New Generation Surface Protection

BriteGuard Pro® is a new, end-user glass surface protection coating that is used in a single application, replacing the previous three-step process. It is a transparent coating for smooth glass and glazed ceramic surfaces which provides reliable protection against corrosion and dirt.

Pre-clean, apply, wipe dry – done!

BriteGuard Pro® is suitable for both interior and exterior applications by making the glass surface hydrophobic and therefore easy to clean. Contamination barely sticks to the surface and water rolls off so no aggressive chemical cleaning agents are needed.

- Save time with the easy one-step process
- No aggressive chemical cleaning products required
- Durable protection for up to 100,000 wipe cycles
- Easy handling with no auxiliary application devices needed
- 12-month shelf life from date of manufacture*
