

# Optimising AHU Design for Energy Efficiency & Carbon Footprint

## A Daikin Applied UK CPD

This CPD is designed for Engineering Consultants, M&E Contractors, Facilities Managers and NHS Trusts with the aim of raising general awareness and understanding in the following topics:

- ✓ What is meant by energy efficient AHU design.
- ✓ Current legislation impacting design.
- ✓ How an AHU works.
- ✓ How components can be optimised for energy efficiency.
- ✓ How the overall system can be optimised, plus an energy & cost analysis.
- ✓ Challenges with design expectations that compromise energy efficiency.
- ✓ How Daikin Applied (UK) AHUs are optimised for energy efficiency and carbon footprint.

Expected duration: 75 minutes including discussion

This CPD can be delivered at your place of work or remotely.
