

Model No : EDV-LR-BP

Overview

The Eau de Vie “LR model ” is a slot-in cassette version of the free standing variants. It can be installed on existing shelving and sited remotely from the dispense tap or taps, affording more flexibility in confined spaces. The Large Remote comes complete with an integral filter to ensure great tasting water. The water filter reduces chlorine, odours, particles, bad taste and health contaminants.

The cooling chamber is hidden inside with filters external for easy maintenance and replacement.

The unit is designed to dispense directly into glasses or Eau De Vie bottles which are distinguishable as still or sparkling water due to the bottle cap design.

Features

- Compact and flexible
- Capable of supplying quality fresh filtered water
- Water is supplied chilled with the option of still and sparkling
- Easy access for changing filters
- Simple to install
- Optional UV filter that kills bacteria which may be in the mains water
- Cooling capacity of 150 litres per hour
- 80 litres continuous supply
- Standard dimensions - 474(w) x 459(d) x 514(h)

Easy installation, connects to mains cold water supply and plugs into 2 x 13 amp sockets. Supplied with external water filters to provide premium quality tasting water.

The unit requires connection to a CO² cylinder which is housed externally and supplied by gas suppliers.

Benefits

- Free up valuable storage space
- Improved profits compared to bottled water
- Eco friendly

EAUdeVIE®

fresh filtered still & sparkling water systems

Dimensions (CAD blocks available upon application (00 44 (0)1908 359 000))

- Width 474 mm
- Depth 459 mm
- Height 514 mm

Water Connection

- Cold water mains potable supply
- Water Pressure $\frac{3}{4}$ BSP Isolator (3/4 BSP-3/8 Adaptor required)
Min 1.5 /Max 3.5 Bar
(No drainage required)
- Excess spillage into drip tray

Electrical Connection

- Mains Supply 230 V 1Ph 50 Hz Rated input 800 Watts
- Run Current 2.6 Amps
- Start Current 7.0 Amps
- Fuse at 10 Amps
- Supply Lead 2M Mains Cable 3 Pin UK Plug

Refrigeration Performance

- Ice bank weight 8 Kg Nominal
- Maximum ambient temperature 32°C
- Refrigerant type/charge Natural Hydrocarbon R290

Weight

- Packed 50 kg
- Unpacked 40 kg
- Operational 45 kg
