

Barrial[®] rooflight safety

Ready-to-install rooflight guardrails penetration-free

Modular, versatile, penetration-free

- ✓ No danger from falling debris
- ✓ Retrofit at any time for permanent fall protection
- ✓ Ballasted, without penetration of the roof
- ✓ Rapidly assembled - pre-fabricated and modular construction
- ✓ Height adjustment of the posts pitch to fall compensation
- ✓ Variable sizes
- ✓ Access quotes for escape hatches

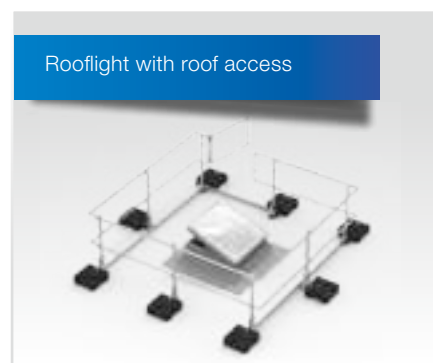

Highly simplified rescue concept

Standard fencing for rooflights with a skylight function.

Variable sizes with sufficient free space for opening rooflights and smoke-heat extractors.

Self-closing gate for securing rooflights with an exit function.

Manufacturer's certification according to DIN EN 1090-1

Our in-house production control guarantees consistent quality and compliance of our products with standards or static proof. dani alu GmbH is certified according to EN 1090-3 for building products: aluminium supporting structures and construction kits up to EXC2.

Tested and certified

DIN EN 13374 Classe A
