Cero-Gel

Cero-Gel is a high quality polishing agent based on cerium oxide. It excels due to the amount of dirt and grime it removes and the high brilliance of polished surfaces. Cero-Gel was especially developed for the window and glass industry. Hairline scratches, the first signs of glass corrosion or stains caused by cement, concrete or silicone, can be easily removed. Cero-Gel can be applied using the Bohle felt polishing bob BO 5007901 together with a cordless drilling machine or, for larger surfaces, the Flex glass polisher BO 5300809 together with felt disc BO 5300811. For final polishing, we recommend Radora Brillant BO 5008003 or simply clean with water. Benefits: Handy aerosol can. Simple application and immediately ready to use. Polishing gel. No dripping, even on vertical surfaces. Can be applied in any position, 360°. Target groups and applications: Glaziers from trade and industry. Window manufacturers. Facade cleaners. Solar glass cleaner. Surface polish for glass, stone, ceramic and natural stone. Hairline scratch polish

XtraClean Cleaning Paste

XtraClean removes the most diverse types of contamination quickly and easily. It removes limescale from glass showers, cleans glass processing machines, and removes grinding residues, especially from satin-finished glass. XtraClean can simply be applied using a damp microfibre cloth. Higher temperatures will release more essential oils. This makes the use of the cleaning paste even more economic. XtraClean should be found in every workshop and is a useful companion on building sites. It can even be very helpful in your kitchen at home. Consumption approx. 5 kg/100 m². Suitable for uncoated glass, different metals and scratch-resistant surfaces. Not suitable for car paints! No irritant or corrosive ingredients. Contents 100 g

Glass Marking Products

Toughink

The Toughink marking system is for marking logos or safety marks on glass prior to toughening. The mark is produced using a small ink stamp and special ceramic ink. During the toughening process the ceramic ink is "baked" onto the glass leaving a permanent mark. The mark left is of similar appearance to a sandblast mark. Faxed/emailed orders only

Glass Processing Products

Master Belt Glass Grinding Machine

For precise edges, curved circular grinding or delicate arrissing work:
The Master Belt grinding machine is the ideal solution for demanding
grinding tasks. Thanks to its modular system, it can be expanded
or retrofitted at any time and is ideally suited for the most diverse
applications. The integrated stainless steel castor roller table enables
precise handling of larger glass panes. Master Belt ensures a consistently
high working result both for large grinding surfaces and minimal hollow
grinding. The machine is equipped with a water tray as standard and is
operated with an integrated coolant circulation system.
Extension tables not included.

- Dimensions (W x D x H) 1200 x 1170 x 1600 mm
- Abrasive belt dimension 100 x 1830 mm
- Castor roller table 1200 x 680 mm

Saveker Sliding Glass Tracking: Freeslide System, 6 mm

Suitable for 6 mm glass up to 1.5 m high, this system is available in polished aluminium, in 2 or 4 metre stock lengths. Glass panels are located with bedding strip into a runner section that incorporates either nylon or steel ball bearing wheels. These wheels run along a neat bottom track while the top of the glass is supported in the top track. This system is suitable for use in display cabinets, showcases or service hatches. The usual overlap allowed between two glass doors is 26 mm. For glass cutting sizes deduct 27 mm from the height of the opening. For safety reasons we recommend all glass should have polished edges. Please check with your glass merchant to ensure that the specification of the glass is suitable for the particular installation. To calculate the length of side channels or draught excluders deduct 47 mm from the opening height. The maximum recommended height to width ration of each door is 2:1.

Double Top / Side Track, 6 mm glass

Double top track/side channels can be used either to guide the top of sliding glass doors or for a sliding door to locate into at the side of the opening. Supplied drilled and countersunk for fixing, and available in polished aluminium, in 2 or 4 metre stock lengths. Priced per metre

Saveker Sliding Glass Tracking: Nylonslide, 6 mm

Suitable for 6 mm glass up to 1.5 m high, this system is available in polished aluminium, in 2 or 4 metre stock lengths. Glass panels slide on nylon rollers which are incorporated in the bottom track while the top of the glass is supported in the top track. The system is suitable for use in display cabinets, showcases or serving hatches. The usual overlap allowed between two glass doors is 26 mm. For glass sizes deduct 22 mm from height of opening. For safety reasons we recommend all glass should have polished edges. Please check with your glass merchant to ensure that the specification of the glass is suitable for the particular installation. For side channels or draught excluders deduct 38 mm from the height of the opening. The maximum recommended height to width ratio per door is 1.5:1.

Balustrade Systems: EasyMount

EasyMount 6020, 0.74 – 1.5 kN top mount

The EasyMount 6020 profile is the intelligent onward development of Bohle's popular EasyMount Top profile. By increasing the distance between pre-drilled holes, and by allowing the use of anchor bolts without a countersunk head, installation of the 6020 profile is both faster and much more cost effective.

For use in interior or exterior applications, it can withstand line loads of up to 1.5 kN. Glass mounting kits are available from 12 mm up to 21.52 mm. Slimline, elegant and low maintenance

- Drainage holes built into profile, or add spacers underneath
- Less fixings required to achieve 0.74 kN
  (mounting distances approx. 200 mm centres)
- For glass thickness between 12 mm – 21.52 mm

Convex Security Mirrors

Safety

Accident prevention is the key to industrial safety! Bohle Safety Mirrors are paramount in collision avoidance. When strategically positioned in warehouses, hospitals, factories or any other areas where the risk of collision is high, Bohle mirrors can significantly reduce human injury and stock damage.

Deluxe Half Dome Mirror

The new Deluxe Half Dome Mirror is designed for busy corridors and passageways at T-intersections to help avoid collisions. The lightweight vinyl back and lid enclose the cavity so that no dust, garbage or other objects can be left inside and will not require constant cleaning out. Ideal in hospitals, medical centres, office buildings, factories and schools, this new innovation is the most effective way to improve safety

Features: 900 mm and 600 mm Impact Resistant Acrylic Half Dome. 180° Viewing Area. Vinyl Celuka Back and Lid. Complete With Mounting Screws. Easy Installation. Easy Maintenance

Article No:	Size:	Price From:
BO 6100935	600 mm	£80.50 / pc
BO 6100936	900 mm	£131.00 / pc

Security Surveillance

Deter retail theft BEFORE it occurs! Bohle Convex Mirrors are one of the most cost effective and powerful deterrents to retail theft available. Bohle mirrors eliminate blind spots to allow staff or store security to constantly and inconspicuously monitor customers. With an estimated annual shrinkage of 1 – 2% of retail sales, financial losses for retailers from retail theft are huge, making Bohle Security Mirrors an invaluable investment.

Full Ceiling Dome

The Ceiling dome is one of the most effective methods of wide area surveillance due to its large 360° area of reflection. It is ideal for collision avoidance in warehouse and distribution centres and is a powerful deterrent to pilfering in retail situations. The dome comes complete with a suspension kit for optimal height positioning

Traffic

Blind corners, intersections and driveways can be death traps when the driver's field of vision is obstructed. Bohle Convex Mirrors extend the driver's view to enhance safety on our roads. Premium quality acrylic, aluminium and steel are used for Bohle mirrors making them extra durable for Europe's varied weather conditions.

Heavy Duty Mirror

This industrial quality mirror with its strong pin bracket can be either wall mounted or fitted to a post with our U-Bolt accessory packs. The premium quality mirror face is mounted on a vinyl back, with the mirror face sealed against moisture

BriteGuard® Pro Next Generation Surface Protection

BriteGuard® Pro is a transparent coating for all smooth glass and glazed ceramic surfaces which offers quick and reliable protection against corrosion. In addition, an easy-to-clean surface is created which makes it hard for dirt particles to adhere to it!

Pre-clean, apply, wipe dry, done! The coating is suited both for interior and exterior applications and lasts for many years. The coating makes the glass surface hydrophobic and therefore easy to clean. Contamination barely sticks to the surface and water rolls off – for this reason, aggressive chemical agents become unnecessary for cleaning. The coating of the glass is done manually. No large investments in auxiliary application devices required. Any silicone-free glass cleaner or suitable alcohol based cleaners can be used for pre-cleaning.

- Easy handling without high investment costs
- Suitable for interior and exterior applications
- Shelf life in original packaging: 12 months from the date of manufacture
