# PACKED CONSTRUCTION GRAVEL & AGGREGATES

*Full range of high quality aggregates for use in a wide variety of large and small building and construction applications. Manufactured to the highest standards and all CE marked.*

*Sizes available*

*(56 large poly bags per pallet)*

To find out more about our range of PACKED PRODUCTS and the best solution for your project call **03444 63 64 65**

## LIMESTONE

Available in 6mm, 10mm and 20mm grades for use as a concreting aggregate.

## DUST GRANO 6MM

Grano (6mm - dust) for use in mixing with cement to make fine concrete. Place on top of a new concrete surface and polish for a tough finish.

## GRAVEL

Manufactured specifically for building use and general construction work such as drainage and making concrete. Our gravel is available in 4 sizes 6mm, 10mm, 20mm and 40mm.

## BALLAST

A mixture of sand and either 10mm or 20mm gravel commonly used in mixing coarse concrete. Can also be used in bedding drainage pipes and as a sub base.

## CRUSHER RUN

A combination of crushed rock and stone dust to create a very low-void content sub base aggregate. Available in 20mm and 40mm

## GRANITE

Pure crushed granite ranging in size from 2-6mm. Used for making concrete or as a bedding layer for block paving applications.

## MOT TYPE 1

Crushed aggregate from 40mm to dust. Ideal as a sub-base for driveways and paths when compacted, with excellent load bearing properties.

## RAIL TRACK BALLAST

Rail track ballast serves as a bed for rail tracks and provides the drainage and strength needed for heavy loads carried by trains.
