COLOURS TO SUIT ANY IMAGINATION

LET'S CHASE RAINBOWS

We know appearance matters every bit as much as performance and design.

As your customers try to find the finish that really enhances their home, architects demand colours to complement their vision and planners specify the shades that suit the special nature of their locality. We see this as something to be celebrated. **The simple truth is that people love colour. They love choice - and choice sells.**

When your customers are chasing rainbows, you need a rainbow to offer. You need a whole forest of different timber effects. You need a whole palette of cloudy grey skies. You need natural tones, bright primaries, flat finishes and textured finishes. You need dual-coloured options in combinations you would never have imagined and foils guaranteed to hold their colour and keep their looks for a long, long time. That's why you need Spectus.

We'll help you to satisfy the craving for colour. We're offering more choice than ever before, more colours and finish combinations from stock and more options made to your special order.

So, get out there. **Enjoy the beautiful benefits of a more colourful world.**
