Building aggregates

We supply a range of bagged aggregates for use by the building trade and garden landscapers.

- **BUILDING SAND** - A soft mortar sand for use in bricklaying and pointing where a smooth finish is required.
- **GRAVEL 10MM** - Suitable for pathways and drives as well as in the production of fine concrete when a smooth finish is required.
- **GRAVEL 20MM** - Suitable for pathways and drives as well as in the production of fine concrete when a smooth finish is required.
- **RAPID SET POST MIX** - A rapid set concrete mix that is good when fixing posts where a quick-setting mix is required.
- **TYPE 1** - used as a sub-base for highways, car parks, footpaths, driveways, hard standings and building bases.
- **ALL-IN BALLAST 10MM** - A careful blend of 10mm gravel and washed concrete sand for use in producing a fine concrete mix when mixed with cement.
- **ALL-IN BALLAST 20MM** - A blend of 20mm gravel and washed concrete sand for use in producing a coarse concrete mix when mixed with cement.
- **KILN DRIED SAND** - A fine dry silica sand used for filling joints in block paving. Grain size up to 0.5mm.
- **SHARP SAND** - A washed concreting sand suitable for concrete manufacture when mixed with gravel and cement. It is also ideal for bedding flagstones and block paving.
- **ROCK SALT** - For pavements, driveways, car parks and road surfaces.
- **6MM BEDDING AGGREGATE** - For use as a laying course in porous paving systems
- **20MM DRAIN AGGREGATE** - For use as a base course in porous paving systems.
- **3MM JOINT AGGREGATE** - For use as a concrete block joint filler in porous paving systems.
- **PLAY SANDS** - Not only great for sand pits, but also for use on creative projects around the home and garden.
- **PATCHMAC** - A safe and easy-to-use material for patching and repairing tarmac areas.
