## Product Description:

Our range of protection board products is manufactured from strong corrugated polypropylene to provide long-lasting protection for windows, doors, stairs, walls and floors.

Lightweight and strong, the plastic sheets are tear, puncture and impact-resistant. They can be cut, curved and creased to fit any surface offering complete surface protection for a

variety of applications during refurbishment, building and construction projects.

Available in 2, 3 and 4mm thick sheets and a variety of sizes as well as flame retardant. The 2m x 1m sheet is ideal for the protection of doors.

## Benefits:

- Provides efficient protection from knocks, scratches and spills
- Lightweight and flexible
- Quick and easy to cut, crease and curve
- Durable and reusable
- 100% waterproof
- Personalised logo printing available (minimum quantities apply)
- Available in white, translucent, black, flame retardant and a variety of sizes and formats.
