

Swing Gate Barriers

Swing Gate Barriers

This gate is based on a rigid rectangular form complete with bracing struts to strengthen the frame and make it suitable for continuous heavy use. Two catchposts are provided to enable the gate to be lock in both open and closed positions by means of a padlockable slidebolt (padlock not supplied). The gate can be supplied as a single leaf in any size up to maximum 6.0m wide. Any opening larger than 6.0m can be secured with two gates locking on to a central, removable post. The gates are available in bolt down and concrete in variations.

Product and Finish Standards

- The gates are available in galvanised finish as standard, and can be polyester powder coated to most RAL BS references.

Technical Details

Fixings

Specification	
Hinge Post	100 x 100 SHS
Latch Post	80 x 80 SHS
Gate Frame	60 x 60 SHS

Sizes

Code	Finish	Width
TCSG30	Galv	3.0 m
TCSG35	Galv	3.5 m
TCSG40	Galv	4.0 m
TCSG45	Galv	4.5 m
