

Cycle Stands

Bailey Streetscene can provide a wide selection of low cost cycle stands for many different applications. The range features Stainless Steel, galvanised steel and powder coated designs which are attractive and hardwearing enough to withstand even the harshest weather conditions. Our cycle racks complement the landscape and architecture of the surrounding area and improve the quality of life for both residents and commuters.

Mild Steel

Steel is the most popular material choice for Cycle Stands because it gives a strong, durable and vandal resistant solution whilst remaining simple to manufacture and extremely cost effective.

Our steel Cycle Stands are galvanised to BS EN ISO 1461 as standard and can be powder coated in vast range of BS or RAL colours.

We also manufacture Stands to our clients' specifications, allowing our customers the freedom to choose the precise height, diameter and design to suit their particular project requirements.

Stainless Steel

Bailey Streetscene's range of stainless steel Cycle Stands are available in Grade 304 stainless steel; or, for more aggressive environments such as industrial or coastal areas, Grade 316 stainless steel.

Stainless steel Cycle Stands have become more popular with architects and specifiers in recent years as the trend in street furniture changes to a more modern, contemporary look.

Stainless steel Cycle Stands are very low maintenance requiring only occasional cleaning with warm water and soap or a mild detergent.
