

Technical Data

ACTIS Insulation

Multi-foil insulation, floor: TRISO-SOLS

Composition and manufacture

TRISO-SOLS is composed of 13 insulating layers: one grid-squared polyethylene film, six foam layers, four internal reflective films and two metallic films with reinforcing mesh.

Size and weight

Thickness: 7mm.

20m² roll: 1.6 x 12.5m, weight: 10kg.

Sitework

Installation is quick and easy. The product can be cut with sharp scissors or an ACTIS cutter, and is free from migrant fibres, so no protective equipment is required.

Consult manufacturer for further details.
