

Technical Data

ACTIS Insulation

Thermal insulation batts: SYLVACTIS

SYLVACTIS 55 FX is suitable for the following applications:

- roofs from the inside: between rafters and under rafters in crossed layers
- walls from the inside: external walls, between studs in timber frame buildings, partition walls
- walls from the outside: behind ventilated cladding
- floors: between joists, between I-joists, non-habitable attic floors

SYLVACTIS 55 FX is flexible and easy to install by packing between studs. Special board sizes are available for timber frame buildings.

Size and weight

40mm thickness in 1,200 x 600mm

60 to 200mm thickness in 1,200 x 575mm or 1,200 x 750mm.

Thermal properties

Thermal conductivity λ : 0,036 W/m.K

Specific heat capacity: 2000 J/kg.K

Euroclass fire rating: E
