

# Armural

## P350 + P500

Armural is a new hybrid marmorino/venetian plaster that is trowel applied in one coat to create a smooth or finely textured wall finish. Resembling polished limestone in appearance, hardness and touch, graded marble chips can be added on-site to further enhance texture and effect. A finer marble option - Armural P350 honed - provides a smaller marble particle size for a smooth finish, similar to Italian Stucco but matt in appearance.

The finish is quick and easy to apply, ensuring a competitively priced yet high end aesthetic. Armural is a natural mineral product created from slaked lime putty and Bianco Carrara pre-consumer recycled marble. Hard wearing and durable, Armural features low VOCs, and is class 'O'/'A' fire-rated.

### **Armural P500**

Finishes achieved - One coat plaster finishes with or without the addition of marble chips to create light Pitted or more traditional Marmorino-type Smooth finishes with the appearance of polished limestone.

Pre-consumer recycled marble content = 40%  
Low VOCs  
Class 'O' fire-rated  
Class 'A' fire-rated

### **Armural P350 honed**

Finished achieved - One coat plaster finishes with fine marble powder to create Stucco-type or suede effect finishes.

Pre-consumer recycled marble content = 47%  
Low VOCs  
Class 'O' fire-rated  
Class 'A' fire-rated
