Delta Roof Guard

Unleash the power of Delta Roof Guard's cold applied liquid waterproofing systems, ingeniously designed to deliver a fast-curing, flexible, elastomeric solution. Regardless of whether your project involves roofs, podium decks, terraces, balconies, walkways, or car parks, Delta Roof Guard ensures superior protection.

Take a closer look at the innovative classification system, BS EN 13501-5. It encompasses four distinctive roof tests, meticulously designed to evaluate the fire resistance capabilities of a roof. These tests are strategically focused on measuring the fire penetration through the roof structure and the extent of flame spread across the roof surface. The intriguing suffix '(t4)', which you often notice, signifies the application of Test 4.

Delta Roof Guard is BBA certified and holds BROOF(t4).

Certification

National Class	European Class	Minimum distance from and relevant boundary (England)	Minimum distance from any point on relevant boundary
AA, AB, AC	BROOF(T4)	Unrestricted and can be used anywhere on the roof	Low Vulnerability (<6m)
BA, BB, BC	CROOF(T4)	At least 6m of the boundary	Medium Vulnerability (6-24m)
CA, CB or CC	DROOF(T4)	At least 6, 12 or 20m of the boundary depending on building type and use	Medium Vulnerability (6-24m)
AD, BD or CD	EROOF(T4)	At least 6, 12 or 20m of the boundary depending on building type and use	High Vulnerability (>24m)
DA, DB, DC or DD	FROOF(T4)	At least 20m of the boundary depending on building type and use	High Vulnerability (>24m)

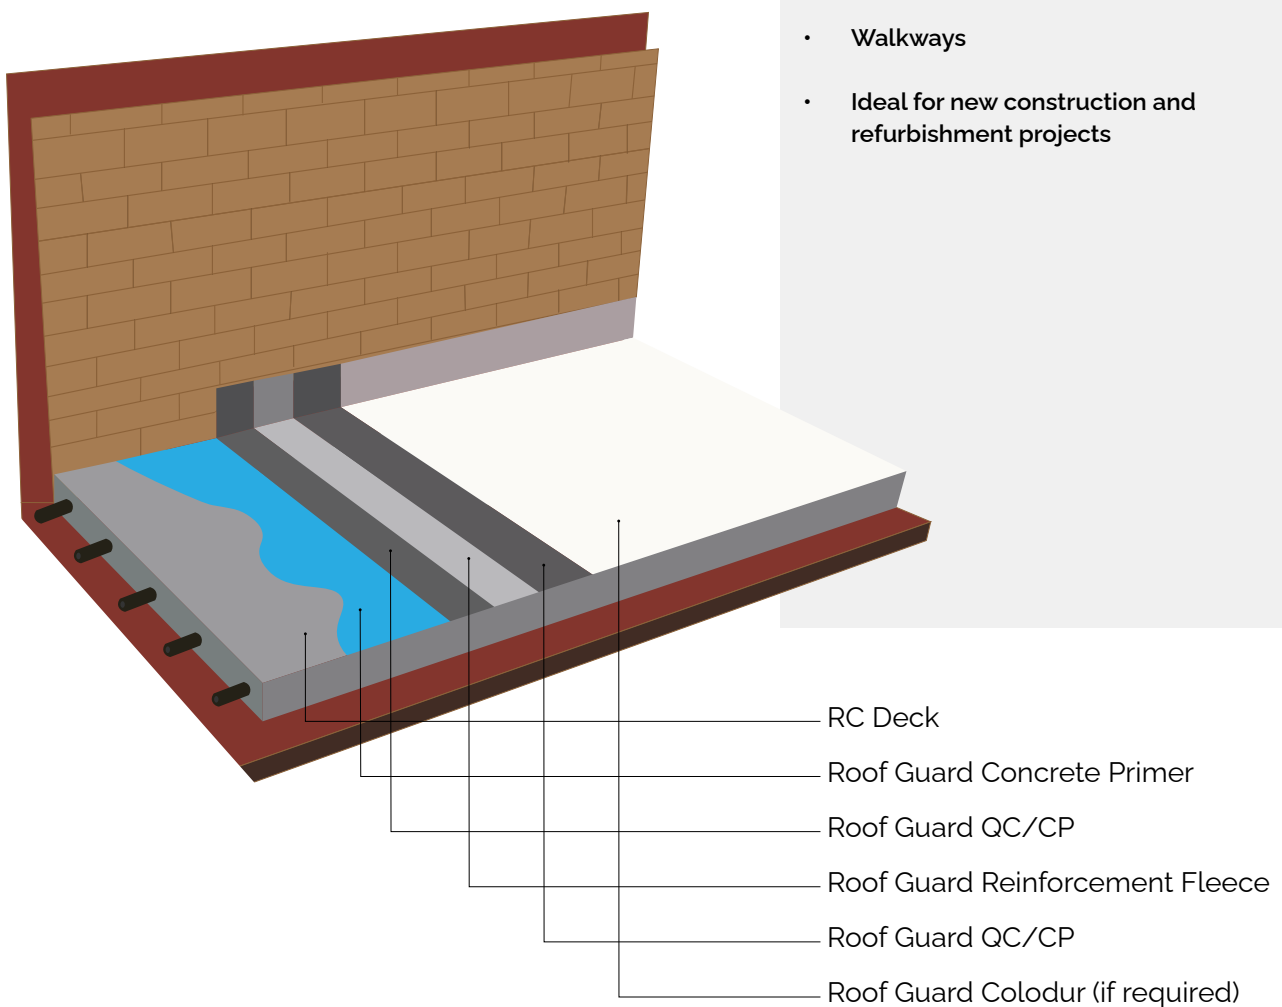

Fields of Application

Experience the future of waterproofing with our innovative cold applied liquid systems. Delta Roof Guard is engineered with advanced technology, offering seamless coverage. With absolutely no requirement for heat application, Delta Roof Guard is the perfect solution for areas where hot works pose a risk.

Get the assurance of a fully bonded substrate, courtesy of our Delta Roof Guard, cold liquid system. It's time to rethink waterproofing, choose Delta Roof Guard for an effortless, secure, and reliable solution.

Uses:

- Type A Waterproofing solution for below ground and earth-retained structures
- Cold or warm roof construction
- Green roofs
- Balconies and terraces
- Podium decks
- Car parks
- Infrastructure
- Walkways
- Ideal for new construction and refurbishment projects

Features and benefits

Experience the power of Delta Roof Guard, a revolutionary cold liquid applied waterproofing solution that ensures a seamless, solid waterproof covering for entire roof areas.

Whether it's a new project, an extension, or the refurbishment of an existing leaky roof, Roof Guard is your ready-to-use, cold applied answer. Why? It offers exceptional adhesion to both porous and non-porous substrates, guaranteeing a leak-free future for your property.

Designed to withstand even the most challenging building movements, it's the ultimate protection your roof deserves. Trust Delta Roof Guard for a waterproofing experience that exceeds expectations.

Appreciated by building owners, designers, and contractors alike, it offers an array of high-performance solutions tailored for a variety of requirements and applications. Ideal for roofing refurbishment, repair, new builds, and even intricate or inverted roofs, its appeal has been elevated by new, enhanced formulations.

Ditch the traditional bonded or torch-on systems and embrace the innovation of liquid applied waterproofing. Its popularity is rapidly growing, and for good reason.

Make the smart choice today with Delta Roof Guard.

Broof(t4) and BBA Approved

Cold applied - avoiding inherent risks associated with hot works

Completely seamless waterproofing - no joints or fixings

Guaranteed leak-free solution

Easy to apply, even on difficult substrates

Exceptionally fast curing

Green Roof approved

Fire and chemical resistant

Efficient, simple and safe application

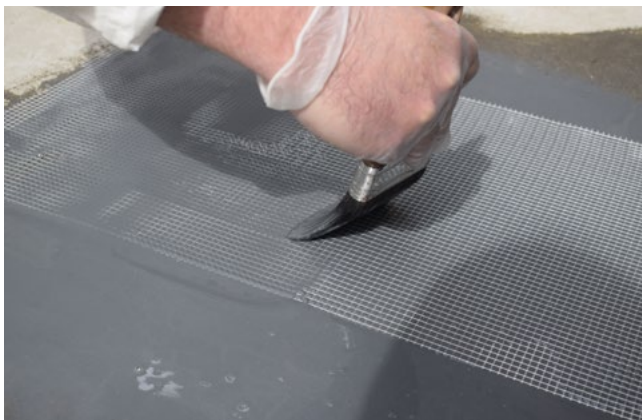

Experience the efficiency and safety of cold applied liquid roofing/waterproofing. This innovative solution removes the need for heat, making the application process quicker, safer, and less laborious than traditional methods. Say goodbye to the use of hazardous torches, burners, or other heating equipment, and embrace a risk-free application process. Adopt cold applied waterproofing today - it's a smarter choice.

Delta Roof Guard is smoothly roller applied for optimal coverage. Embrace the ease of using an airless machine to apply primers, promising quick, efficient preparation.

Choose Delta Roof Guard, cold liquid applied waterproofing for an efficient, reliable, and cost-effective solution to your project.

If your current waterproofing system has let you down, the answer may be simpler and more affordable than you think. A cold liquid waterproofing overlay could be a game-changer for you. Not only is it cost-effective, but its exceptional bonding characteristics also elevate its reliability significantly. Trust Delta Roof Guard and reap the benefits.
