# Economical Solutions

## Bespoke Service & Maintenance Packages

Daikin Applied Service offers full after-sales support for the maintenance and repair of ALL brands of HVAC systems including, chillers, Air Handling Units and split Air Conditioning and VRV, as well as remote monitoring and management even for the most critical installations.

Operating 24/7 throughout the UK, Daikin Applied Service offers world leading end-to-end service solutions for Facilities Managers and engineering professionals within the HVAC community. Daikin Applied Service are also well positioned to assist commercial clients with any Ground or Air Source Heat Pump service and maintenance requirements.

### Service capabilities

- › Flexible maintenance contracts
- › 24/7 Emergency call out service
- › 4 hour response time
- › Site dedicated service engineers
- › F-Gas Register
- › Daikin on Site remote monitoring
- › On site training for 'front line' service requirements
- › Agreed service level requirements
- › Full chiller running logs taken on every service visit
- › Full spares availability & management
- › Retrofitting & refurbishments

### Benefits

- › ALL manufacturers HVAC equipment maintained
- › Lower energy use for maintained systems
- › Reduce breakdown costs and business impact
- › Tailor made packages to suit your business needs
- › Extends the useful life-cycle of assets decreasing the need for capital replacements
- › Equipment downtime is decreased and the number of major repairs are reduced

### Our Customers

# Reduce Building Energy Costs

## Complete service and energy solutions

Daikin Applied Service can provide a total service solution to include energy efficiency packages, that are self financing with short term payback periods, where HVAC equipment replacement is not an option.

We can optimise your buildings' overall efficiency and energy performance through our total service solution that incorporates managing plant replacement from project inception through to design, installation and commissioning, plus building energy rating surveys, as well as building management system (BMS) advice.

## Pro-active maintenance

We understand that your HVAC equipment plays a crucial role in the smooth running of daily operations. Modern systems provide not only cooling, but heating, humidity control and air quality. All these factors are fundamental in providing an effective and efficient working environment. It is therefore vital that your equipment is operating at peak efficiency at all times.

## Retrofitting and refurbishments

Many ageing chillers can benefit from modernisation with upgrades and modifications to improve operation and efficiency, so that equipment can continue to provide years of dedicated cooling.

Where HVAC equipment replacement is not an option, we can optimise your buildings' overall efficiency and energy performance through a bespoke programme by:

- › Equipment servicing and surveys
- › Plant and equipment replacement
- › Installation and commissioning
- › Energy efficiency packages
- › Building energy rating surveys
- › Self-financing with short term payback periods
- › Building management system (BMS) advice

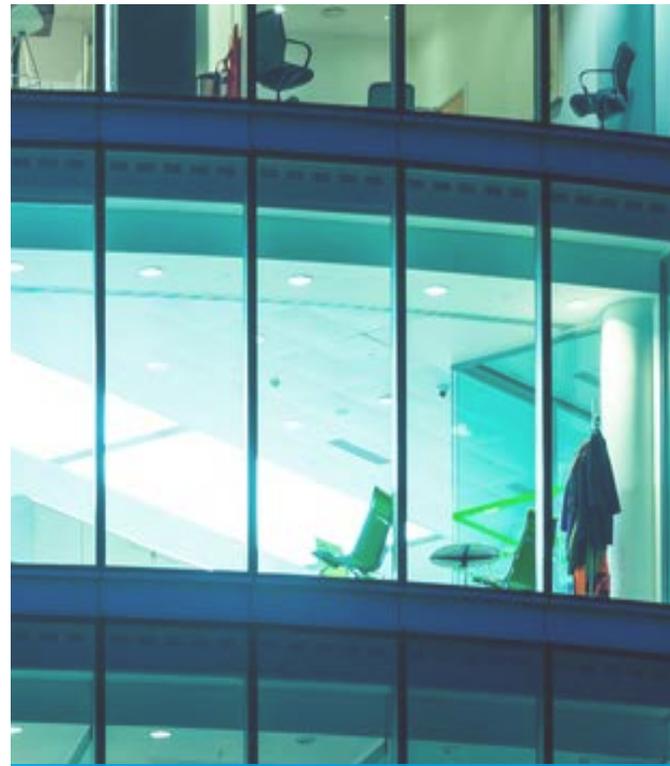

## Health & safety

The health and safety of our people and customers is our number one priority. Our staff undertakes extensive, on-going training to ensure they understand how to create a safe working environment. We are dedicated to creating a challenging and rewarding working environment for all of our people, backed up with award-winning training.

## Accreditations

## Animal Health Trust

***“ Daikin Applied Service  
have provided 17 years  
of excellent service  
supporting the chilled  
water package which  
provides critical cooling  
to our environmentally  
controlled building.  
Without this support we  
would have been unable  
to ensure the success of  
various studies in the past  
years...”***
