

# **Vetobac**<sup>®</sup> Hygienic metal surfaces

**VBA99** antimicrobial metal **kills**  
**99.9% of bacteria and viruses.**

Public perception **of touch**  
**surfaces** have changed...

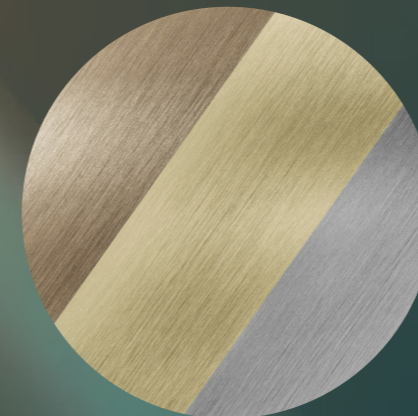

**We felt compelled to do more to help** and so we developed Vetobac<sup>®</sup>, a specially formulated copper metal alloy which works 24/7, between touches and cleaning sessions to rapidly kill the pathogens.

The antimicrobial properties of Vetobac<sup>®</sup> kill a wide range of bacteria and viruses including Coronavirus, MRSA, Norovirus and E. coli.

### **Kills COVID-19 in minutes**

Independent lab testing has proven VBA99 to kill 95% of Covid-19 within 10 minutes of contamination, completely within 1h.

### **Tarnish Free Copper Blend**

VBA99 maintains its lightly brushed, pristine finish and does not oxidise or discolour like copper or brass does.

### **Lifetime protection without coating**

Unlike plated or coated finishes VBA99 is a copper-based metal material. There's no surface coating to wear-off!
