Flashing Manufacture

FABRICATION:

Britfab Ltd pride themselves in providing Quality products.

Offering a manufacturing service of simple pressings to complex fabrications.

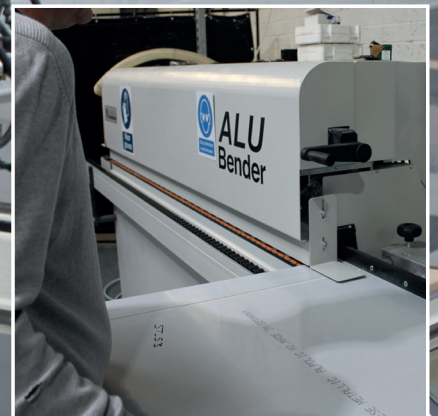

Standard Materials include: - Aluminium mill finish, pre-coated and post coated; Light gauge Steel, Galvanised Steel, Trocal, Membrane and pre-coated Steel sheeting (Leathergrain/PVF2/Prisma).

Our aim is to provide a quick affordable and friendly service that caters for most fabrication requirements.

Service is key and is one of our companies main drivers to ensure customer satisfaction and continued repeat business.

Our modern manufacturing facility based in Irvine boasts the following capabilities:

- Schechtl Bending machine MAB310/CNC S-Touch
- Schechtl Guillotine Shear MSC 310BV
- CSALU Casedie Alu Bender
- XYZ CNC Routing Machine 6030 Series with Vacuum Bed with 9m bed and pendulum motion capacity

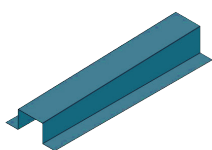

Materials

Our flashings are available in a range of materials including aluminium, light steel, galvanised steel, trocal membrane and leathergrain.

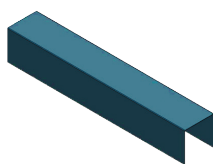

All available in a wide range of colours in either PPC, Mill Finish or Pre-Coated.
