

B30 Frame and Infill Panel

Innovative framed balcony and
interfacing system with concealed fixing

INTRODUCTION

“B30 Frame and Infill Panel provides a cost effective balustrade solution with the minimalistic look of structural glass or aesthetically pleasing powder coated vertical railing”

FEATURES

Frame and Infill Panel

- Provides complete edge protection to a balcony – reduces the number of trades needed
- Cost-effective solution with the look of a structural glass system
- Lighter materials result in less weight on the balcony
- Colour of balustrade elements to coordinate with the building design
- Good integration with other trades – including waterproofing (see technical details) due to versatile base fixing rail
- Quick to install – improves lead times and coordination with other trades

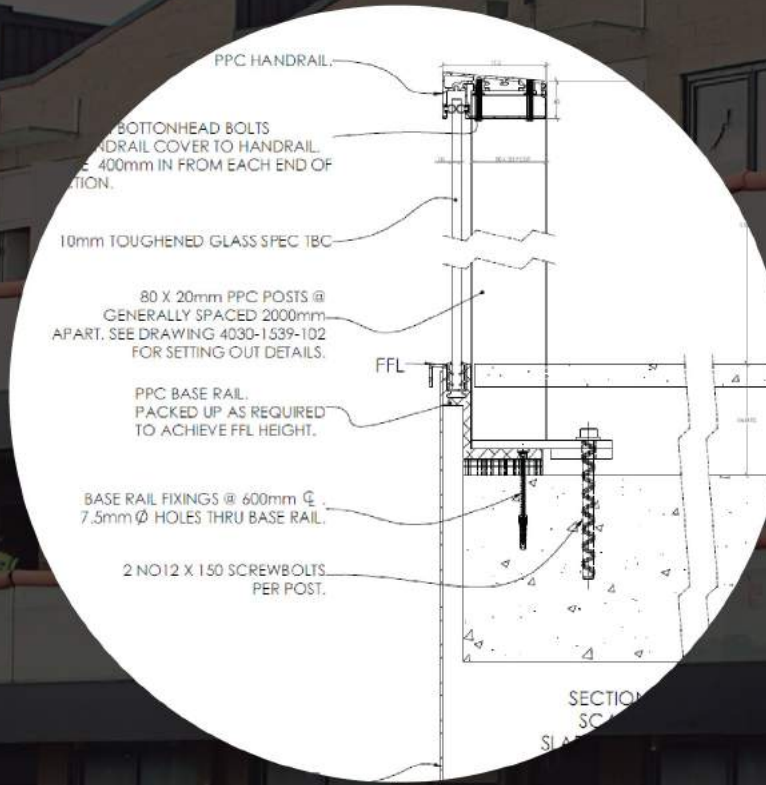

B30 FRAME AND GLASS INFILL

Frameless glass appearance with the cost of post and infill system.

Design

Manufacture

Install

B30 Frame and Glass Infill offers a structural glass effect for the cost of a posts and glass balustrade. Used on balconies and terraces, it incorporates a continuous base and profiled handrail to clamp the glass on top and bottom edges. There are no glass clamps to obstruct the clean lines of the slim posts and rails.

B30 VERTICAL BAR INFILL

Aesthetically pleasing powder coated vertical railing.

Design

Manufacture

Install

The B30 Balcony Edge System can be used with a number of infills including vertical bars to a coordinated powder coated colour. The result is a cost effective vertical bar balustrade with high quality consistent finishes. Used on balconies and terraces, it incorporates a continuous base and profiled handrail to secure the vertical bars.

Technical Features of the B30 Balustrading System.

Waterproofing

B30 base extrusions are designed to integrate with waterproofing systems and assist / compliment a water proofing strategy.

Protection

B30 can be fitted early on in the project then carefully wrapped and protected from damage during construction. This can then form the temporary edge protection while other floor and internal works progress.

Cladding / Facia Integration

B30 Base extrusions are designed to integrate with cladding and facias.

Rapid Install

On a recent project in Canning Town, BA Systems have fully installed 400m of the B30 System in 4 weeks. Due to the modular design of B30, installation is very rapid.

Technical Features – Finishes of the B30 Balustrading System

Powder Coated

Polyester Powder Coating achieves a resilient finish, with a huge range of colour options. Visually, it's equally well suited to toning in with existing designs.

Woodgrain

Woodgrain retains timeless beauty of hardwood, but is impervious to splitting or decay, giving maintenance-free benefits of polyester powder coating. This is achieved resulting in a durable textured surface.

Anodised

Enhances the natural qualities of aluminium still further, providing a strong contemporary finish with incomparable corrosion and abrasion resistance.

NAME - The Gatefold Building

SECTOR - Residential

LOCATION - Hayes

ARCHITECT - Frank Reynolds

CONTRACTOR - Willmott Partnership Homes Ltd

CONTRACT VALUE - £25M

BALUSTRADE VALUE - £606K

The Gatefold Building project (named after the old vinyl record sleeves which were manufactured on this site) will create 132 rented apartments, office space, a new café and community amenities. BA Systems is currently working with Willmott Dixon to install its B30 Frame & Infill Panel System, making this building available to the Hayes community.

Working closely with the architects and the Willmott Dixon design team, the balustrade fixing details were developed, simplified and agreed at an early stage to ensure that flow would not be hindered during the installation phase. BA Systems provided the solution to over 1500m of balustrade required on the walkways, terraces and balconies with their B30 Frame & Infill panel balustrade system - as a product that would fulfil the design requirements, as well as guarantee maximum project flow.

B30 IN USE - NORTH WHARF GARDENS

NAME - Paddington Exchange - North Wharf Gardens

SECTOR - Residential

LOCATION - Paddington

ARCHITECT - Assael Architecture

CONTRACTOR - Bouygues UK Ltd

CONTRACT VALUE - £55M

BALUSTRADE VALUE - £467K

Paddington Exchange, is a striking residential development by Taylor Wimpey Central London. It is a collection of just 123 high specification one, two and three bedroom apartments, all with terraces or balconies, arranged over fourteen spacious floors. Light-coloured brickwork and extensive use of glass throughout the development reflect light to maximise the feeling of space. The overall effect is one of openness and light – with a touch of style and glamour – Taylor Wimpey.

BA Systems is currently working with Bouygues UK Ltd to provide balustrade to the balconies, terraces – a prime feature of this project is approximately 250m of B30 Frame and vertical railing infill balustrade system where BA Systems worked closely with the design team to integrate the system into the façade construction. This met the structural loading requirements whilst keeping the fixing points as minimalistic as possible.

Balustrade Systems for the construction industry.

Over the past 20 years, BA Systems has redefined the design, manufacture, installation of glass balustrade systems. By streamlining our products and project processes, we have been able to significantly improve our service. We can consistently offer short lead-times to meet changes in programme, along with rapid, hassle-free installation.

Our balustrades are categorised into 4 systems.
Each system has a range of options to suit your project.

B10

WALL-MOUNTED HANDRAIL

Complementary handrails, designed to coordinate with our balustrade systems.

WHY CHOOSE BA SYSTEMS

Getting the design right as early as possible in a project ensures success for all parties involved.

Step one

INITIAL DESIGN REVIEW

At the initial pre-order stage, a detailed design review is completed to ensure all parties understand and agree on the overall concept – this ensures our proposals meet all requirements.

Step two

DESIGN DEVELOPMENT

We collaborate with all parties involved in a project, to develop the design and successfully meet all requirements. Our CAD facilities enable us to offer 3D visuals to ensure clarity - this process facilitates the approval process and saves valuable project time.

Step three

SURVEY & MANUFACTURE DRAWING

When the site is fully ready, we survey all relevant areas and provide detailed manufacture & installation set out drawings. These are based on the site's dimensions and all previously agreed elements. A final copy of these are submitted to our clients for their records.

“We’re ready,
when you are ready for us!”

Construction programmes are constantly changing. To ensure we fully meet our clients’ needs, we have spent the last 12 months further streamlining all of our processes - from initial site survey and design & drawing, through to our manufacturing and site installation procedures.

This means we have improved our service level and at the same time, more than halved our average lead-time from 12 weeks to less than 6 weeks.

What difference does this make to you?

1. We are more **flexible** - we can accommodate changes in programme, “We’re ready, when you are ready for us”
2. We are **reliable** - we consistently meet our client's final agreed installation dates.
3. We carry out **rapid** installation - the installation of our products is completed in remarkably short time on site.
4. We aim to achieve **no hassle** - With BA's management pro-actively working closely with our clients project management team, we do all we can to assist them with smooth & snag free completions.
