

AJAX Droprite Bridging Platform

for access and easy loading of goods

Safe Access

AJAX Safe Access Systems: Protecting your workers in hazardous and high level environments.

The AJAX Droprite Bridging Platform is used extensively in warehouse loading docks and in distribution centres as they facilitate easy loading of goods.

Technical Specification

All Droprite Units are manufactured and constructed to the highest quality for long lasting durability and many years of maintenance free operation in harsh environments.

The body of the Platform is hot dipped galvanised after manufacture and the decking is aluminium tread plated.

All Platforms have a gas strut assisted operation and can have fixed or optional folding hand rails.

The Platforms are designed to enable the loading and unloading of vehicles with varying height load beds.
