

The Importance of Protecting Car Park Structures

Overview:

This CPD seminar covers some of the common methods of waterproofing car park structures such as polyurethane, asphalt and polymethyl methacrylate along with their benefits and pitfalls.

Participants are also provided with key guidance when specifying resin waterproofing for multi-storey car parks such as slip-resistance and fire safety.

The seminar also discusses what manufacturers can do to assist in sustainable architecture to minimise environmental impact.

Who will benefit?

This program is for architects and specifiers, designed to help you make informed product and system choices on your upcoming car park projects.

Learning Outcomes:

- Understand the history of car parks
- Understand car park structures today
- Understand car park waterproofing systems
- Understand key considerations when specifying car park waterproofing
- Understand correct cleaning and maintenance

Programme:

RIBA Core Curriculum: Design, Construction and Technology

Course Duration / Location:

1 hour | Online or in-person seminar
