

Bollards

Bailey Streetscene's range of bollards are created using a variety of materials, including – Steel, Stainless Steel, Cast iron, and Recyclable Plastic. Mild steel is the most popular material choice for bollards as it is strong, durable and vandal resistant whilst remaining simple to manufacture and extremely cost effective.

Product Code: BSS1215/101

Our range of stainless steel bollards are available in Grade 304 stainless steel; or, for more aggressive environments such as industrial or coastal areas, Grade 316 stainless steel. Stainless steel bollards create an image of prestige and quality.

Product Code: BSS1000/139

Bailey Streetscene steel bollards range from lightweight, decorative bollards to larger-diameter, anti-ram bollards used to protect pedestrians and buildings from moving vehicles.

Product Code: Various

Cast Iron has always been a popular material choice with architects and specifiers for heritage sites and parks. Available in traditional and contemporary designs cast iron bollards have the benefit of both strength and beauty.

Product Code: BSC206674

Our range of fold down bollards and posts can add an extra level of security to buildings as well as being convenient for reserving parking space or controlling access.

Product Code: BSS1335

Polymer bollards are generally only two thirds the weight of their cast iron equivalent, they do not corrode, will not shatter on impact, and are extremely low maintenance.
