

BALMORAL CYCLE SHELTER

Combine Premium Security With Bespoke Designs

The Balmoral Cycle Shelter redefines premium bike storage by combining robust security with bespoke design flexibility. Constructed from an 80mm box-section mild steel frame and hot-dipped galvanised to BS EN ISO 1461:2022 standards, it ensures long-term durability while maintaining a sleek and modern design. Unlike our timber-clad shelters, the Balmoral features perforated mesh cladding, which strengthens security and allows for unlimited customisation, from intricate patterns to corporate branding and logos. Optional sedum green roofing adds a sustainable touch, enhancing environmental credentials while blending shelter seamlessly into landscaped scapes. Ideally suited for architects, contractors, and specifiers, with everything needed for seamless project integration. The Balmoral delivers a cycle storage solution that is as practical as visually appealing.

- › **Premium Security:** 80mm box-section mild steel frame with perforated mesh cladding for robust, long-lasting protection
- › **Customisable Design:** Perforated panels allow unlimited design variations, including patterns, branding, or logos
- › **Durable Finish:** Hot-dipped galvanised to BS EN ISO 1461:2022, with optional powder-coated RAL colours
- › **Made in Britain:** Manufactured to the highest UK standards, ensuring sustainability and quality assurance
- › **Optional Sedum Green Roofing:** Available with eco-friendly sedum green roofing for sustainable cycle storage
- › **Architect-Friendly:** Supplied with technical drawings, CAD files, and other specifications for seamless project integration

Bespoke dimensions available to fit your exact specifications

BALMORAL CYCLE SHELTER

The Balmoral Cycle Shelter delivers secure, weather-protected bike storage with a premium architectural finish. Built from hot-dipped galvanised mild steel, it features perforated mesh cladding for bespoke designs, branding opportunities, and enhanced security. With custom RAL colours, optional sedum green roofing and flexible layouts, it's the ideal solution for commercial, residential, and public sector projects.

Customisation that Works for You

Every site is different which is why this shelter is built to adapt:

- › Dimensions are bespoke and built to suit any requirements
- › Hot-dipped galvanised to BS EN ISO 1461:2022 material
- › 80mm SHS box section framing
- › Roofing options include standard steel or optional sedum green roofing upgrade
- › Perforated mesh cladding (customisable patterns, motifs or branding available)
- › IP65-rated LED PIR lighting available

Lead Times

FINISHING OPTIONS

656 Security Twin Wire Mesh (supplied as standard) is a durable and secure option for bike storage shelters, featuring dual horizontal wires for enhanced strength and rigidity. This robust design prevents vandalism while maintaining clear visibility, making it ideal for public spaces, schools, and workplaces.

10 Gauge Mesh is a durable and secure option for bike storage shelters, offering robust protection against theft and vandalism. Its strong, welded steel construction provides excellent visibility while maintaining high security. This mesh is a cost-effective, long-lasting solution designed to withstand the elements and provide peace of mind for end users.

358 Mesh also known as anti-climb mesh, is a high-security option for bike storage shelters designed to prevent tampering and unauthorised access. Its narrow apertures and robust steel construction make it extremely difficult to cut or climb, providing superior protection against theft and vandalism.

Our **Perforated Mesh Cladding** provides a modern, durable, and secure finish for bike storage shelters. Designed for strength and ventilation, the steel panels offer excellent visibility while maintaining a sleek aesthetic that complements any site. The perforated design enhances airflow, reduces wind resistance, and delivers a clean, contemporary look.

PROJECT

Hayes Business Park, Nestles Avenue

Nestles Avenue, a bustling urban hub, faced the challenge of providing adequate cycle storage facilities while adhering to high sustainability standards. The project included cutting-edge storage units in various locations within the avenue, ensuring functionality and eco-friendliness. Challenges faced during this project, including limited space availability, necessitated the design of compact yet spacious cycle storage units to accommodate several bicycles. Secondly, security requirements ensuring the safety of bicycles demanded the integration of robust security measures into the design. Lastly, we committed to sustainability and environmental responsibility; the project solutions are aligned with BREEAM compliance standards.

Our solution included drawing upon our expertise and crafting bespoke cycle storage solutions, tailored to Nestles Avenue's specific requirements. These solutions comprise various innovative products that maximise space utilisation, enhance security and promote sustainability. The main product for this installation was the Balmoral Cycle Shelter, which incorporated hot-dipped galvanised to BS EN ISO 1461:2022, with frames with polyester powder-coated finishes and Toastrack Cycle Racks. This shelter features perforated mesh cladding for enhanced durability and security. Made in Britain and BREEAM compliant, the Balmoral offers optimal functionality paired with sedum green roofing to minimise environmental impact and green credentials..
