Together for better

www.reynaers.co.uk

Harmony between inner and outer spaces

Be reassured with Reynaers

With an enviable reputation for superior product quality and more than 60 years' industry experience, you can rest assured that Reynaers has a longstanding tradition in providing high-performance glazing solutions for a host of residential and commercial applications – not just in the UK, but in more than 70 countries around the world.

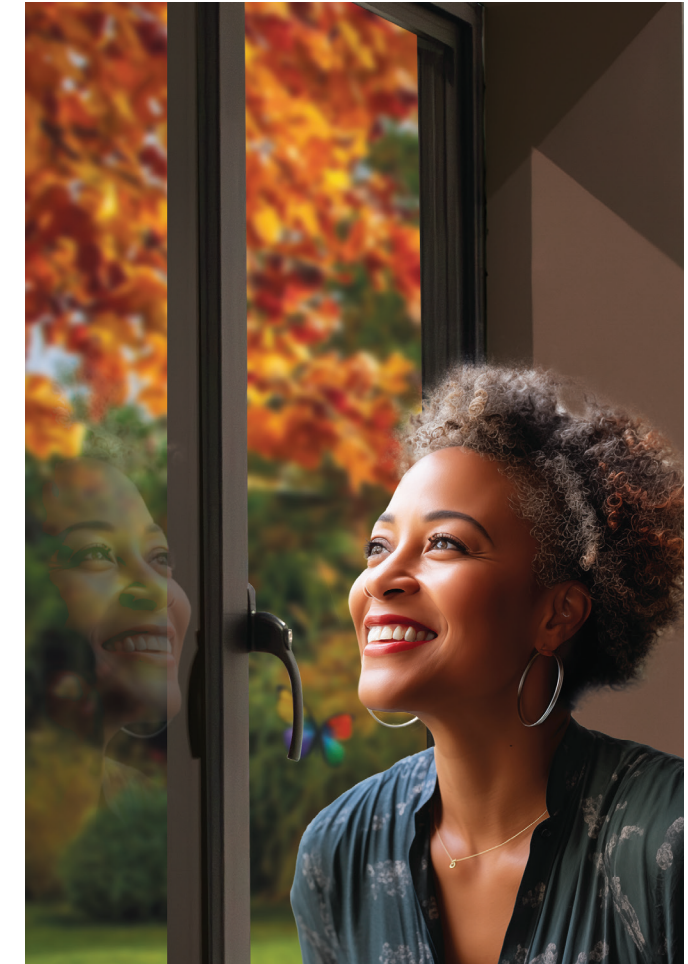

Whether building a new home, extending, or upgrading your windows and doors, our precision-crafted contemporary aluminium windows and doors combine sleek design with superior performance to elevate the ordinary into the spectacular.

As an environmentally responsible business, sustainability is central to everything we do. That's why we've pledged to halving emissions by 2030 and design energy-efficient glazing solutions that support low-carbon living. We're also proud our targets are officially recognised by the Science Based Targets initiative (SBTi), outlining our commitment to reduce our carbon emissions.

Engineered without compromise, Reynaers aluminium window and door systems have been specified time and again by the world's leading architects and construction companies, for some of the most iconic building projects.

Our network of carefully selected retail partners will guide you through your home transformation process, from the initial design and specification stages through to the supply and installation of your bespoke aluminium window and door systems.

When only the best will do, trust Reynaers to deliver.

The smart choice:

Aluminium's performance advantage

Aluminium windows and doors offer homeowners a clear performance advantage over conventional materials. With enhanced levels of thermal efficiency, security and weather resistance, aluminium window and door systems deliver the perfect blend of elegance, sustainability, and strength.

With rising energy costs and growing environmental awareness, choosing aluminium is not just a style decision - it's also a smart investment in your home's future, offering exceptional thermal insulation and long-term energy efficiency.

Aluminium windows and doors combine sleek, slimline frames with exceptional structural strength, enabling a more expansive glass area with minimal visible framing. This ensures uninterrupted views, more natural light, and a cleaner, more sophisticated aesthetic.

Aluminium windows and doors are also available in a wide range of contemporary and classic colour choices, and finishes, to complement a range of architectural styles.

The benefits of aluminium

Architect: CULD en Inbo
Fabricator: Hermeta Gevelbouw

Energy-efficient by design

Industry-leading thermal insulation helps reduce heat loss and lower energy bills, keeping your home comfortable year-round.

Built to last

Aluminium is exceptionally strong and resistant to warping, corrosion, and UV damage, ensuring long-term performance and aesthetic appeal.

Sustainably superior

Aluminium is 100% recyclable, making it one of the most environmentally responsible choices available.

Maximises natural light

Slimline aluminium frames allow for larger panes of glass, flooding your home with light and creating a sense of space.

Enhanced home security

The strength of aluminium improves home security, with many Reynaers systems certified to PAS 24 or Secured by Design standards.

Tailored to your taste

Choose from a wide range of contemporary or classic colours and finishes to complement any architectural style.

ConceptPatio 130

Effortless elegance. Sleek, modern design.
Engineered for excellence.

Designed for discerning homeowners, this premium aluminium sliding door solution combines smooth, quiet operation with striking architectural impact.

Its slim mid-section maximises glass area for uninterrupted views and brighter living spaces, while outstanding thermal insulation ensures year-round comfort and energy efficiency.

Choose from standard or lift-and-slide options- including the breathtaking open corner design that removes fixed posts to truly blur the lines between inside and out.

With window panels up to 2.7m in height, the ConceptPatio 130 delivers impressive scale without compromise.

Enhanced security, weather resistance, and the option to integrate discreet ventilation make it a sound investment in modern living.

Product highlights

- Slim, elegant design
- Minimal sightlines maximise glass and light, enhancing views and space
- Smooth, effortless operation
- Available in slide or lift-and-slide variants
- Open-corner option for stunning, panoramic views
- Safe and secure with ‘Secured by Design’ accreditation and ‘PAS 24’ certification
- Uw-value as low as 1.4W/m2K
- Can achieve Door Energy Rating band ‘C’

MasterPatio

Where minimalist design meets advanced performance

MasterPatio represents the next generation in luxury sliding door systems. Its slim aluminium profiles and industry-leading sizes create stunning glazed features with uninterrupted views and a seamless connection to the outdoors

The sleek design will also suit any traditional or modern property, leaving a long-lasting impression on your guests.

With superior thermal insulation and the use of recycled components, MasterPatio offers outstanding energy efficiency without compromising on sustainability.

Its patented glass supports also ensure smooth, effortless operation - delivering not just elegance, but improved practicality for everyday use.

Both the Lift-and-Slide and Slider variants can be combined with motorisation technology to provide ultimate comfort and effortless operation.

Product highlights

- Offers the very latest in contemporary design with an ultra-slim frame
- Exceptional performance in respect to thermal insulation, weather resistance, noise reduction and security protection
- Industry leading maximum sizes
- Extensive range of opening types
- Double- and triple-glazed options
- Safe and secure with 'PAS 24' certification
- Can achieve Door Energy Rating band 'B'
- Uw-value as low as 0.8W/m2K

PART OF THE HERITAGE COLLECTION

ConceptSystem 77

Precision-crafted for style, strength and enduring performance

Stylish, secure, and superbly engineered, the ConceptSystem 77 is a great all-round performer in terms of thermal insulation, weather resistance and security.

The ConceptSystem 77 incorporates a comprehensive range of inward- and outward-opening window and door designs that are available in three alternative

styles, making it an ideal choice for both contemporary and traditional properties. Available with a huge variety of colours and finishes, and the option to specify a different colour inside and out, the ConceptSystem 77 is a truly versatile system that can complement almost any architectural style.

Product highlights

- Great, all-round performer for thermal, acoustic and weather-sealing performance
- Three design variants to suit traditional or more contemporary style properties
- Extensive range of colour options and finishes

- Double- and triple-glazed options
- Strong and durable, with low maintenance requirements
- Safe and secure with ‘Secured by Design’ accreditation and ‘PAS 24’ certification
- Can achieve Window Energy Rating band ‘B’

PART OF THE HERITAGE COLLECTION

SlimLine 38

Timeless style.
Unrivalled capabilities.

The SlimLine 38 range is a highly insulated aluminium window and door system that combines ultimate comfort with minimalistic, classic design.

Suitable for both new builds and renovation projects, the system offers a timeless 'steel-look' that is both slender yet sturdy, maximising natural sunlight with its

ultra-slim sightlines. Combining superior insulation with durable materials and a sleek, modern design, the range offers the ideal balance of style and reliability for your home. Upgrading from steel-framed to slim aluminium windows can also significantly improve security, energy efficiency, weather resistance and noise reduction.

Product highlights

- Replicates 'steel-look' windows and doors, ideal for traditional home renovations, with a variety of styles
- High levels of comfort, with excellent acoustic and weather-sealing performance ratings
- Industry-leading maximum sizes offering improved flexibility in design
- Strong, durable, and low maintenance
- Double and triple-glazed options
- Easy-clean egress hinge option
- Achieves 'Secured by Design' and 'PAS 24' enhanced security standards
- Ultra Slim variant, in single or double door configurations, with inward and outward opening options
- Can achieve a Door Energy Rating band 'A++' (Double Leaf)
- Uw-value as low as 0.96W/m2K
- High Insulation+ window variant combines slim aesthetics with Passive House insulation levels

The finishing touches...

Pick your colour

Your style deserves to shine through, even in the smallest of details. That is why we offer over 900 RAL colours in various finishes to create the perfect final touch for your aluminium glazing.

Combine your favourite colour with a metallic, anodised, matt, gloss, wood look or even a special low-maintenance and scratch-resistant structure finish.

With an inspired range, you can choose from the latest colour trends as well as the timeless classics.

Find your finish

And what if the colour of your interior doesn't quite match the outside?

Then we offer two colour profiles, coating the inside and outside in different colours, allowing you full flexibility. Just ask your Reynaers installer for **'Dual Colour'**.

Anodised
An anodised finish puts the aluminium in the spotlight, and gives it a different look depending on the time of day or the seasons. It also offers excellent protection against aggressive environments near the seaside, pools or city centres.

Wood
Our Wood Look coating layers combine the typical warm appearance of wooden frames with all the benefits of aluminium solutions.

Structure
Combine your favourite colour with clean aesthetics and user-friendliness. This coating brings more texture and is scratch-resistant, which makes it the ideal low-maintenance solution for adventurous children or playful pets.

Choose the right handles

Door pulls
A great first impression

- Premium quality, elegant design
- Modern alternative to traditional handle designs
- Available in all RAL colours including textured, and anodised

Touch
Timeless and versatile

- One stop shop for all entry door components
- Range of designs and finishes to choose from
- Possibility to combine with complementary products, such as finger print scanner

Contour
Modern safety

ABOUT REYNAERS ALUMINIUM

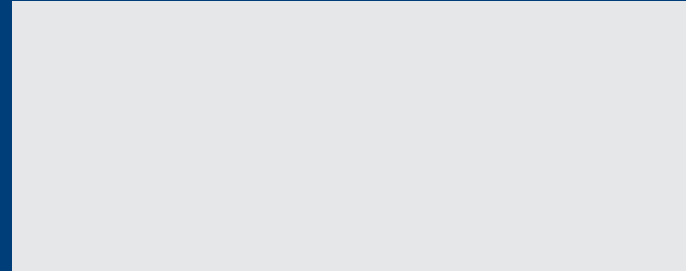

“Our goal is to increase the value of buildings and to enhance the living and working environment of people worldwide.”

As part of the Reynaers Group, Reynaers Aluminium is a leading specialist in the development, distribution and commercialization of innovative and sustainable aluminium architectural solutions. These include a wide variety of window and door systems, curtain walls, sliding systems, and verandas. Besides the extensive range of standard solutions, we also develop customized solutions, tailored to the individual customer or project.

Based in Birmingham, Reynaers is ideally placed to support projects across the UK. Alongside its Knowledge Centre and warehouse, Reynaers' showroom provides a space for customers to explore products and receive hands-on training. Part of Reynaers Group (headquartered in Duffel, Belgium), the building envelope specialist is active in more than 70 countries and currently employs more than 2,600 people worldwide.
