PRODUCT FOCUS

ALIDRAIN SYSTEMS

We are proud to have been invited to the NHBC Standards & Technical Conference in London to showcase our AliDrain aluminium drainage solutions. The AliDrain range offers non-combustible, durable, and versatile drainage systems, designed to meet stringent safety regulations with A1 and A2 fire-rated materials.

AliDrain's quick installation, resistance to corrosion, and low maintenance needs make it ideal for both residential and commercial projects. By meeting the latest building standards,

AliDrain supports insurance providers like NHBC in ensuring compliance and safety across future projects. Choose AliDrain for a reliable and modern drainage solution that sets new standards in safety.

A Message from our Technical Sales Manager

Hello, I'm **Luke Whitehead**, the new Technical Sales Manager at AliDeck.

I'm thrilled to join the team and eager to connect with all of you - our valued customers and partners - as I take on responsibility for the North of England and Scotland.

Since joining AliDeck, I've been struck by the passion, dedication, and innovation that runs through every aspect of our business. Our commitment to delivering high-quality, compliant, and fire-safe aluminium solutions is truly inspiring, and I'm excited to be a part of it.

In this edition of AliPress, we showcase some of our latest projects and innovations that continue to set AliDeck apart in the industry. First up, we take an in-depth look at our **Fulton Road Case Study**, where our expertise in aluminium decking, drainage and modular balustrade solutions played a crucial role in elevating the design of this new-build development.

We also present the **2 Trafalgar Way Project Showcase**, highlighting how our team will be supplying tailored solutions to meet the unique demands of this prestigious project in London, further solidifying our reputation for quality and innovation.

I look forward to meeting many of you in person as I travel across the North of England and Scotland, and I'm here to help with any questions or support you may need for your upcoming projects.

To learn more or to discuss any topics in this issue, please feel free to give us a call at **01622 235 672** or email us at **info@alideck.co.uk**. I'd love to hear from you!

AliDeck Supplies Aluminium Balcony Solutions for the Landmark **Fulton & Fifth Development** in Wembley, in Partnership with **Alloy Fabweld**

AliDeck is proud to supply our high-performance aluminium products, including our Senior Decking Board, Supa Joist, Low Joist, and AliRail 0.74kN Plate Fix, for the ambitious Fulton & Fifth development in Wembley, London. This transformative new build project marks another collaboration with Alloy Fabweld, a partnership that has led to project success on previous large-scale developments like Manor Road Quarter.

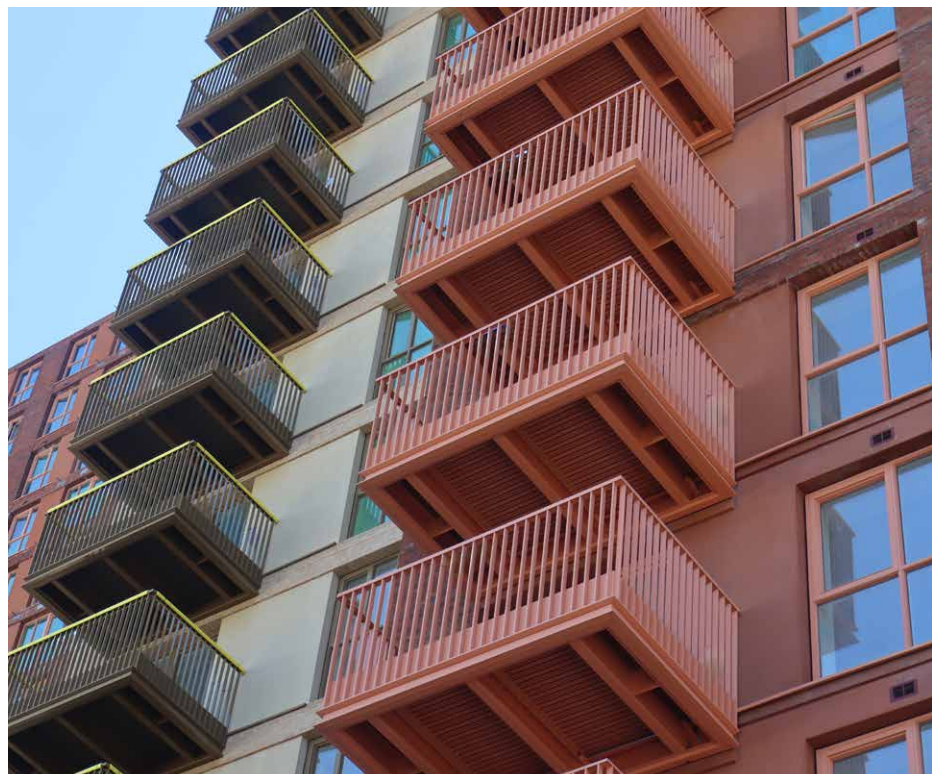

The project by Regal London is part of a major urban transformation in Wembley, offering a mix of residential and commercial spaces that will energise the community and boost the local economy. Our successful partnership with Alloy Fabweld, a leader in architectural metalwork with over 20 years of experience, has been key to the project's success. Together, we've ensured the balconies meet the highest standards of safety, design, and quality, setting a new benchmark for urban living.

AliDeck Senior Decking Board: A Durable and Futureproof Decking Solution

The balconies will feature the AliDeck Senior Decking Board, chosen for its durability, A-rated fire compliance, and sleek design. This aluminium decking solution is engineered to endure the demands of urban living, offering residents a safe, long-lasting, and visually appealing environment.

Its robust construction ensures durability in diverse weather conditions, making it ideal for the demands of modern urban living in London. By integrating this decking board, the project enhances aesthetic appeal while investing in a futureproof solution that perfectly complements the contemporary design.

The AliDeck Senior Decking Board is reinforced by Supa Joist and Low Joist systems for maximum performance and longevity. Designed for strength and reliability, these

joists will provide a solid, level foundation for decades to come and require low maintenance. This combination delivers a stable, futureproof, and cost-effective decking solution.

AliRail 0.74kN Plate Fix: A Cost-effective and Stylish Balustrade Solution for Modern Urban Living

The AliRail 0.74kN Plate Fix system is a key component of the balconies at Fulton & Fifth, blending safety with aesthetic appeal. This balustrade solution meets strict UK safety standards and is load tested in accordance with BS 6180:2011 (0.74kN/m horizontal line load, 0.5kN infill point load, 1.0kN/m² infill distributed load).

Designed with vertical infill panels and secure plate fixings, the AliRail system is both reliable and versatile, making it a popular choice for new-build projects. This futureproof solution ensures that the balconies are not only compliant but also aesthetically pleasing, adding long-term value to the development.

Our in-house powder coating gives us a distinct edge. By meeting the Qualicoat Seaside standard and using only Class 2 powders, we ensure that our complete balcony solutions deliver unmatched durability and a flawless finish.

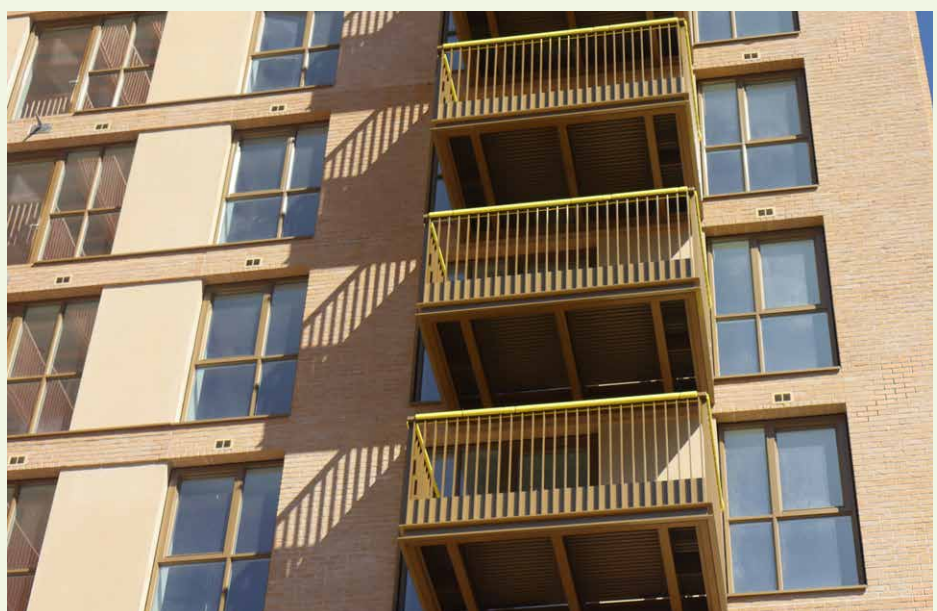

This superior quality not only enhances the aesthetic but also guarantees long-lasting performance.

AliDeck's involvement in this project underscores our position as a leader in aluminium decking and balcony solutions.

We are proud to contribute to a development that will serve as a landmark in Wembley, benefiting the community for years to come.

For more information about our role in the Fulton & Fifth project or to discuss how AliDeck can support your next development, contact us at **01622 534 042** or email: **info@alideck.co.uk**.

AliDeck is set to Supply our **Ultra Decking Board** to **McMullen Facades** for Upcoming New-build Project at **2 Trafalgar Way**, London

APT Architecture & AsymmetricA

AliDeck is excited to announce our recent partnership with McMullen Facades for the new-build project at 2 Trafalgar Way, where we will be supplying our top-tier products: the AliDeck Ultra Board, Low Joist, and Junior Access Wide Gutter.

This collaboration will deliver state-of-the-art, sustainable construction solutions for decades to come.

2 Trafalgar Way is set to be a development that combines our cutting-edge design with innovative construction techniques. Our non-combustible aluminium decking solutions will play a pivotal role in enhancing the building's safety and longevity.

The AliDeck Ultra Board, renowned for its durability and aesthetic appeal, along with the Low Joist and Junior Access Wide Gutter, will ensure that the project meets the highest standards of performance and compliance. These products are specifically engineered to provide robust, low-maintenance solutions that are ideal for modern urban developments.

The final decking installation exceeded expectations, blending functionality and elegance, perfect for relaxation and business activities. The robust materials ensure durability while enhancing the building's aesthetic.
