

The only emergency and communal lighting system designed to meet your buildings' specific needs

SIMPLE BS 5622 COMPLIANCE

Always compliant, every Commulite luminaire is an emergency light fitting, providing safe light levels in any power loss situation, even after a full statutory three-hour test.

REMOTE MONITORING, TESTING AND REPORTING

Unique remote monitoring system makes all emergency light testing a simple, reliable and fully auditable process, without even visiting the site. Saving energy, carbon and time.

SUPERIOR EMERGENCY LIGHTING PERFORMANCE

Commulite provides bright and uniform lighting for up to 9 hours in emergency mode (even when the sprinklers come on). Enough to get residents safely through the night in a power out situation.

ENERGY EFFICIENCY & SUSTAINABILITY

Optimum efficiency is ensured using ultra-efficient LEDs with individually adjustable switching times and light levels, for minimum energy use and no dark corners.

MADE IN BRITAIN, we take the circle economy seriously all parts designed to the highest standard for guaranteed long life and can be completely recycled.

ZERO MAINTENANCE & 7 YEAR WARRANTY

Our fittings require no maintenance. This means we can offer an unrivalled, comprehensive 7 year zero-maintenance warranty, covering ALL parts and labour with on-site attendance guaranteed.

DESIGN CERTAINTY

Our design ensures light levels comply with the CIBSE guides for lighting and BS 5266 for emergency lighting.

We provide detailed drawings of our system in Dialux, Revit and AutoCAD file formats.
