

Amiens

Specification:

Length: 1940mm
Height: 388mm
Width: 530mm

The Amiens bench is constructed from a sheet of 12+12mm tempered coupled glass which is fixed onto a steel support structure.

The structure is made up of a pair of 7mm thick laser cut steel blades and connected by 10mm rod welded spacers.

Using parts in coated cast stainless steel, the structure is fixed to the two truncated cone shaped steel supports with circular base plates, pre-drilled for ground fixing with M8 bolts (not included) and to the four coated microfused stainless steel arms, to support the glass.

All steel components are hot zined and polyester powder coated. All fixings are stainless steel.
