

Technical Data

Composition and Manufacture:

All Our steel components are galvanised to BS EN ISO 1461 as standard and can be powder coated in vast range of BS or RAL colours.

Our ranges of stainless steel components are available in Grade 304 stainless steel; or, for more aggressive environments such as industrial or coastal areas, Grade 316 stainless steel.

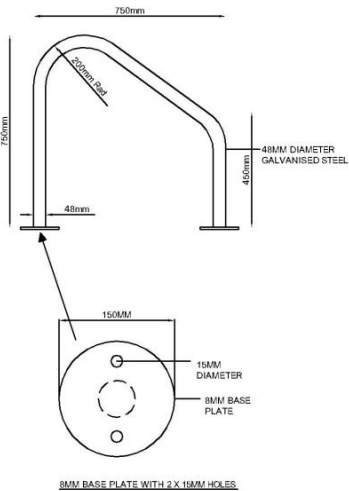

Size and Weight:

Along with our standard range of Shelters we also offer a bespoke design service, allowing our clients to create one-off unique shelters to suit particular project specifications. Our clients can choose a shelter that compliments the landscape and architecture of the surrounding area.

Our Bollards are available in a host of different sizes, designs and finishes. Bollard diameters range from 90mm to 245mm, the root depth and heights above ground can be specified by the client, giving you complete flexibility in design.

Site Work:

Bailey Streetscene employs its own highly experienced Installation team, allowing us to manage projects from Site survey to Installation. We also employ our own transport team allowing distribution throughout the UK.

Cad Drawings:

As an extra service we are able to supply fully dimensioned technical Cad drawings for all our products. We can also supply floor plans and layouts to help with the Installation of your products.
