette, we can manufacture bespoke colours to meet your needs ¹. Alternatively, Acrovyn by Design offers a solid colour printing option, harmonising with your wall finish or interior decor while keeping your spaces protected.

For inspiration and more information, visit:

www.c-sgroup.co.uk/17146

¹ Minimum order quantities apply. Please contact us to discuss your requirements.

The investment *of a lifetime.*

From gyms and universities to care homes and hospitals, any space that sees a lot of traffic should pay extra attention to its walls. Acrovyn® has been the trusted interior wall protection for more than 50 years. Why? Because it lasts.

Acrovyn's textures are expertly crafted to subtly veil scuffs and abrasions without compromising ease of cleaning. This perfect balance between texture and protection keeps your interiors looking beautiful for years. We bet you'll get tired of looking at it before it wears out.

CLEANABILITY

When it comes to hygiene, Acrovyn has been proven to be resistant to bacterial and fungal growth. Additionally, some of our solutions are enhanced with bactericidal additives uniformly distributed throughout the material, offering an extra level of protection.

Acrovyn's texture guards against dents and scratches where bacteria can hide. Plus, it can be cleaned easily with just soapy water or commonly used cleaning products, saving you time and money on maintenance and helping to reduce the risk of Hospital-Acquired Infections (HAIs).

INTERIOR PRODUCTS

Acrovyn® *Wall Protection*

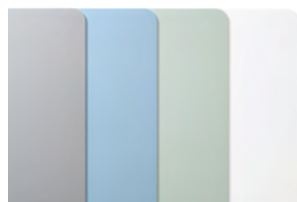

Making and taking *an impact.*

Bring your dream space to life with our Sheet & Panel collection. More durable than painted finishes, wallpaper or laminate, Acrovyn® is designed to keep up with the toughest daily abuse whilst still being easy to maintain.

TEXTURED SHEET

Our impact resistant sheet can be used in a variety of spaces to ensure functionality, protection and pleasing decor. Choose from a wide range of colours in PVC or PVC-Free, or select our decorative finishes to create a welcoming and long-lasting interior.

ACROVYN BACTERICIDE

Developed to help combat the threat of hospital acquired infections (HAIs), our Acrovyn Bactericide Sheet is proven to kill bacteria on contact. Available in 2mm thick textured and smooth variants, it will remain effective throughout its long lifespan.

SMOOTH SHEET

In sterile environments, an easy to clean and durable surface finish is essential. An alternative to tiles, our Acrovyn Smooth Sheet won't crack under impact and is suitable for steam cleaning.

ACROVYN BY DESIGN®

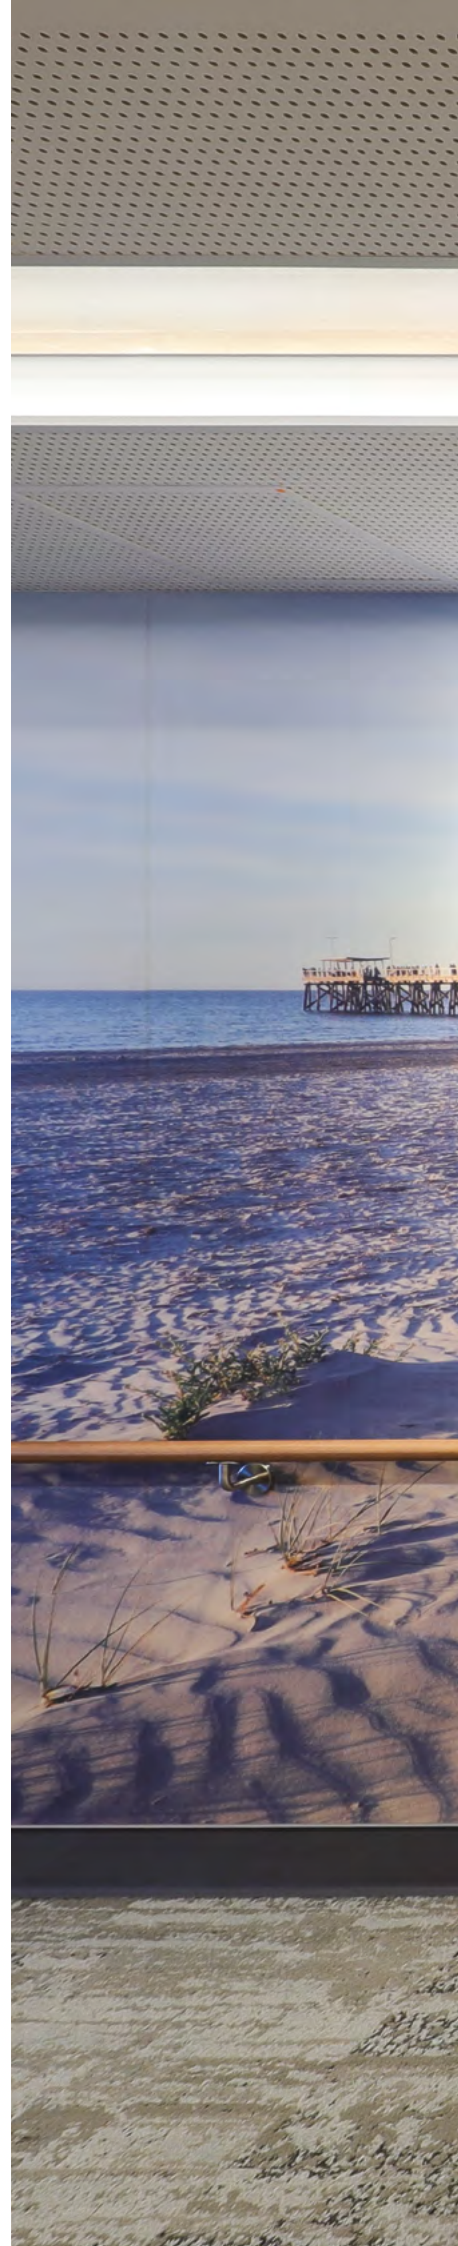

Patterns, logos, photographs—any unique visual statement that you imagine, we can embed. Acrovyn by Design is loved by architects, interior designers, and owners for its ability to create stunning interiors without the worry of damage.

WALL PANELS

Designed for the protection of walls in high-traffic areas, Acrovyn Wall Panels comprise our impact resistant Acrovyn Sheet adhered to a rigid MDF board.

Where high fire resistance is vital, Acrovyn FP Panels offer a durable finish to A1 or A2-s1, d0 rated substrates.

www.c-sgroup.co.uk/413

ACROVYN FP PANELS INSTALLED
WITH STAINLESS STEEL TRIMS

Complement *your corners.*

External wall corners and other structural protrusions often bear the brunt of daily wear and tear, compromising the appearance, cleanliness, and safety of your interiors. Our robust and easy-to-maintain products not only preserve these corners, but also enhance hygiene and significantly cut down on maintenance expenses.

ACROVYN CORNER GUARDS

From 75 mm wide leg models backed with aluminium retainers, to discreet, 30 mm wide and simple-to-install stick-on options, we've got corner guards to suit your level of protection requirements, corner angle and interior decor.

STAINLESS STEEL CORNER GUARDS

Complementing our offering of stainless steel crash rails and handrails, these corner guards are ideal for hygiene-sensitive areas in commercial environments or kitchens.

EPDM RUBBER CORNER GUARDS

Boasting excellent shock-absorbing and weather-resistant qualities, our EPDM Rubber guards are a perfect fit for back-of-house and delivery areas or car parks. Complementary crash rails are available.

SPECIFICATION GUIDANCE

Corner guards can be installed to cover either the full or partial height of the wall, depending on where the impact damage is likely to occur. Most of our models are available in stock lengths of 3 m, or can be supplied pre-cut to required size.

Acrovyn models starting with designations SM- and SSM- feature free-floating covers over a continuous aluminium retainer, and are supplied complete with top and bottom end caps. Covers are easily replaceable in case of damage.

The choice of corner guard colour can help with achieving an inclusive design, as colours that contrast with the wall will help visually impaired users identify obstructions and corners.

For LRV values of all our colours, visit:

www.c-sgroup.co.uk/2445

Mobility *with style.*

No matter the type of facility, our line of handrails is designed to help your building's occupants stay mobile. With a wide choice of material options, colours and finishes on offer, our handrails will complement interior design schemes whilst meeting legislative and functional requirements.

ACROVYN HANDRAILS

Handrails featuring Acrovyn covers are durable and easy to clean. Choose from circular or oval-shaped options, in a wide spectrum of colours or decorative finishes to meet visual contrast requirements.

TIMBER HANDRAILS

Our solid timber models with stainless steel accessories will add warmth and style to any interior. All of our timber comes from sustainable sources and carries FSC or PEFC certification.

METAL HANDRAILS

Whether you are after the sleek look of stainless steel or a more economical, but still durable, aluminium handrail, we've got options to suit.

ADAPTOR FOR STAIRCASE INSTALLATIONS

Designed to rotate around two axes to adjust to any required angle, our adaptor facilitates continuous handrail installation in staircases.

Available in 27 solid colours, it is compatible with HREB-6, HRE-6 and HRA-6 handrail models.

RUB RAILS
CORNER PROTECTION

Where function *meets design.*

Our robust line of hand/crash rails is designed to meet your interior protection needs while offering pedestrian support in circulation areas. Available in a choice of styles, sizes and configurations to suit your requirements.

HAND/CRASH RAILS

Elegant and ergonomically designed, our products provide impact protection and comfortable pedestrian support. Available for installation on Quick Lock or on optional anti-ligature brackets.

COMBINED HAND/CRASH RAILS

Exhibiting both style and strength, our combined hand/crash rails are fitted on robust stainless steel brackets, offering both code compliance and reliable protection.

MAKE IT EASY WITH QUICK LOCK

Our innovative Quick Lock design eliminates the need for drilling holes in the retainer. As well as easy installation, it offers effortless and convenient removal with a mere half-turn twist at the bracket.

See how easy it is.

SPECIFICATION GUIDANCE

To ensure the right level of protection, the type and location of crash rails should be determined in relation to frequency and severity of impact, as well as the anticipated damage position.

Some of our models are available in a choice of duty ratings. Variants featuring continuous aluminium retainers are rated for Heavy Duty, whilst those mounted on aluminium clips offer Medium Duty protection.

Models with Acrovyn or Acrovyn PVC-Free covers are typically selected for general circulation areas. For other material options, refer to pages 46-47.

INTERIOR PRODUCTS

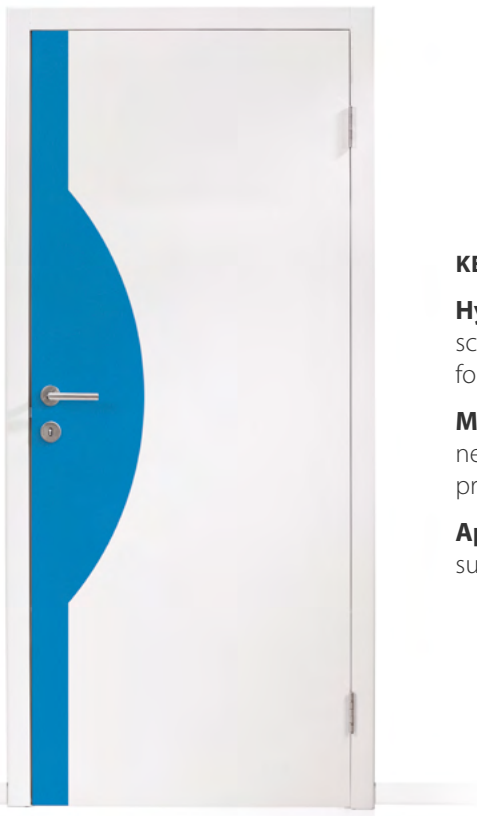

Acrovyn®
Door Protection

Construction Specialties®

Protect *doors and budgets.*

Doors and door frames are vulnerable to damage, and will often require periodic maintenance or replacement throughout the life of the building. Wood veneer or high pressure laminate just can't handle the same wear and tear as durable Acrovyn®, which has been protecting doors in thousands of facilities worldwide.

KEY BENEFITS OF DOOR PROTECTION

Hygiene - prevents dents, cracks and scratches, which are an ideal breeding ground for bacteria

Maintenance - eliminates or reduces the need for premature replacement or repair, protecting budgets

Appearance - prevents deterioration of door surfaces over its life cycle

DOOR FACE PROTECTION WITH
ACROVYN BY DESIGN

Doors *with an edge.*

Cracks and chips often happen at the door edge. Our Door Edge Protectors (DEPs) have been designed to withstand impacts and prolong the lifespan of timber core doors. If maintenance is needed, simply replace the edge – an easier and cost-effective alternative to replacing the door, with minimal downtime.

ROBUST AND SAFE

Our DEPs can be applied to one or both edges of new or existing timber core doors, and can be used in combination with door face protection options if required.

Manufactured in sizes to suit 44 to 54 mm doors as standard, they are available in 36 colourways.

Suitable for use with 30 min or 60 min fire doors ¹, Acrovyn DEPs have been thoroughly tested to ensure their reliable performance.

¹ Acrovyn DEPs are designed and tested for use with fire door assemblies of proven fire resistance to current BS and EN test methods. They are not intended to upgrade non-fire rated door assemblies to fire resisting assemblies. For further information view Product Sheets.

Tailored *to your needs.*

We know that no two projects are the same. With our flexible solutions, you can easily equip your doors with the right level of protection to ensure a long service life.

DOOR CLADDING

Manufactured to custom sizes, door cladding protects faces and vertical edges. Configured from plates and channels or formed angles, it can be applied to the full or partial height of the door.

DOOR FACE PROTECTION

Whether you wish to protect small areas of the door or its full face from damage, Acrovyn presents a simple and economical solution. Available in a wide range of standard designs or incorporating custom imagery or shapes.

DOOR EDGE PROTECTORS (DEPs)

Protect the edges of new or existing timber core doors with our robust DEPs. They can be applied to one or both door edges and are designed to be easily replaced in case of damage.

Thoroughly tested and proven to be suitable for use with 30 min or 60 min fire door assemblies.

DOOR FRAME PROTECTION

It is not just the doors that take a beating. Door frames and architraves can easily get damaged by mobile equipment being moved around.

Our Door Frame Protection is made to order and built up from a series of channel and angle sections to wrap around different styles of timber and metal door frames.

Compare Door Protection Options

When applied to doors, Acrovyn® Sheet delivers a sturdy and easy-to-clean surface finish. It offers flexible configuration options to optimally safeguard your doors against wear and tear.

INTERIOR PRODUCTS

Acrovyn[®] *Doors*

Construction Specialties®

Open the door *to new opportunities.*

Designed to withstand heavy impact, Acrovyn® Doors are ideal for any facility requiring a reliable and easy to maintain solution for high traffic areas. Postformed or fully encapsulated in our impact resistant Acrovyn® Sheet, they are available in a vast array of options and configurations to satisfy the operational, performance and aesthetic requirements of your project.

DOOR SPECIFICATION OPTIONS

Fire Performance:

- FD30 or FD30S
- FD60 or FD60S
- Non-fire rated (NFR)

Door Thickness:

- 44 mm (FD30, FD30S, NFR)
- 54 mm (FD60, FD60S)

Door Core ¹:

- Graduated density chipboard (GDC)
- Laminated wood strip core

We offer a diverse range of cladding and doorset configurations, glazing and frame styles, as well as colours and finishes, allowing you to tailor a bespoke solution that perfectly meets your needs.

¹ FSC chain of custody certification can be supplied, if requested when the order is placed.

Our doors stand *the test of time.*

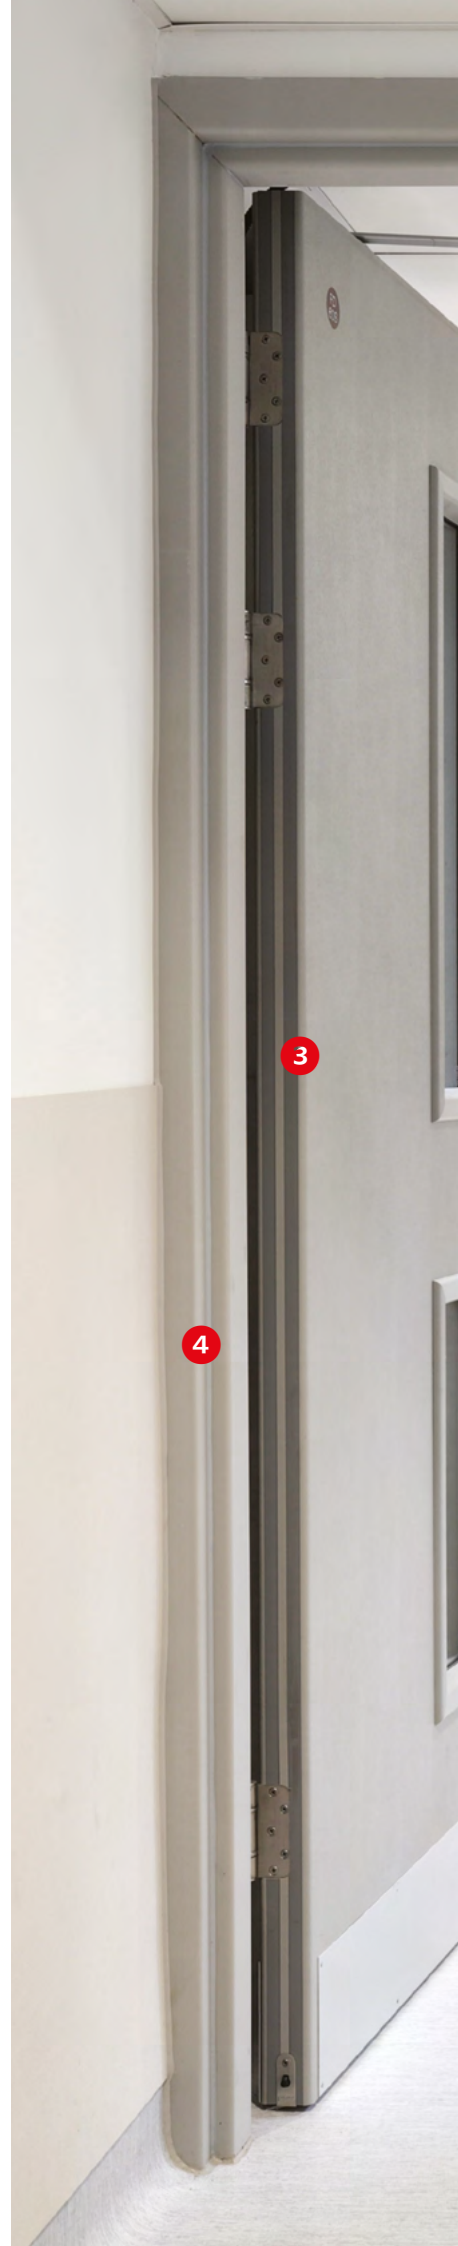

When assessed to EN 1192 for their strength and resistance to vertical load, static torsion and soft and heavy body impact, Acrovyn® Doors have been classified as Class 4 - Severe Duty. This means they're a reliable choice for any application, including environments prone to frequent and intense use.

- ❶ 2 mm thick, textured Acrovyn cladding applied to door faces and edges endures the toughest abuse
- ❷ The material hides scrapes and scuffs and is resistant to bacteria and fungi
- ❸ Wrapped edges are standard, and where a particularly severe duty solution is required, replaceable Door Edge Protectors can be applied to one or both door leaf edges.
- ❹ Doors are typically specified complete with a door frame and supplied factory pre-hung for the best possible fit. We recommend that the frames are also clad in Acrovyn to protect them from impact damage.

DURABLE AND CLEANABLE

Our door finishes are designed to guard against chips and cracks where bacteria can live. Acrovyn Doors are easy to clean, resist the growth of bacteria, and can help reduce the risk of Hospital Acquired Infections (HAIs).

Safety *matters.*

When it comes to fire performance, there's no room for compromise. This is why we've thoroughly tested our Acrovyn® Fire Doors, giving you the peace of mind that they won't fail when you need them most.

FIRE TEST EVIDENCE

Acrovyn Fire Doors have been assessed under BS 476-22, achieving in excess of 30 min and 60 min fire resistance when tested as part of timber-based fire door assemblies.

Where smoke seals are incorporated into Acrovyn Doors to provide cold smoke control, the smoke seal elements have been independently tested to BS 476-31.1 and have achieved leakage rates not exceeding 3 m³/m/hr when tested at 25 Pa.

If required, Acrovyn Fire Doors can be supplied under BM TRADA's Q-Mark Fire Door Manufacture Scheme, one of the most rigorous certification processes available for construction products.

Our unique certification number is 702.

RETAIL

THE BEST OF BOTH WORLDS

Opting for our doors delivers both high performance and aesthetic appeal in a single package. Select from a broad spectrum of colours, lifelike woodgrains, concrete, and metallic finishes to suit your design preferences. For certain cladding options, contrasting colours can be specified for glazing bead styles and door frames, assisting you in meeting legislative requirements while maintaining visual appeal.

Door Configuration Options

Your Acrovyn® Doors will be made to your exact specification, from fire rating and dimensions to glazing bead configuration and colour.

For more information and to download Product Sheets, visit:

www.c-sgroup.co.uk/2635

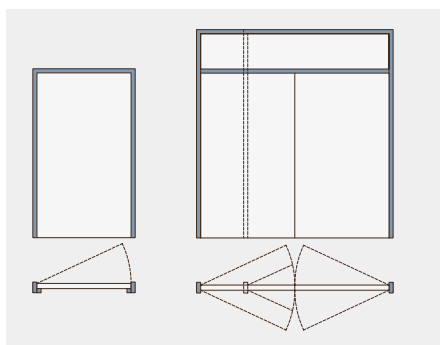

CLADDING OPTIONS

You can choose to have Acrovyn applied to door faces and postformed around edges, or to fully encapsulate and seal your doors with it.

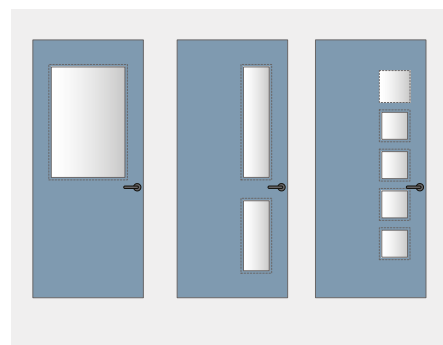

If you expect a lot of impact at door edges or want a contrasting door edge colour, simply select an option with replaceable Door Edge Protectors (DEPs).

DOOR CONFIGURATIONS AND HANDING

From single acting single doorsets to double acting double doorsets with overpanels and anything in between, we can configure your doors to suit your needs.

GLAZING CONFIGURATIONS

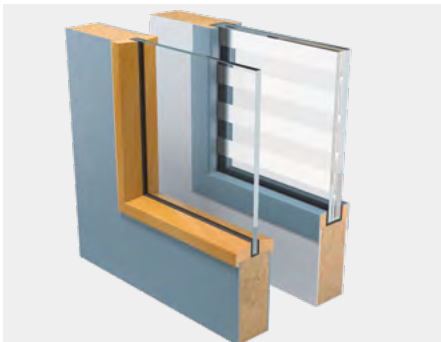

A wide selection of standard vision panel designs, including privacy panels and specialist solutions for X-ray areas are available.

Glazing units are manufactured to project specific sizes, within certain manufacturing limitations and in line with legislation requirements.

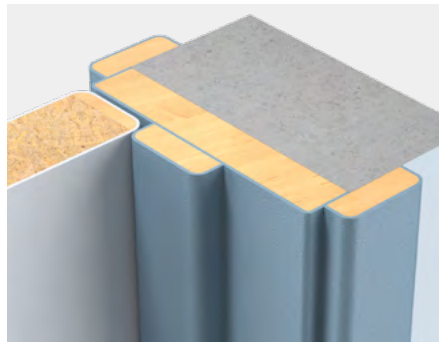

GLAZING BEAD OPTIONS

With options ranging from lacquered hardwood beads to a variety of Acrovyn wrapped designs that can either match or contrast with the door face finish, we ensure all your aesthetic and functional requirements are met. We also offer specialist solutions for cleanrooms and privacy panels, catering to diverse needs.

FRAME OPTIONS

Acrovyn Door frames are designed for a second fix installation into openings prepared on-site. Standard options include a solid frame construction and split frame variants for installation flexibility.

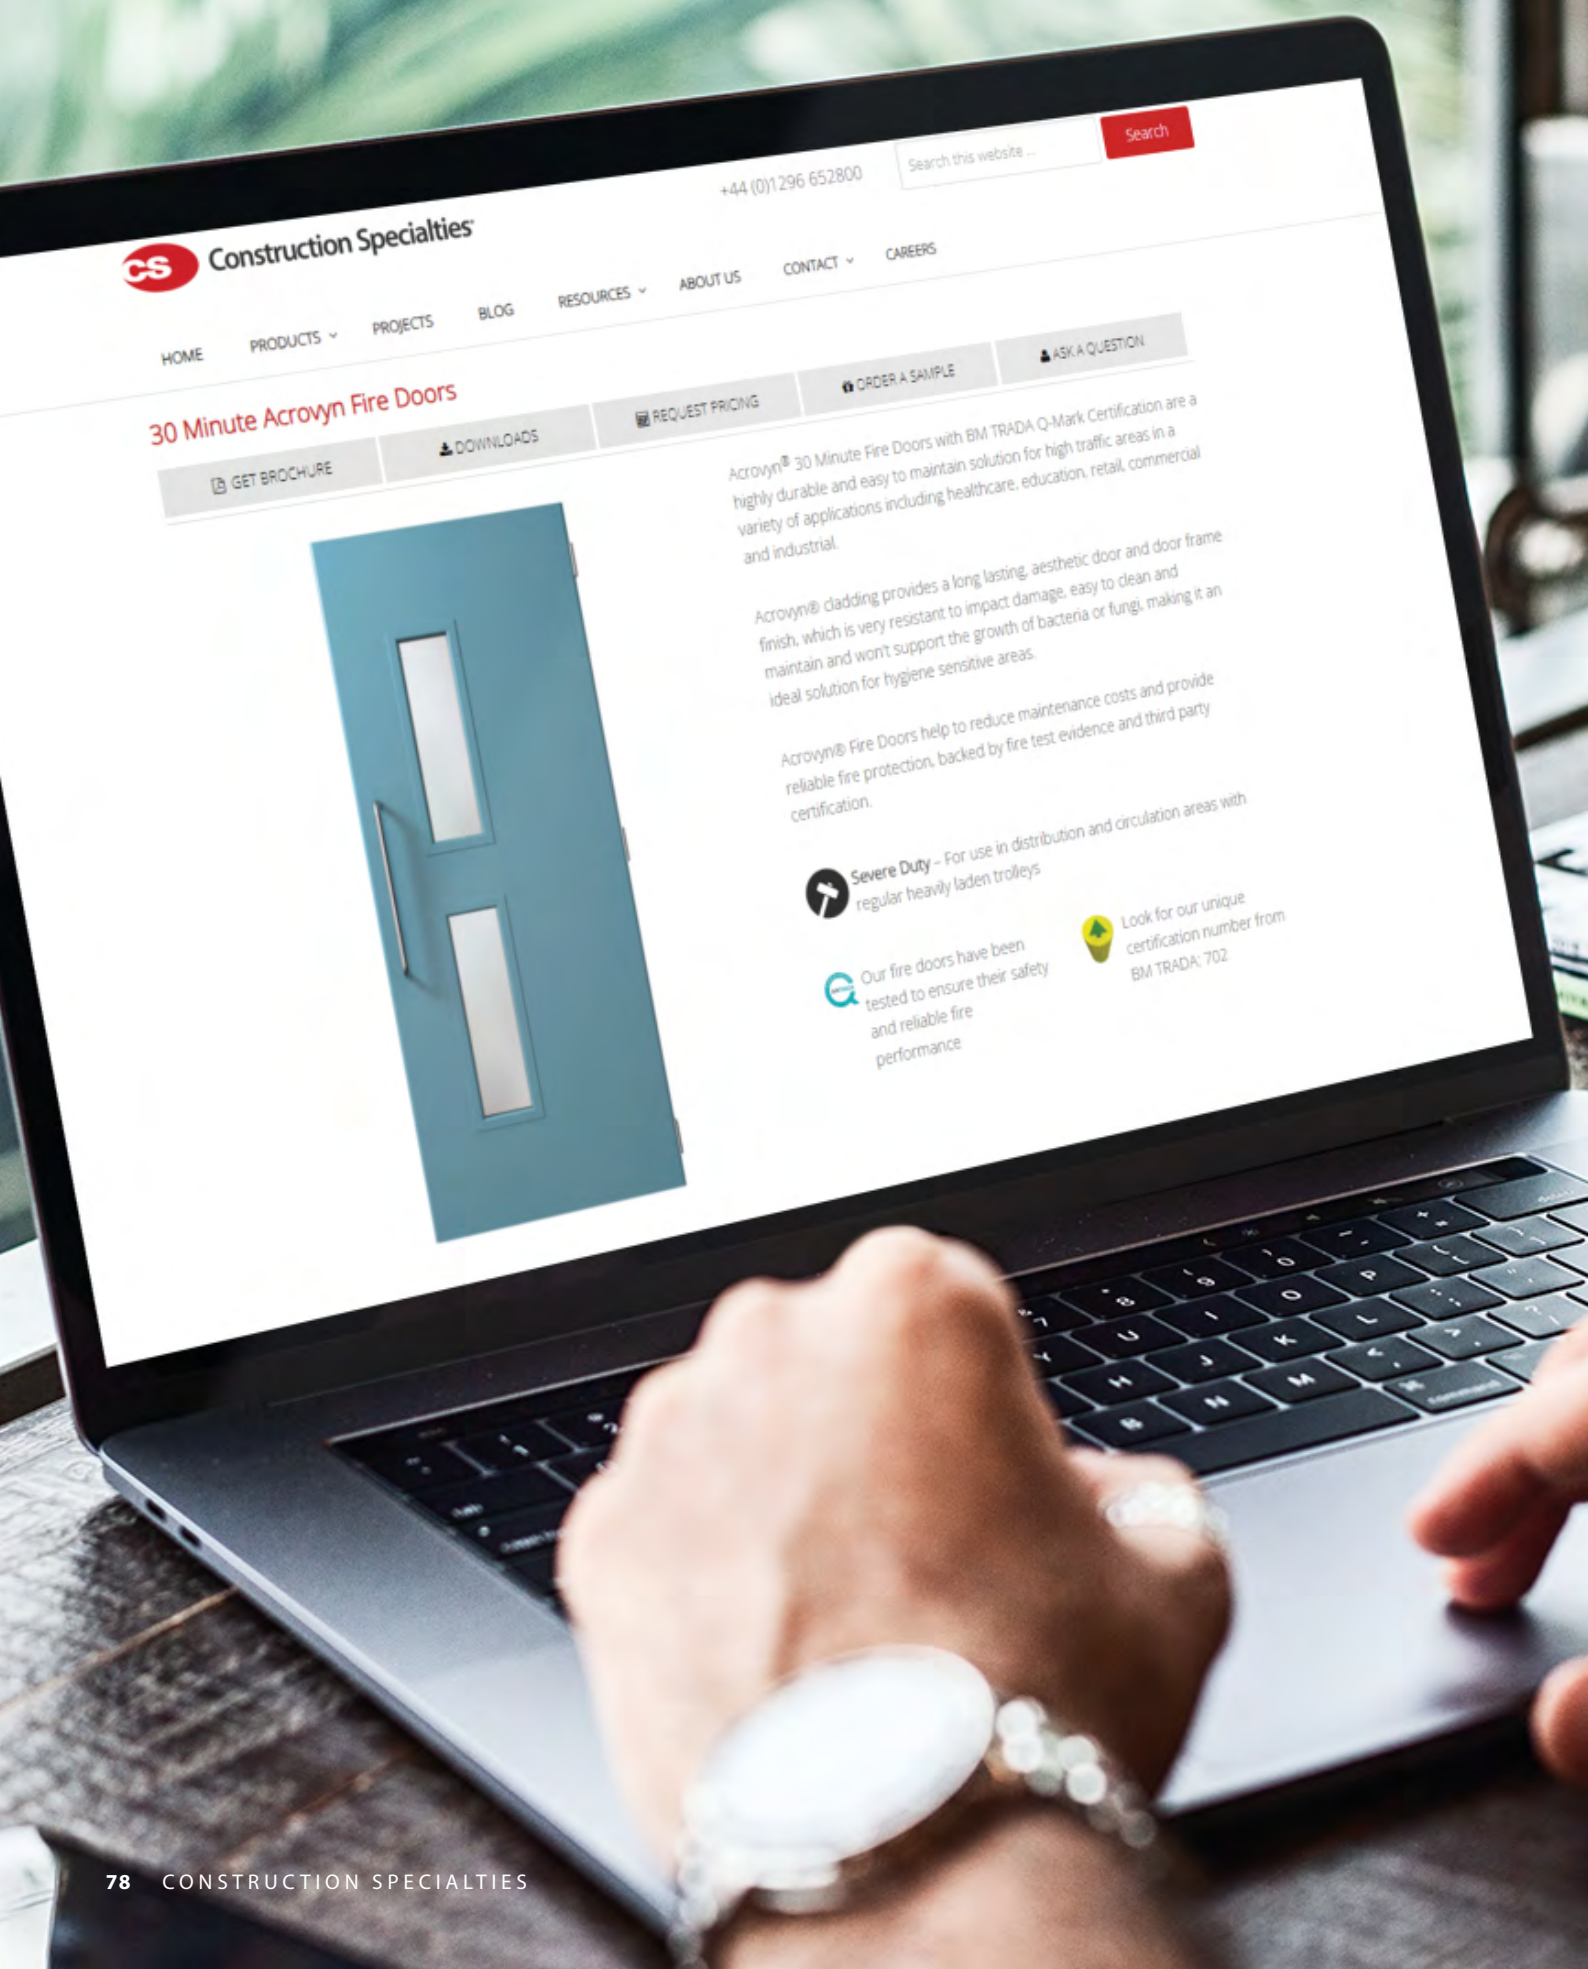

To satisfy visual contrast requirements, frames can be supplied in a contrasting colour to door leaves.

SEALS AND HARDWARE

Our doors are fitted with intumescent and smoke seals as standard, to meet performance demands and adhere to fire test assessments for our products.

Doors are also supplied complete with durable and maintenance-free stainless steel hinges.

ASK A QUESTION

Acrovyn® 30 Minute Fire Doors with BM TRADA Q-Mark Certification are a highly durable and easy to maintain solution for high traffic areas in a variety of applications including healthcare, education, retail, commercial and industrial.

Acrovyn® cladding provides a long lasting, aesthetic door and door frame finish, which is very resistant to impact damage, easy to clean and maintain and won't support the growth of bacteria or fungi, making it an ideal solution for hygiene sensitive areas.

Acrovyn® Fire Doors help to reduce maintenance costs and provide reliable fire protection, backed by fire test evidence and third party certification.

Severe Duty – For use in distribution and circulation areas with regular heavily laden trolleys

Our fire doors have been tested to ensure their safety and reliable fire performance

Look for our unique certification number from BM TRADA: 702
