THE NATURAL CHOICE

Decorative Products Guide ISSUE 1

INTRODUCTION >

Established more than 260 years ago and with 10 nationwide depots as well as showrooms in London and Manchester, James Latham is the UK's biggest independent distributor of decorative surface solutions.

From solid surface, laminates, melamine and veneers to thermoplastic, our decorative products portfolio has been created specifically for the specification sector and with architects and designers in mind.

This outstanding collection includes some of the most recognised surfacing brands in the World, many of them on an exclusive, or semi-exclusive basis, all available directly from stock and through a single-source supplier.

Whatever your budget or project requirements, why not allow our extensive range to provide the inspiration.

Decospan - Shinnoki	21-22
Decospan - Querkus	23-24
Decospan - Nordus	25-26
Garnica	27-28
Wisa	29-30

valchromat

by Investwood

Valchromat is a decorative wood-fibre panel product which is coloured throughout. The fibres are coloured individually, impregnated with organic dyes and bonded together by a special resin giving Valchromat its unique physical and mechanical features. It is an evolution of MDF (Medium Density Fibreboard) and is superior to coloured MDF.

Features:

- Moisture resistant
- Greater internal cohesion and therefore, higher mechanical strength
- Can be worked in three dimensions
- Greater resistance to bending
- Requires less effort to finish
- Ensures a lower abrasion of tools
- Moisture resistant

Valchromat Fire Retardant is also available (EN 13501, it is classified as B-s2, d0)

* The panel is supplied unfinished. We recommend an acrylic based varnish or, with caution, a water-based varnish, some of which you can get as low as 3% sheen. Alternatively, a true hard wax oil or wax oil can be used

Colours

Light Grey | Grey | Black | Chocolate Brown | Yellow | Orange | Red | Violet | Blue | Green Mint

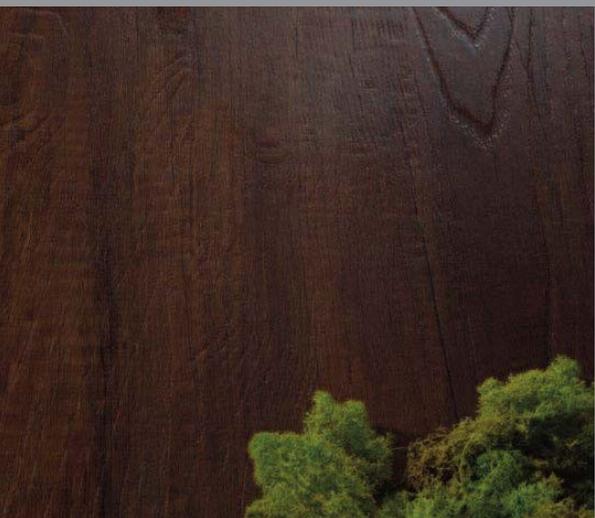

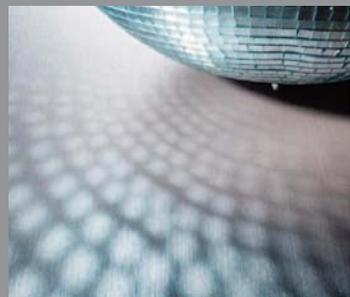

Dimensions and Thicknesses

Dimensions (mm): 2440 x 1220 | 2440 x 1830 | 3660 x 1220 | 3660 x 2440

Thicknesses (mm): 8 | 12 | 16 | 19 | 30

Applications:

- Furniture
- Wall Cladding
- Partitioning
- Flooring
- Doors
- Kitchens, Bedrooms and Bathrooms
- Restaurants, Bars & Hotels
- Exhibition Stands
- Shopfitting

XYLOCLEAF

thermo structured surface

Designed and manufactured in Italy, XyloCleaf is a highly original and exclusive range of decors which are created using a unique process of thermal fusing in which decorative papers are treated with melamine resins, that under heat and pressure become part of the panel itself. This process provides not only a stunning end result, but also a product that is strong, durable and highly scratch and chemical resistant, meaning that as well as looking great, it will stand up to the toughest of challenges when used in high traffic areas.

Features:

- Available as both melamine and laminate boards
- Available in woodgrains and linens
- Strong and durable
- High scratch and chemical resistance - ideal for high traffic areas
- ABS Edging as standard

Applications:

- Aircraft interiors
- Healthcare
- Retail
- Education
- Hospitality
- Leisure

Colours

For full details, swatches and samples, contact your local James Latham depot or showroom - www.lathamtimber.co.uk

Dimensions and Thicknesses

Supplied in melamine panel sizes of 2800 x 2070 x 18mm and laminate in 3050 x 1300x0.8mm with matching ABS edgings

KYDEX®

THERMOPLASTICS

KYDEX® 3D thermoplastic gives designers the ability to incorporate compound corners and contoured edges, logos and 3D texturing whilst eliminating unsightly seams and the need for edge banding typically associated with HPL/TFM surfaces. Its high impact resistance minimizes costly maintenance associated with the other membrane pressed and flat laminates. Solid colour throughout makes it especially durable for door facings and counter tops.

Features:

- Available in a range of standard colours, metallic and wood grains.
- Custom match colours and printed face designs available.
- Tough stains, scuffs, and graffiti can be removed using strong cleansers without staining, fading, or surface damage.
- Easy to cut and machine with conventional woodworking machinery
- Will flex and form curve with very little resistance
- Easy to post-form without specialist machinery
- Solid colour throughout - no unsightly joint lines
- No other thermoplastic sheet stands up to impact, scratching, and gouging like KYDEX® sheet.
- Numerous grades available to provide properties and certified ratings required for specialised applications.

Colours

For full details, swatches and samples, contact your local James Latham depot or showroom - www.lathamtimber.co.uk

Dimensions and Thicknesses

Sheet size: Standard 0.76mm x 1447mm x 3047mm / Standard 2mm x1220mm x 2440mm / Custom sizes and thicknesses available

Thickness: 0.76mm to 10.17mm

Applications:

- Aircraft interiors
- Healthcare
- Retail
- Education
- Hospitality
- Leisure

AE CORE

An inspirational collection of innovative thermoplastic laminate, boasting a number of unique advantages in just one material. Created and manufactured in Milan, the range comes in countless finishes, from realistic wood grains and stones to on-trend decors in the new super matt, anti-fingerprint and repairable texture of Serica; making it the ideal material for covering almost any internal or external surface.

Features:

- Available as both melamine and laminate boards
- Highly durable
- Synchronised woodgrain, soft touch effect and anti-fingerprint surfaces available
- Easy to cut and machine with conventional woodworking machinery
- Will flex and form curve with very little resistance
- Easy to post-form without specialist machinery
- Solid colour throughout - no unsightly joint lines
- Fully three-dimensional

Applications:

- Residential and contract furniture
- Kitchens, Bedrooms and Bathrooms
- High-end commercial, leisure and hotel specifications
- Doors
- Exhibitions

WISA Birch Premium

WISA[®]

WISA-Birch Premium is the perfect choice when a beautiful, light visual look is desired without compromising strength properties. It makes a good base for different surface treatments such as lacquering, varnishing and wood staining. It is therefore ideal when used for visually demanding applications and end uses, such as furniture and interior lining applications.

Features:

- Naturally beautiful
- Strong and light
- Wide size and thickness range available with strict tolerances
- Meets E1 formaldehyde emission requirements (EN 120:1992)
- PEFC certified and CE marked

Applications:

- Decorative coverings for walls
- Furniture
- Interior linings
- Caravans
- Commercial, hospitality, residential
